

SNEMA

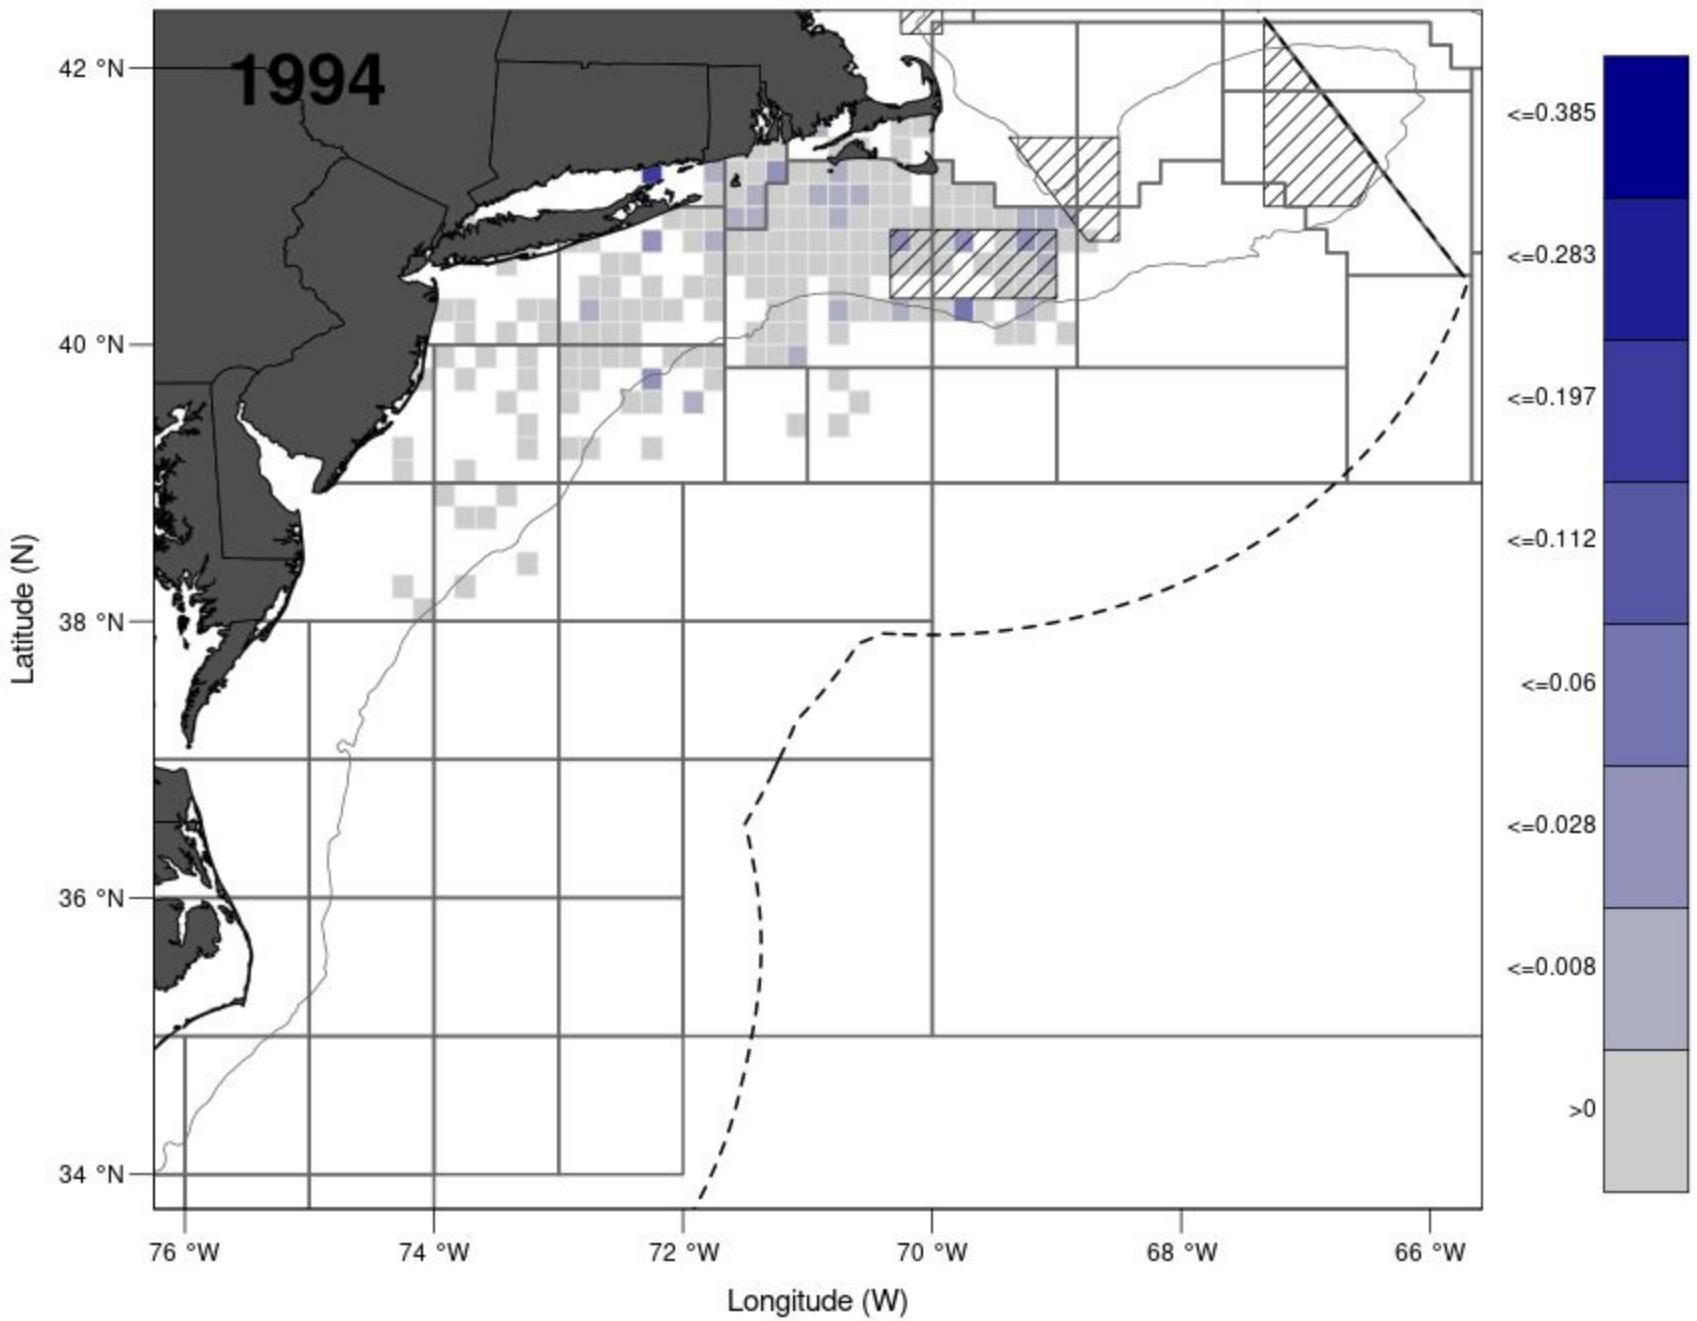

Take-home points

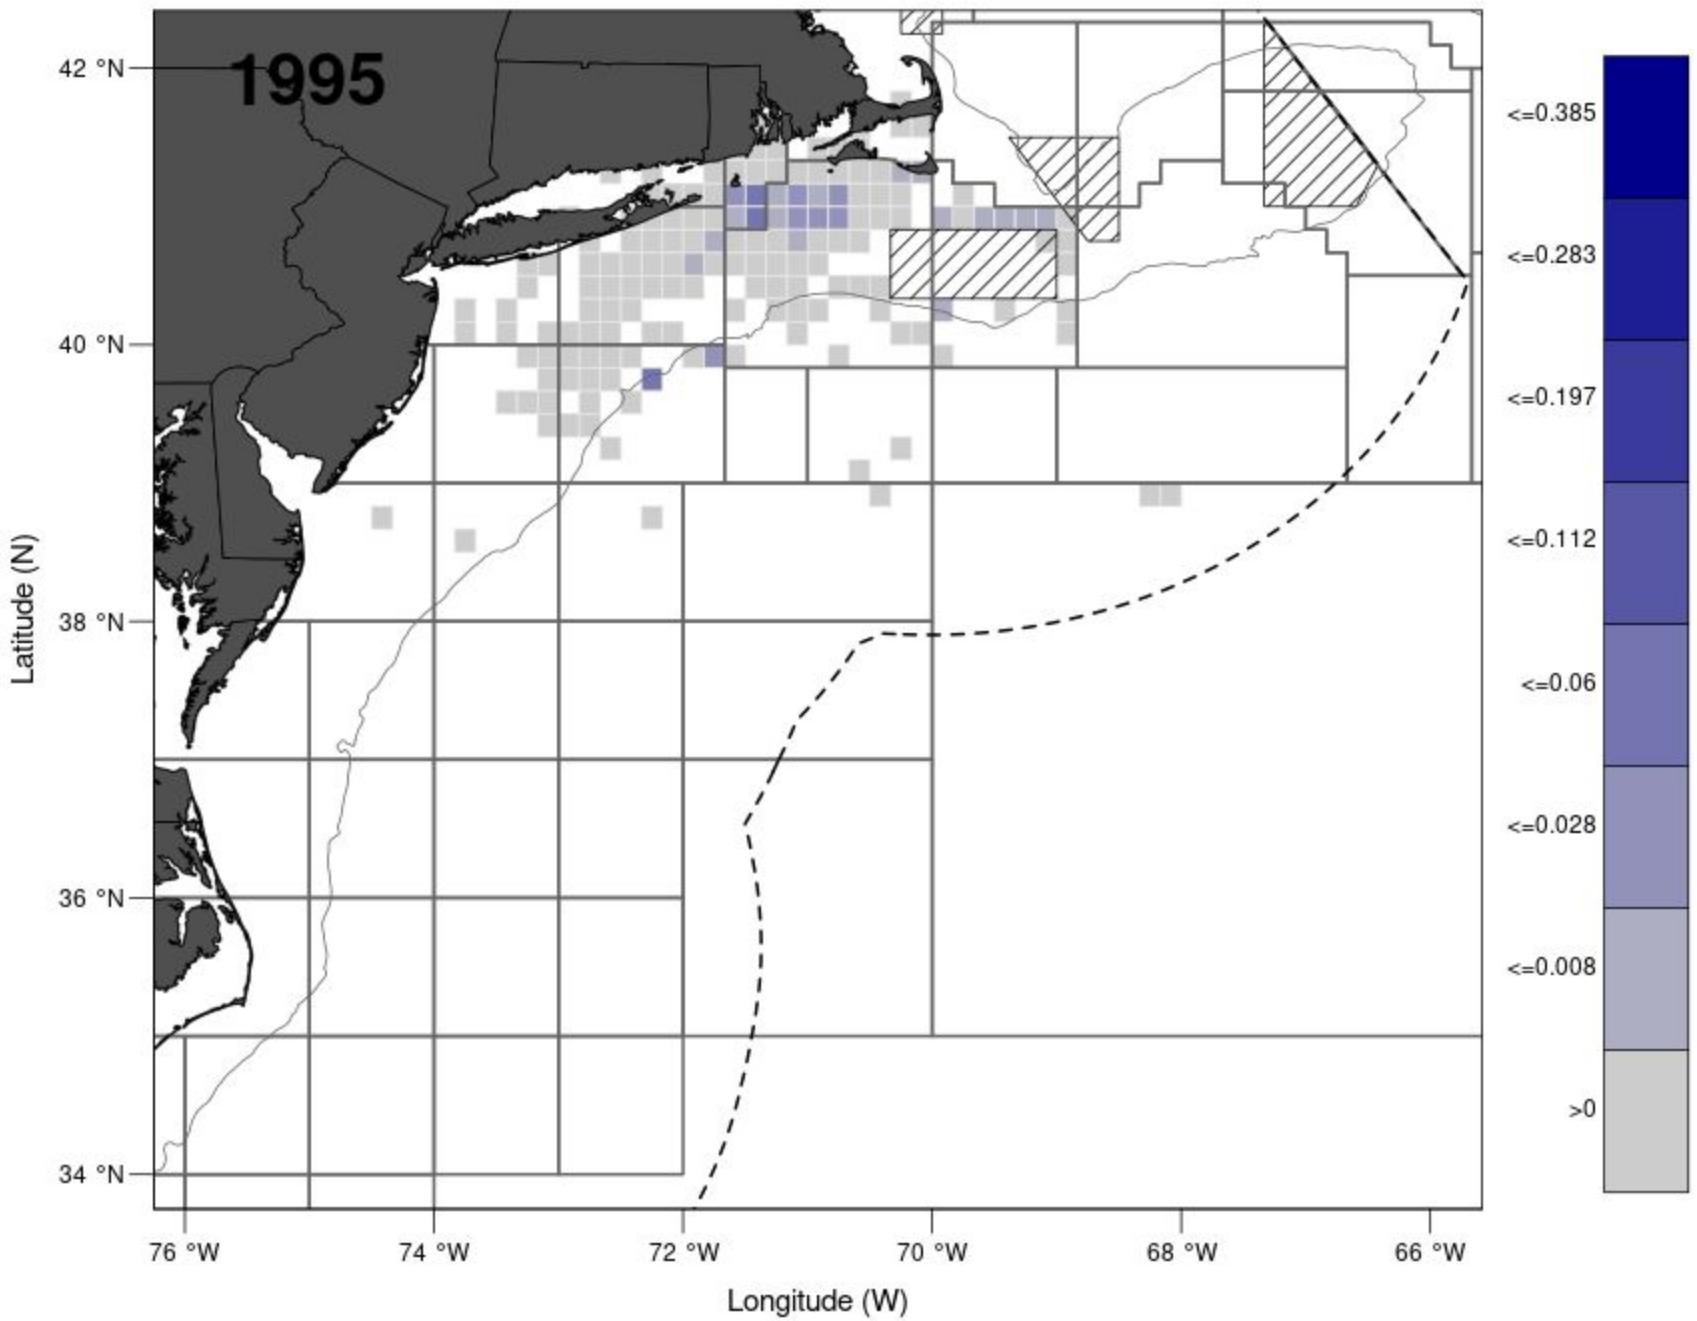

- Landings
 - Landings 1994 to 2016 mainly occur in shelf waters off Long Island, Rhode Island, and south of Cape Cod with some catch near GB stock boundary.
 - Around 2016, catches seem to concentrate more near Rhode Island with few landings from waters further south.
 - Overall number of trips that land yellowtail decreases over the series.

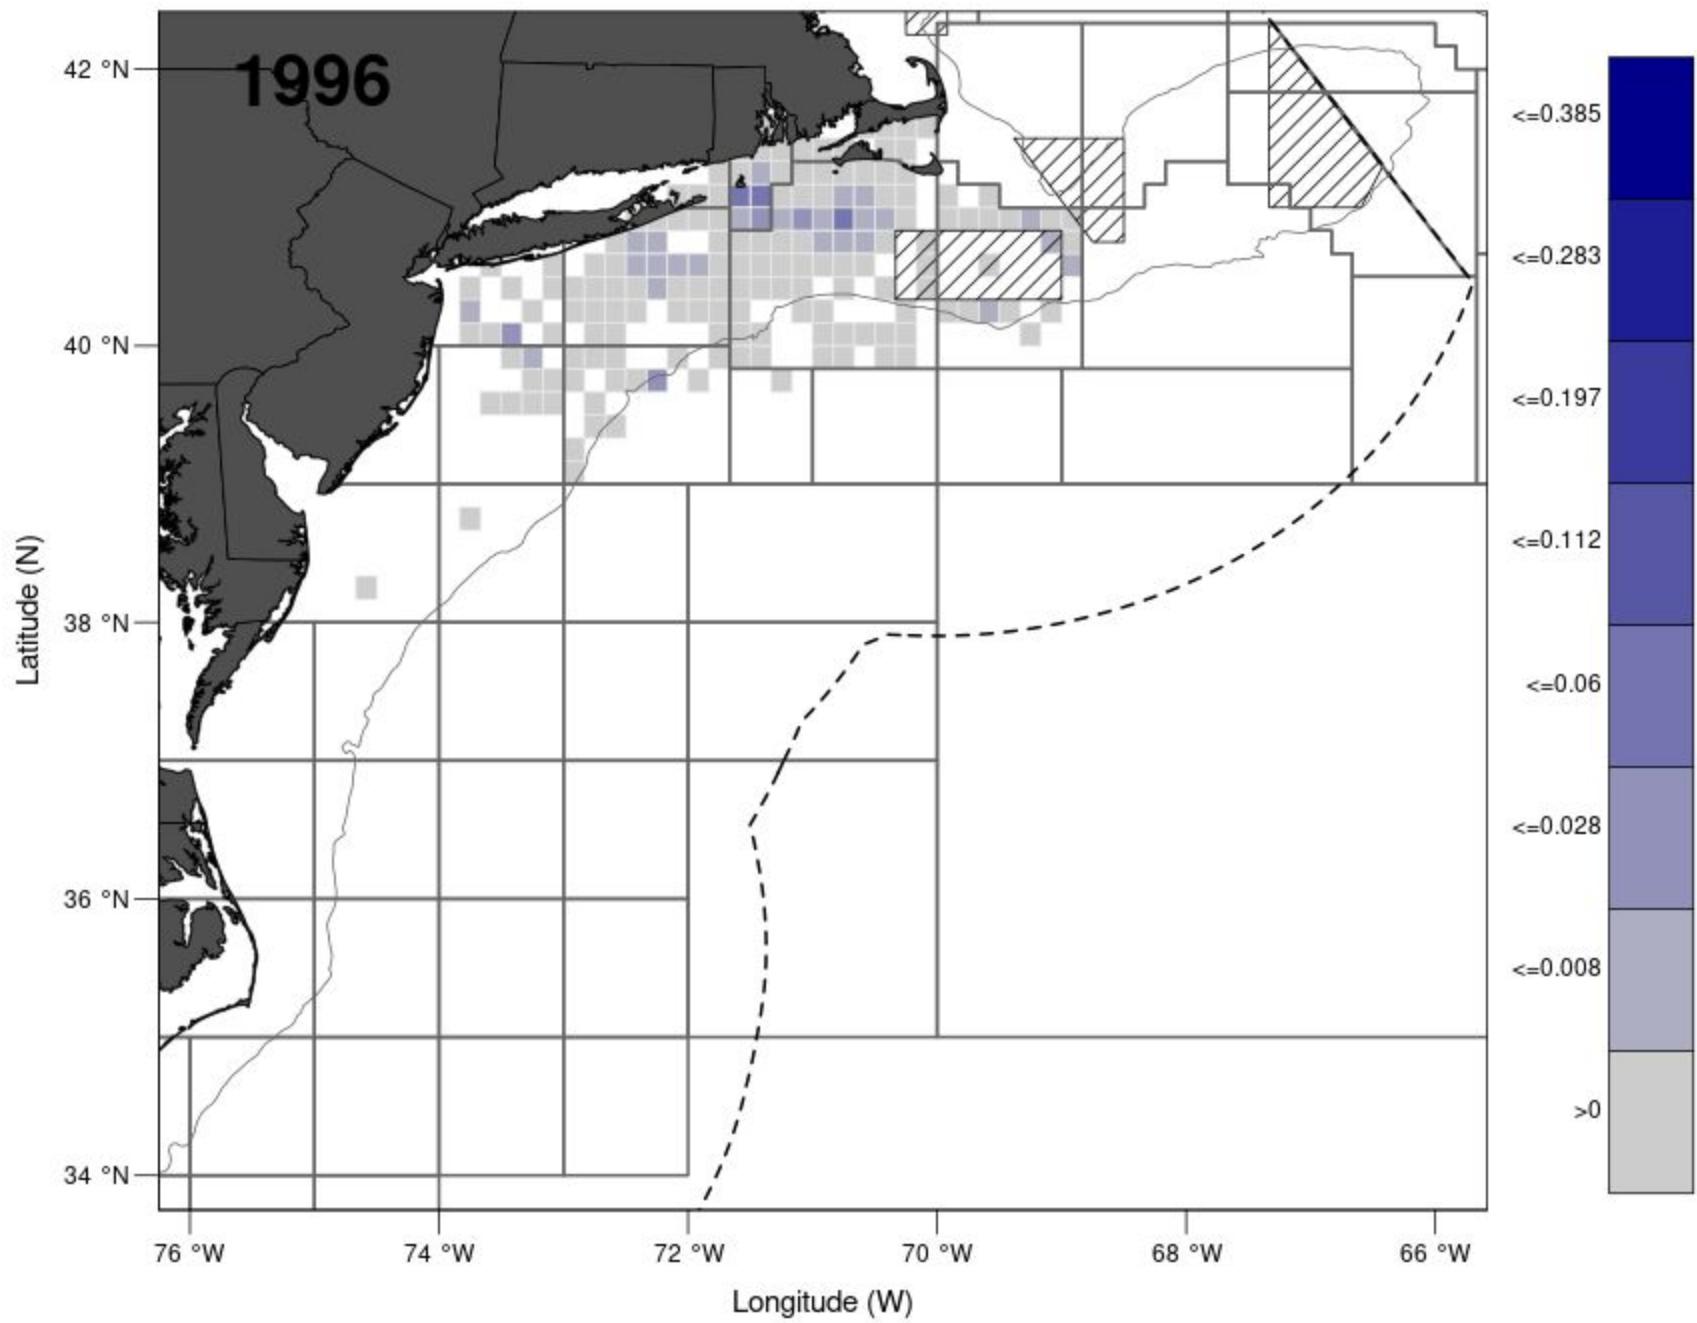

Take-home points

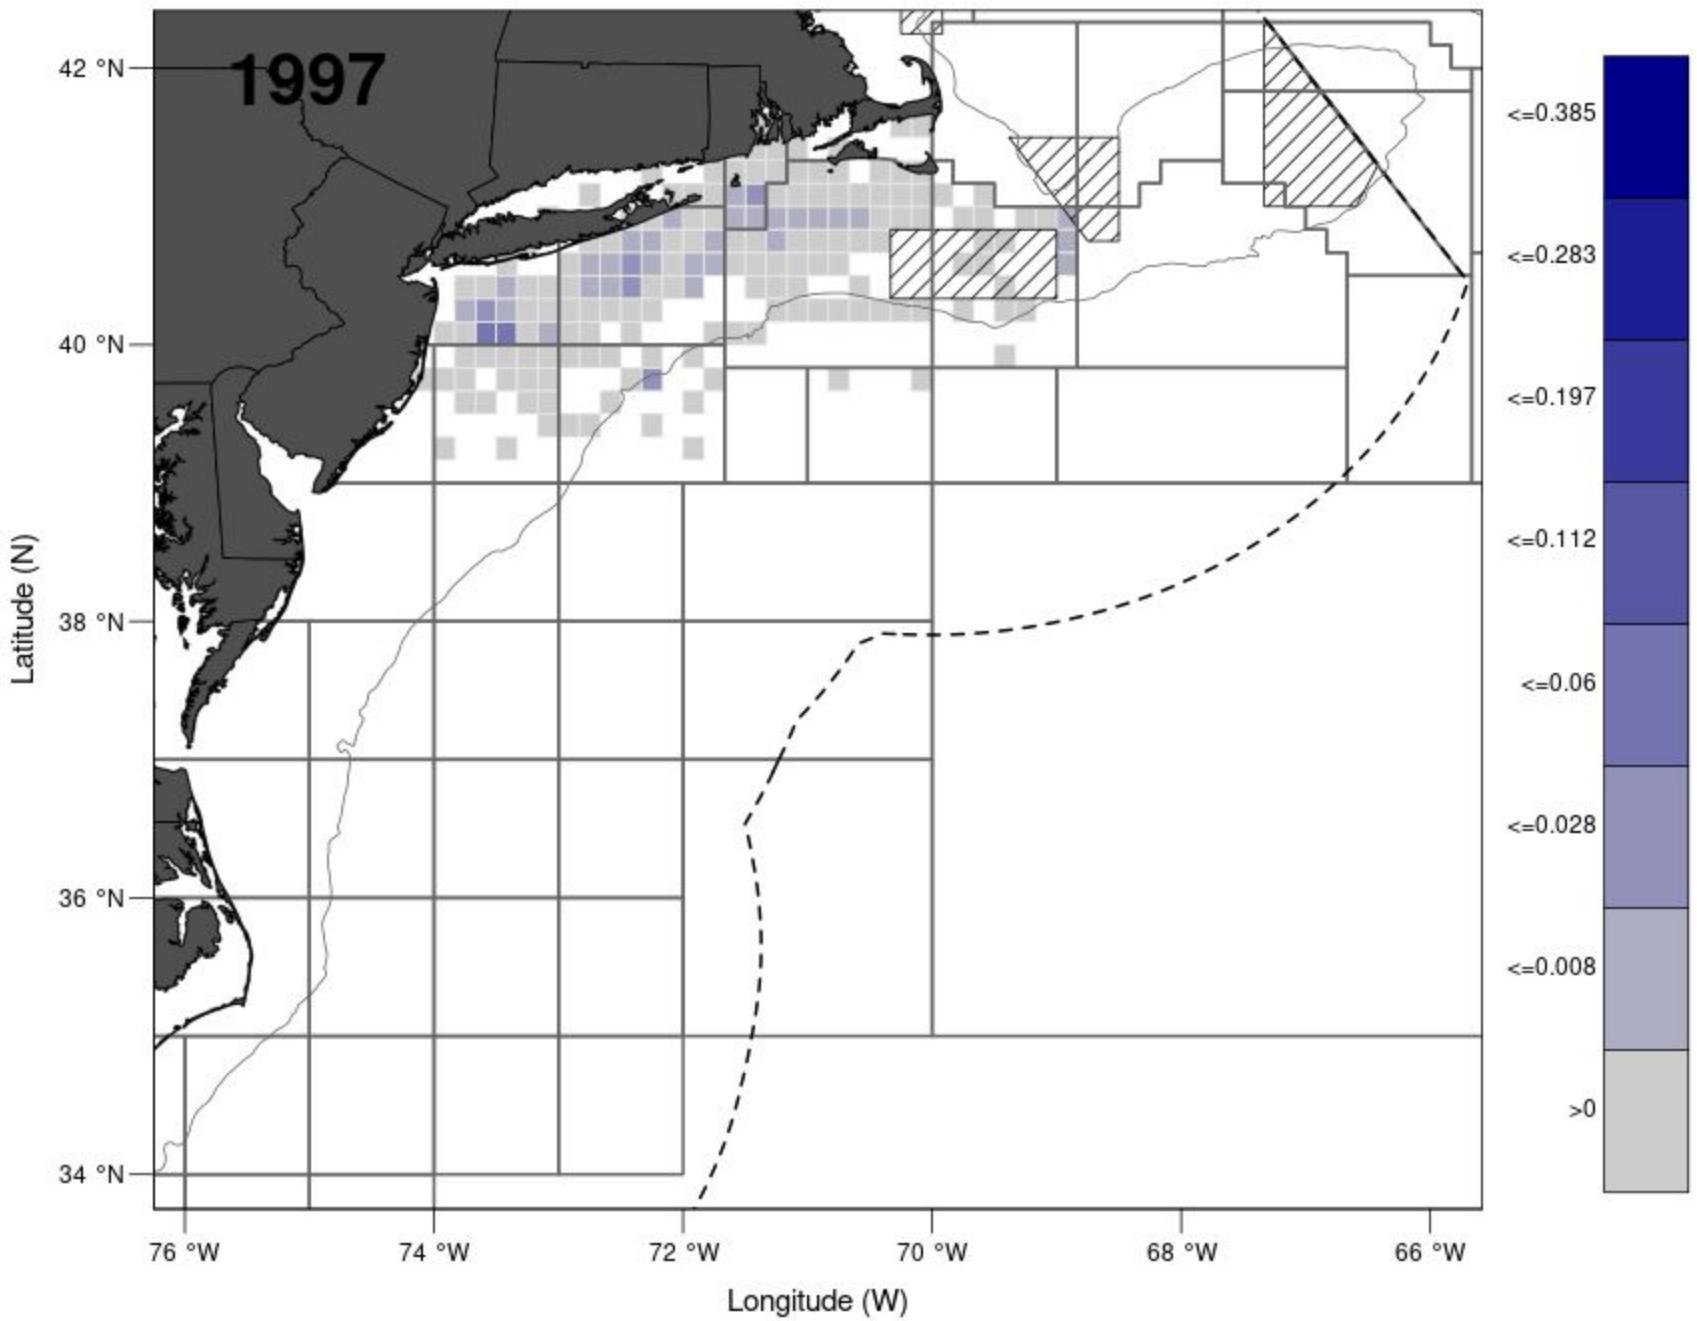

- Discards
 - Significant increase in discards, especially from 2005 onwards.
 - Discards everywhere very low 2018 on.
 - Most discards near Rhode Island/Montauk are from Otter Trawl.
 - Most discards not in waters near Rhode Island/Montauk are from scallop dredge.
 - Discards occur all along the shelf New Jersey to Cape Cod and some near GB (mostly scallop dredge) and generally cover same spatial domain of landings in a given year.

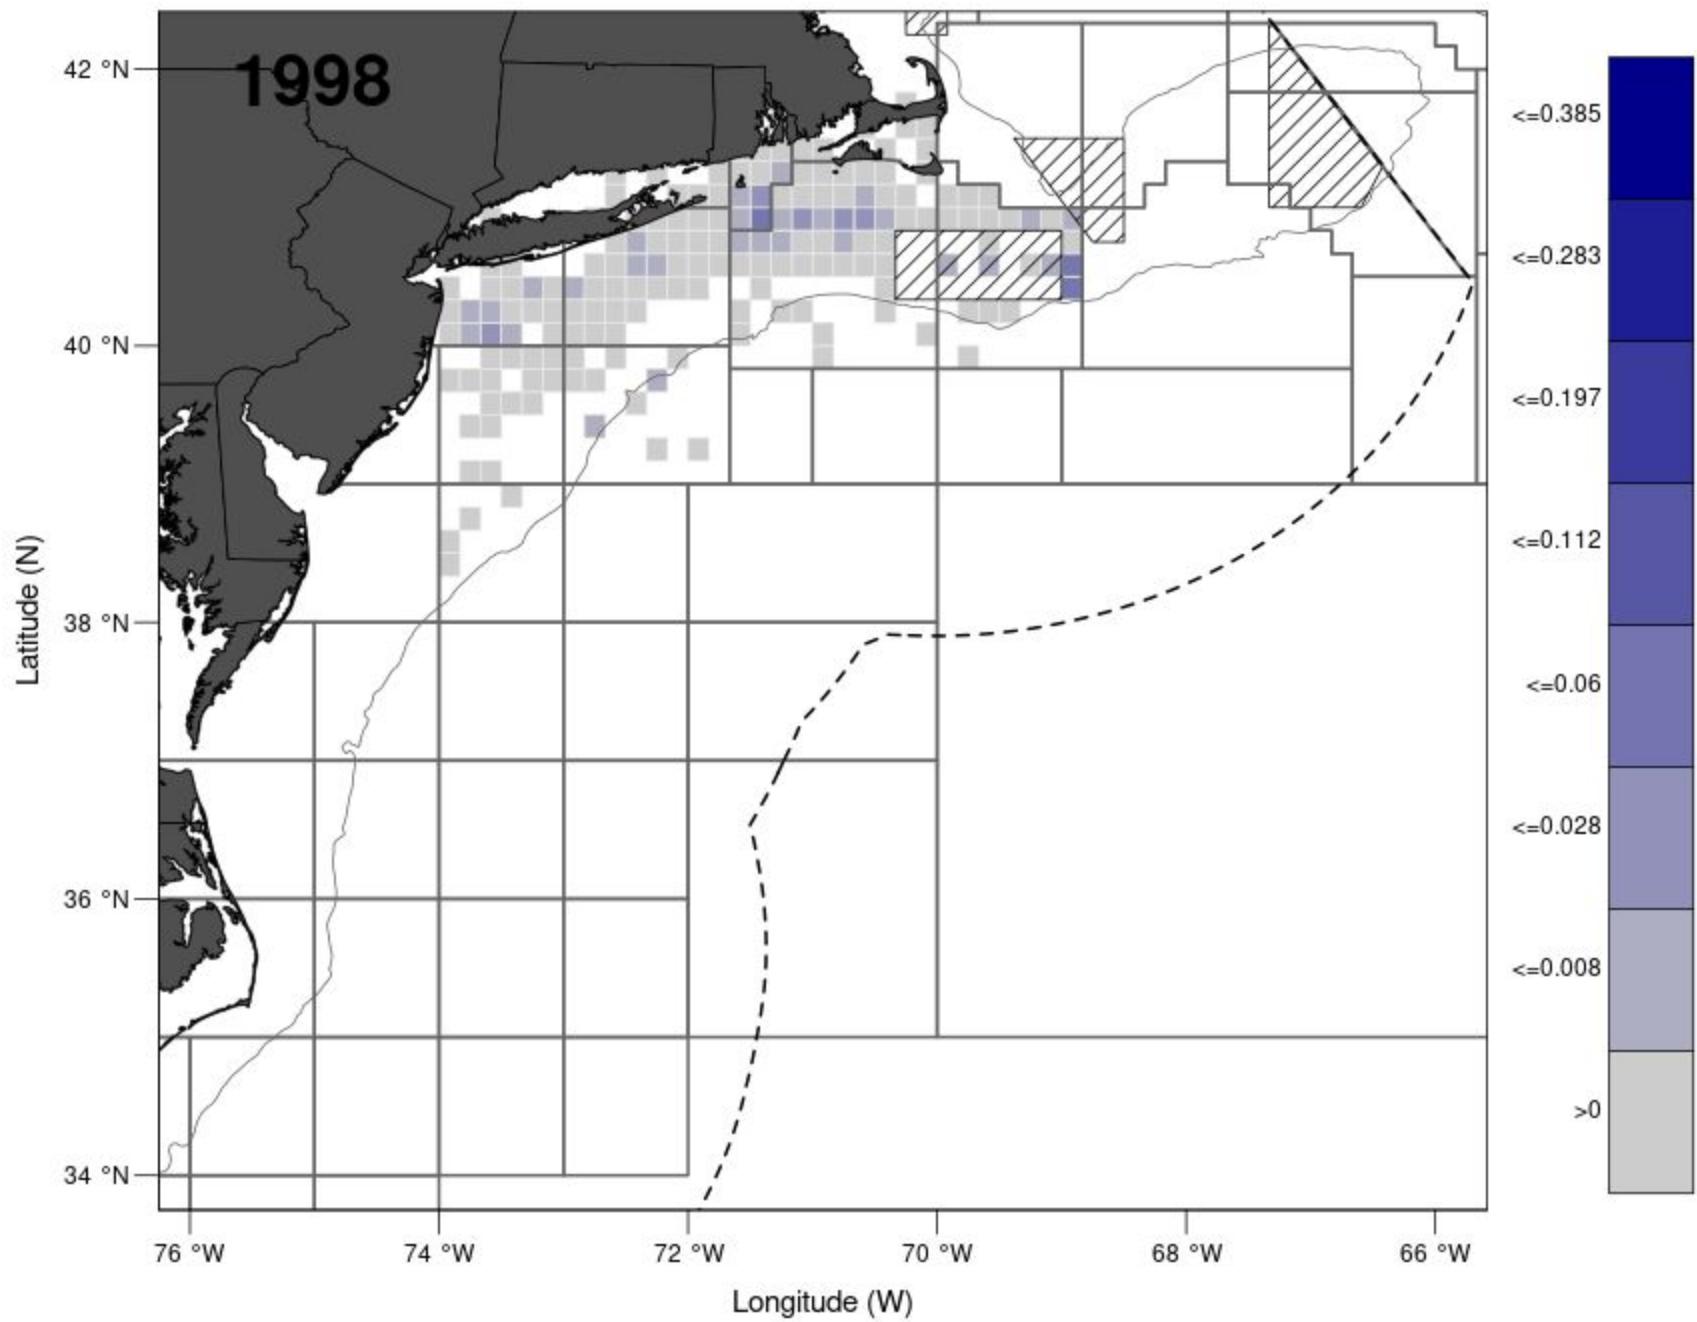

Commercial Landings

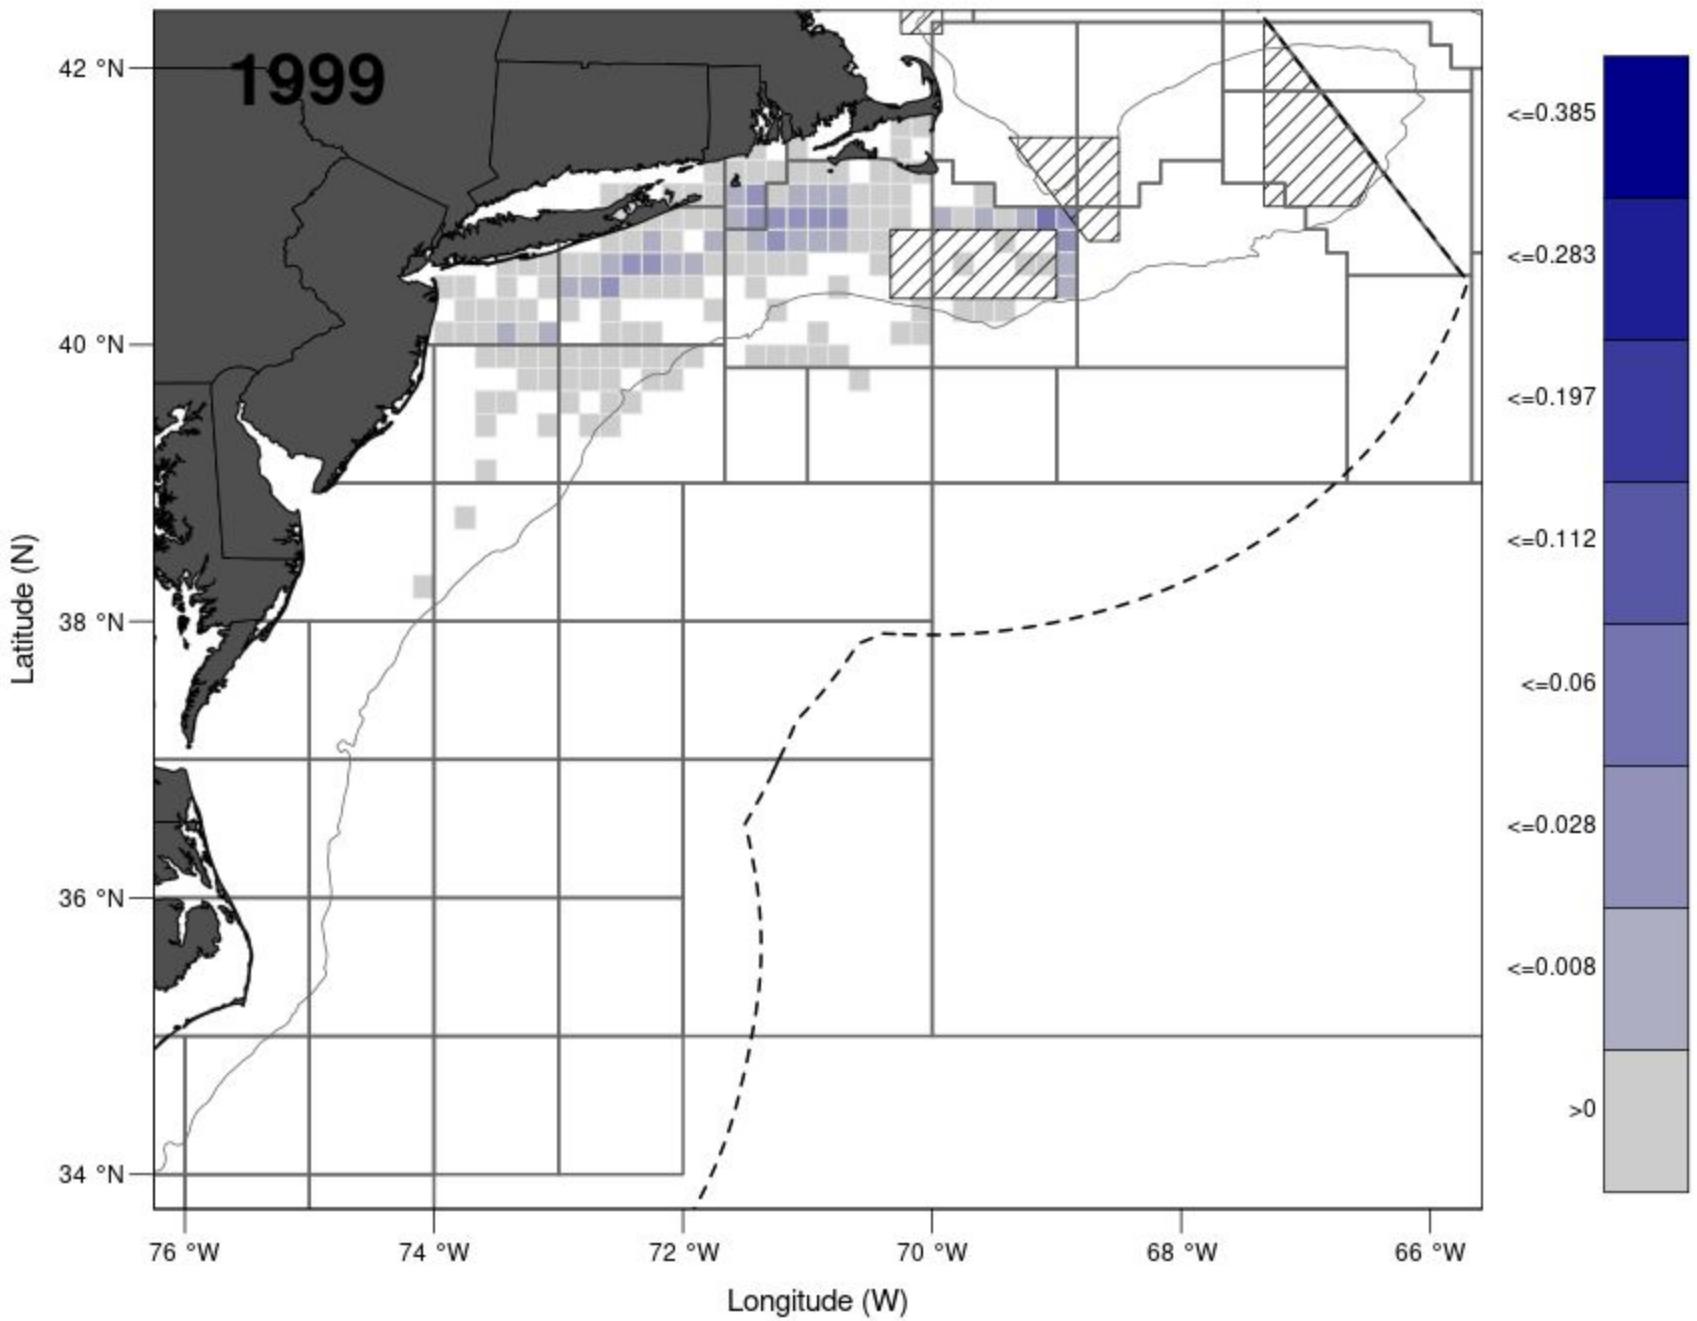

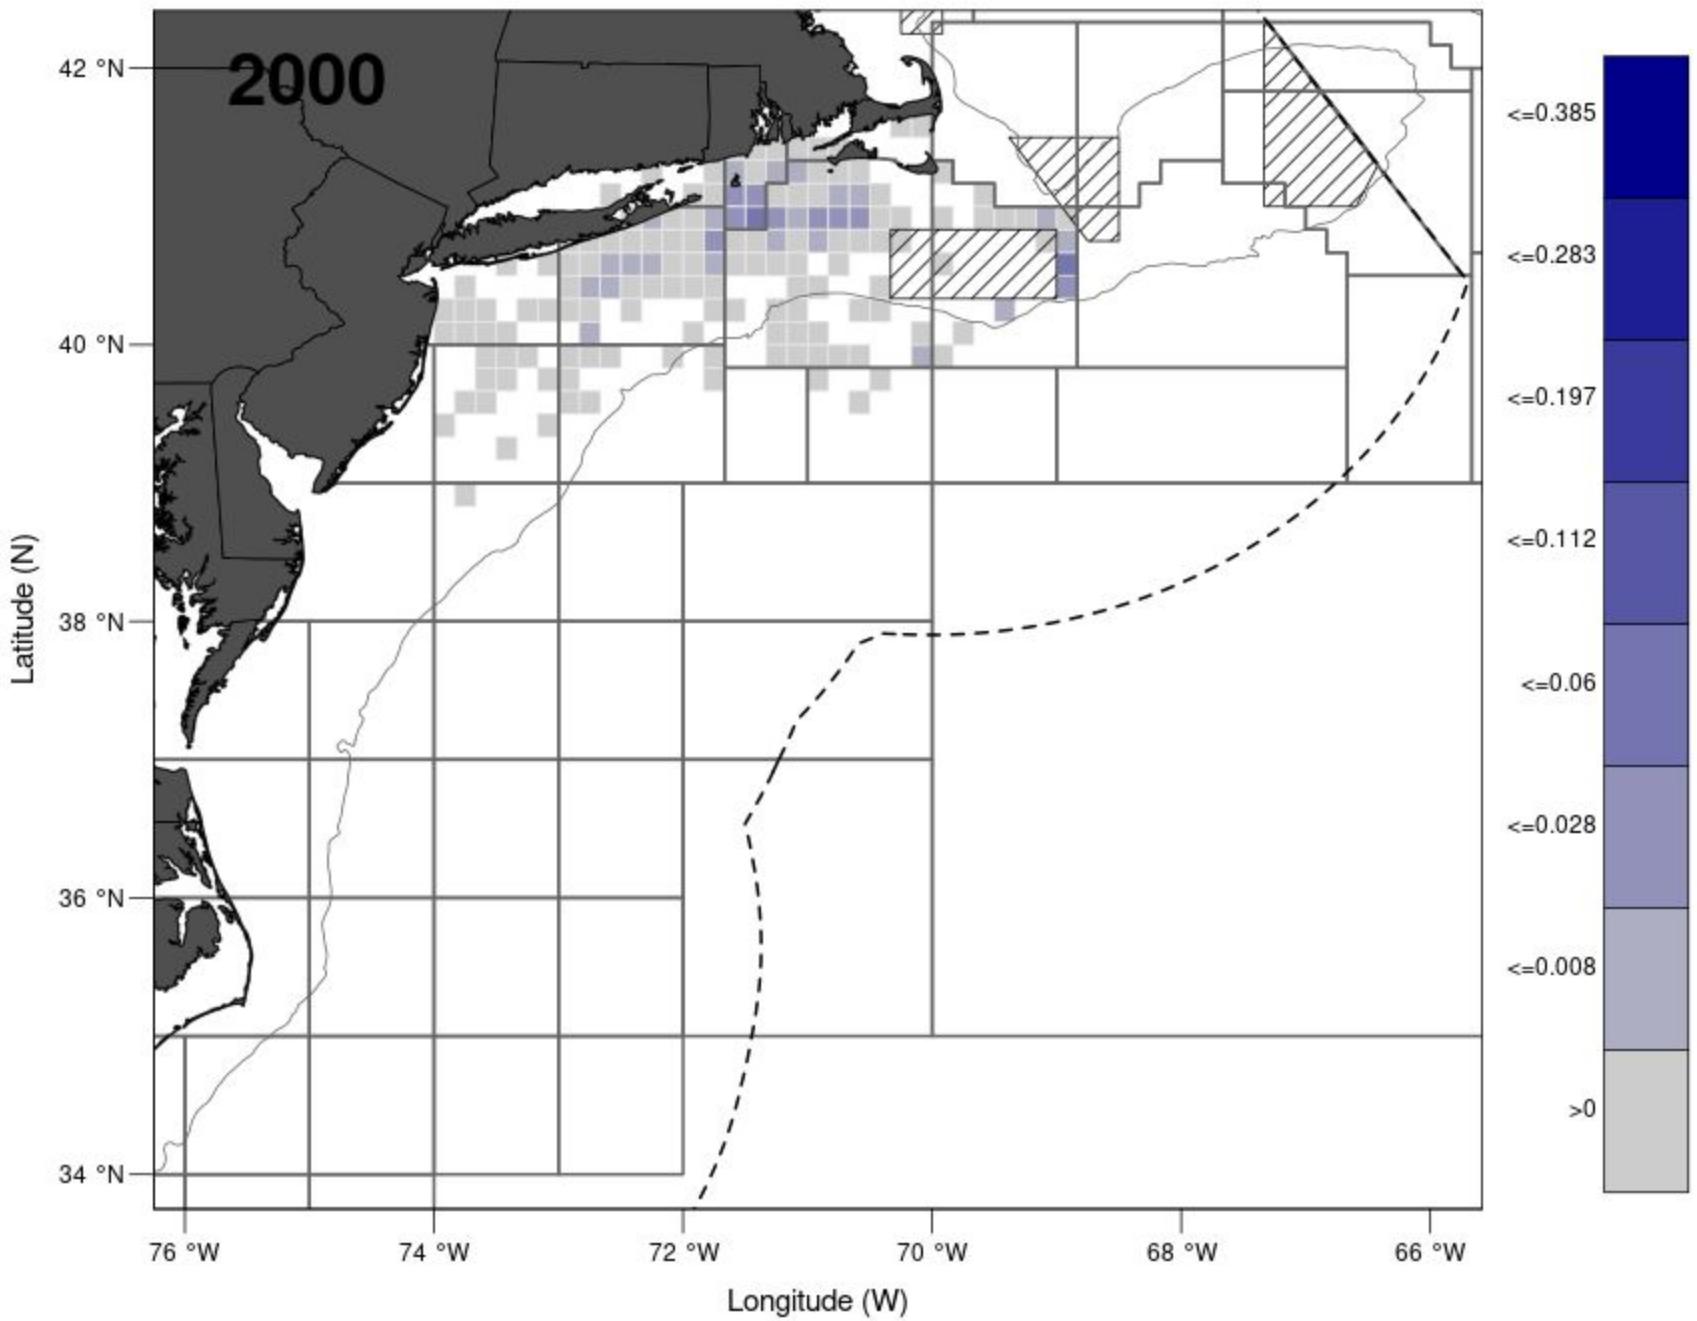

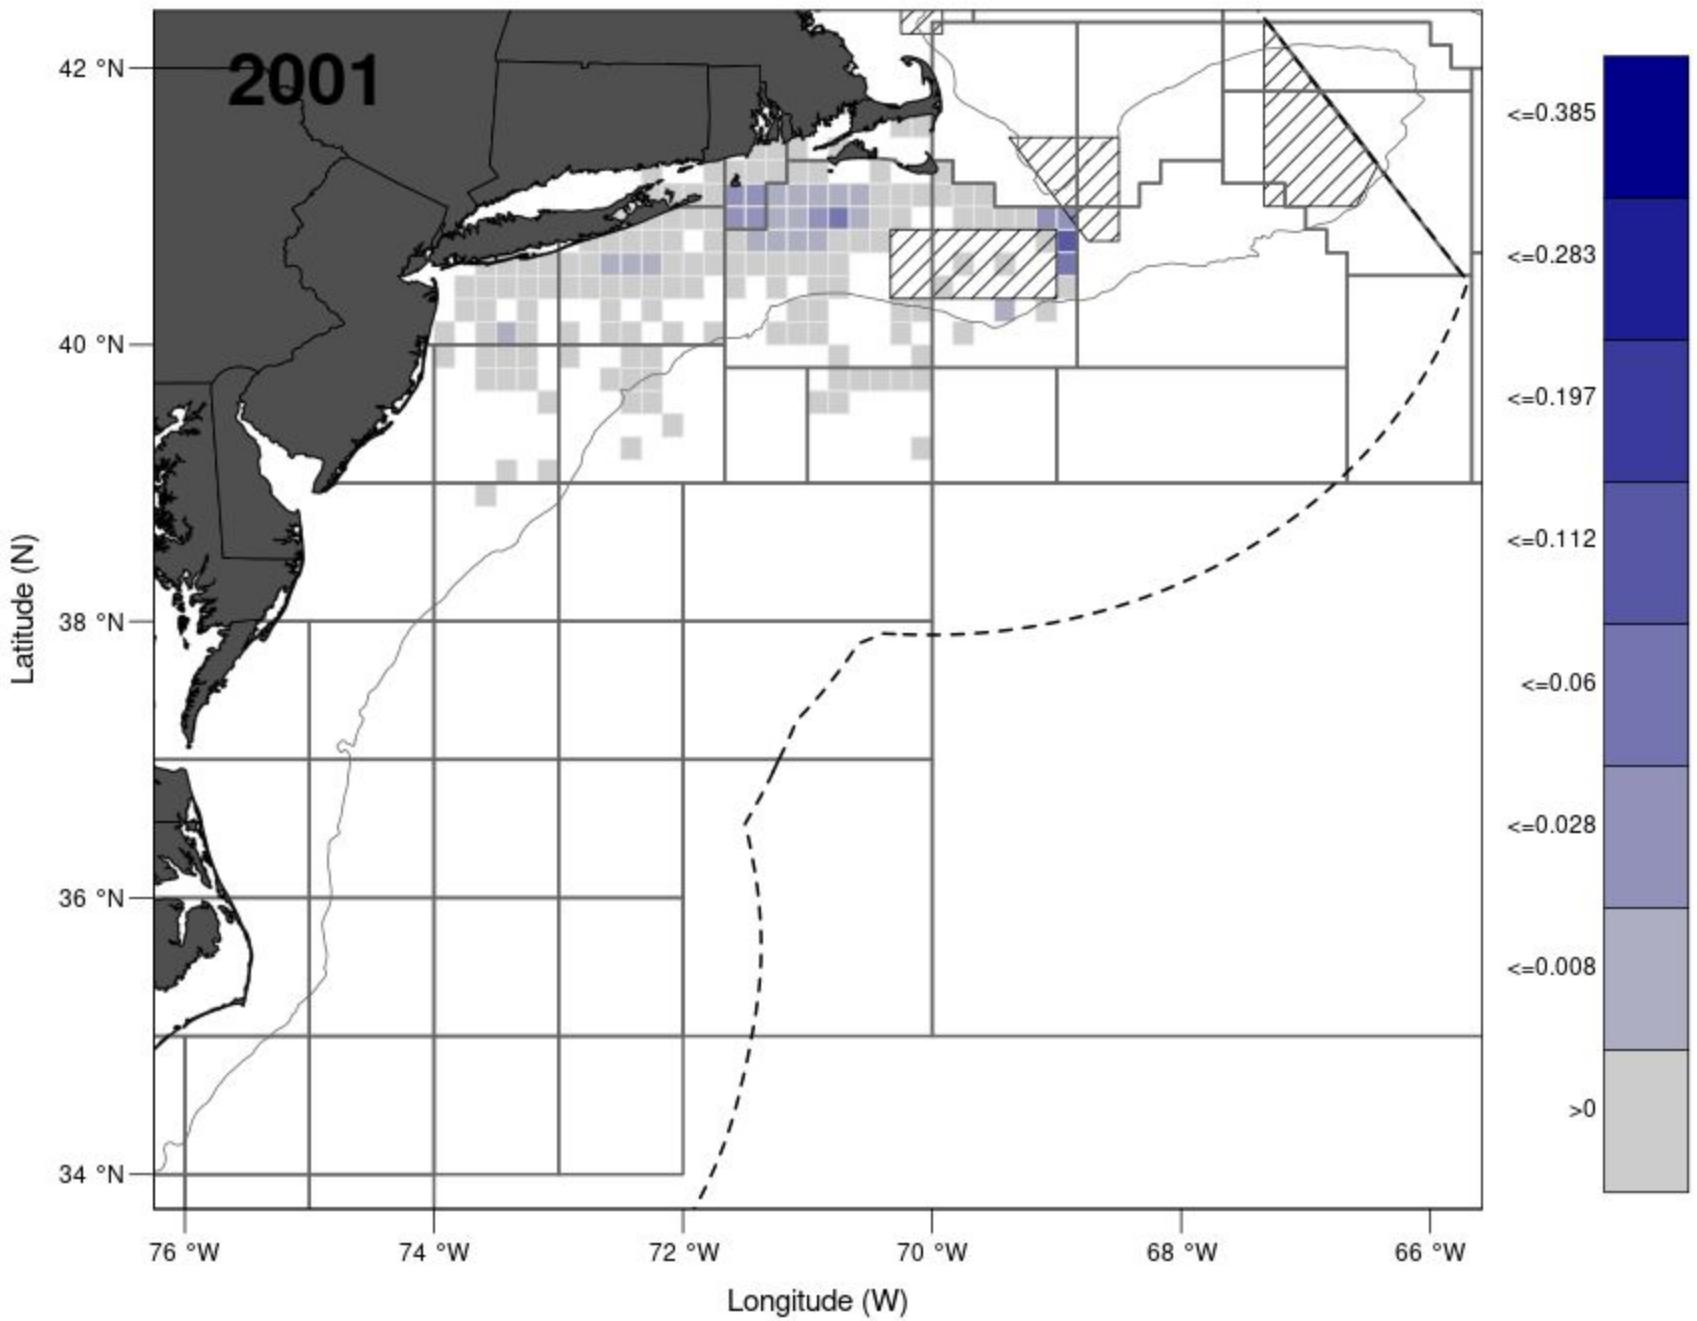

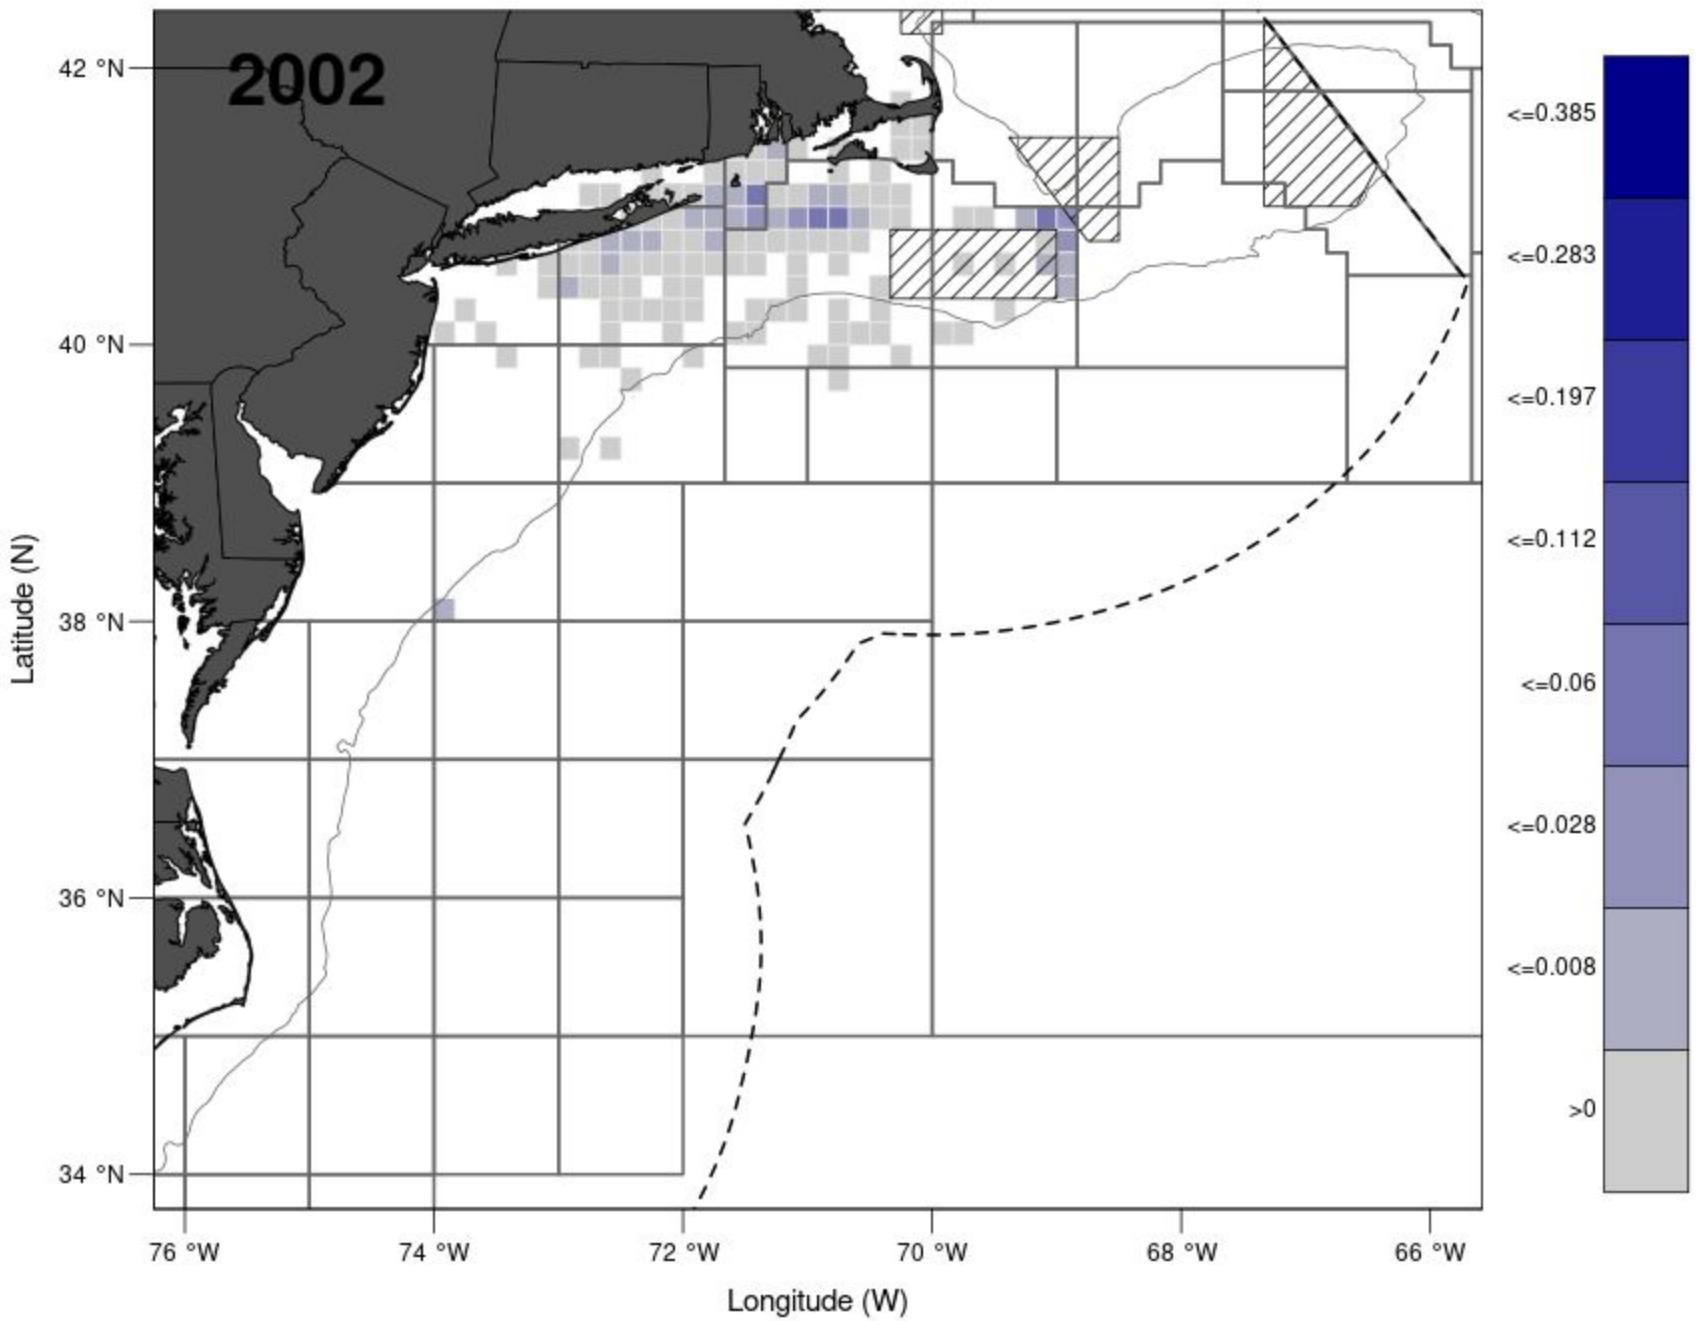

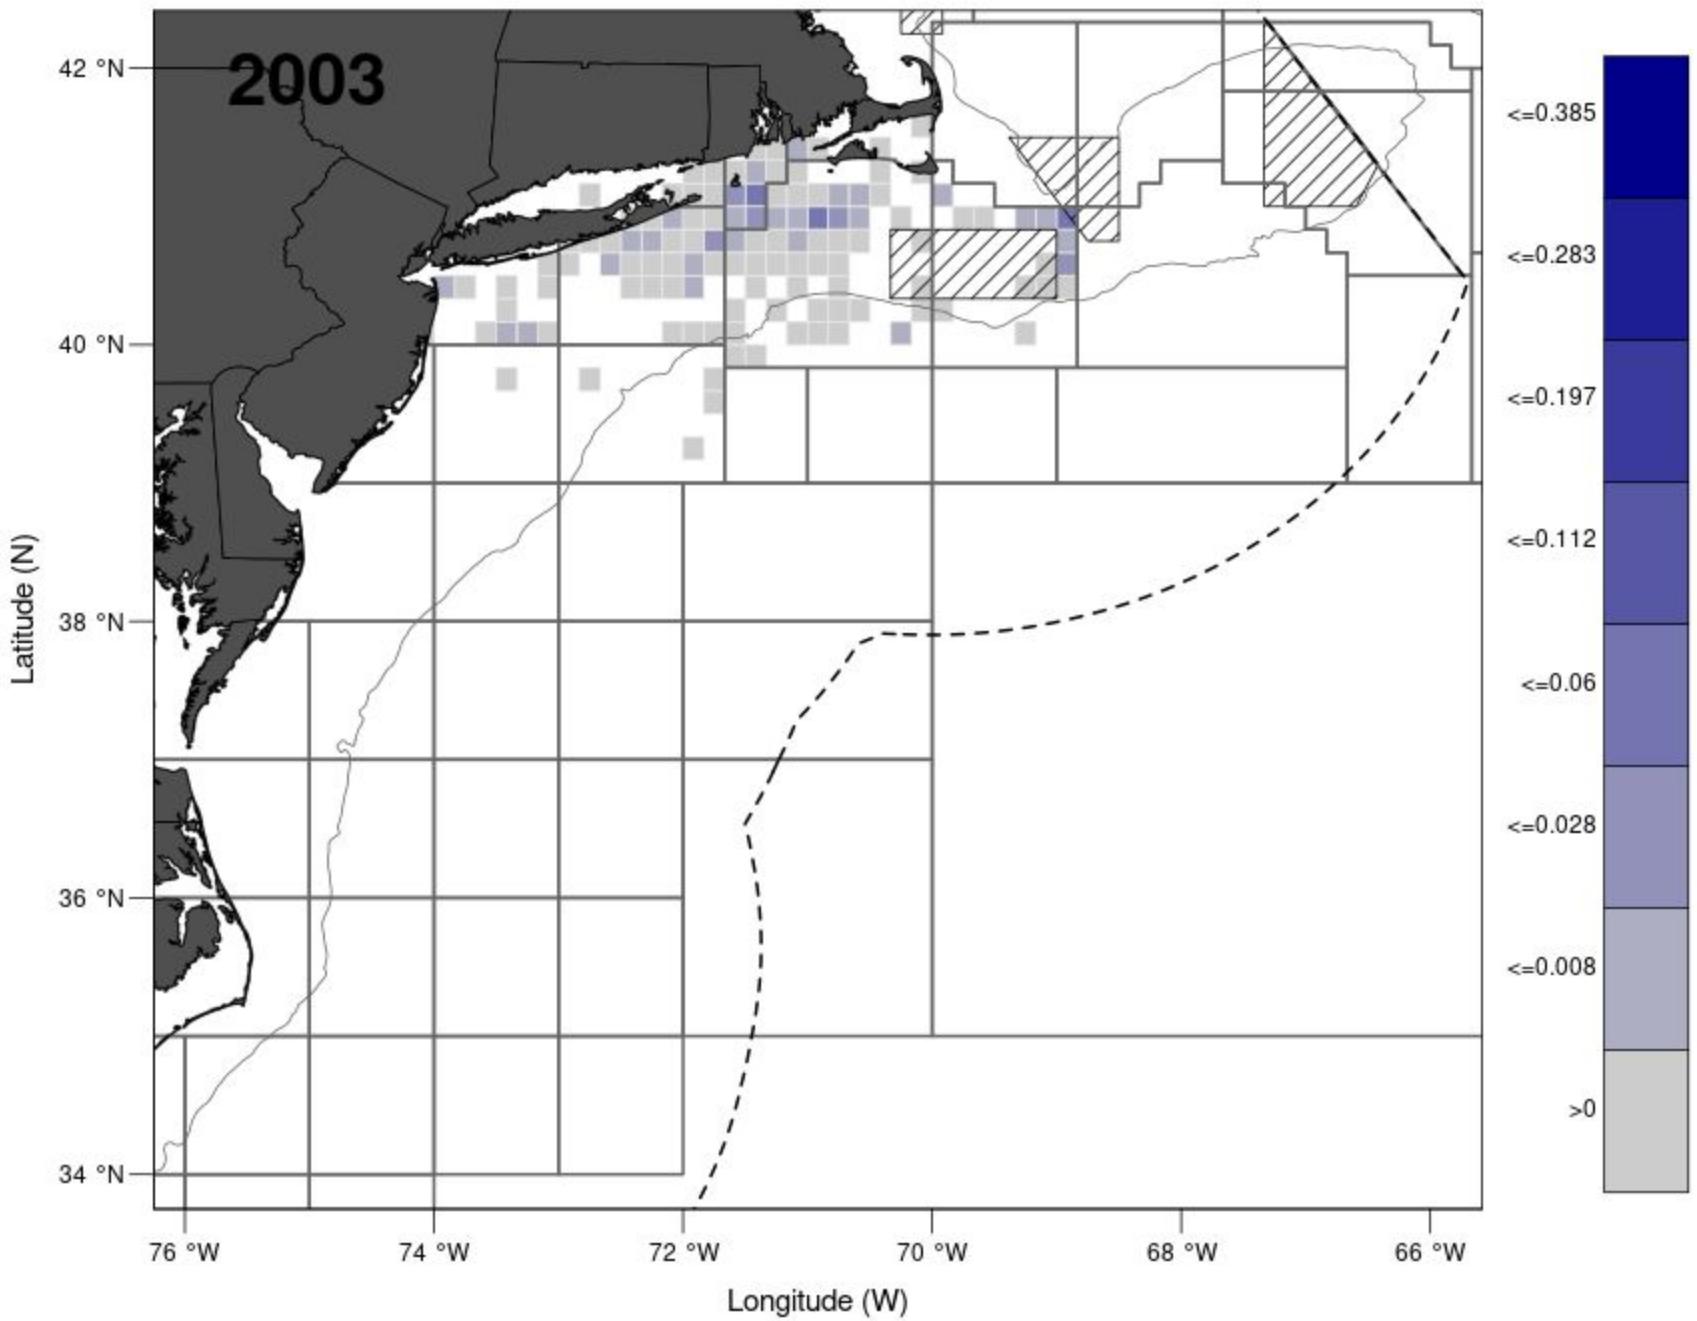

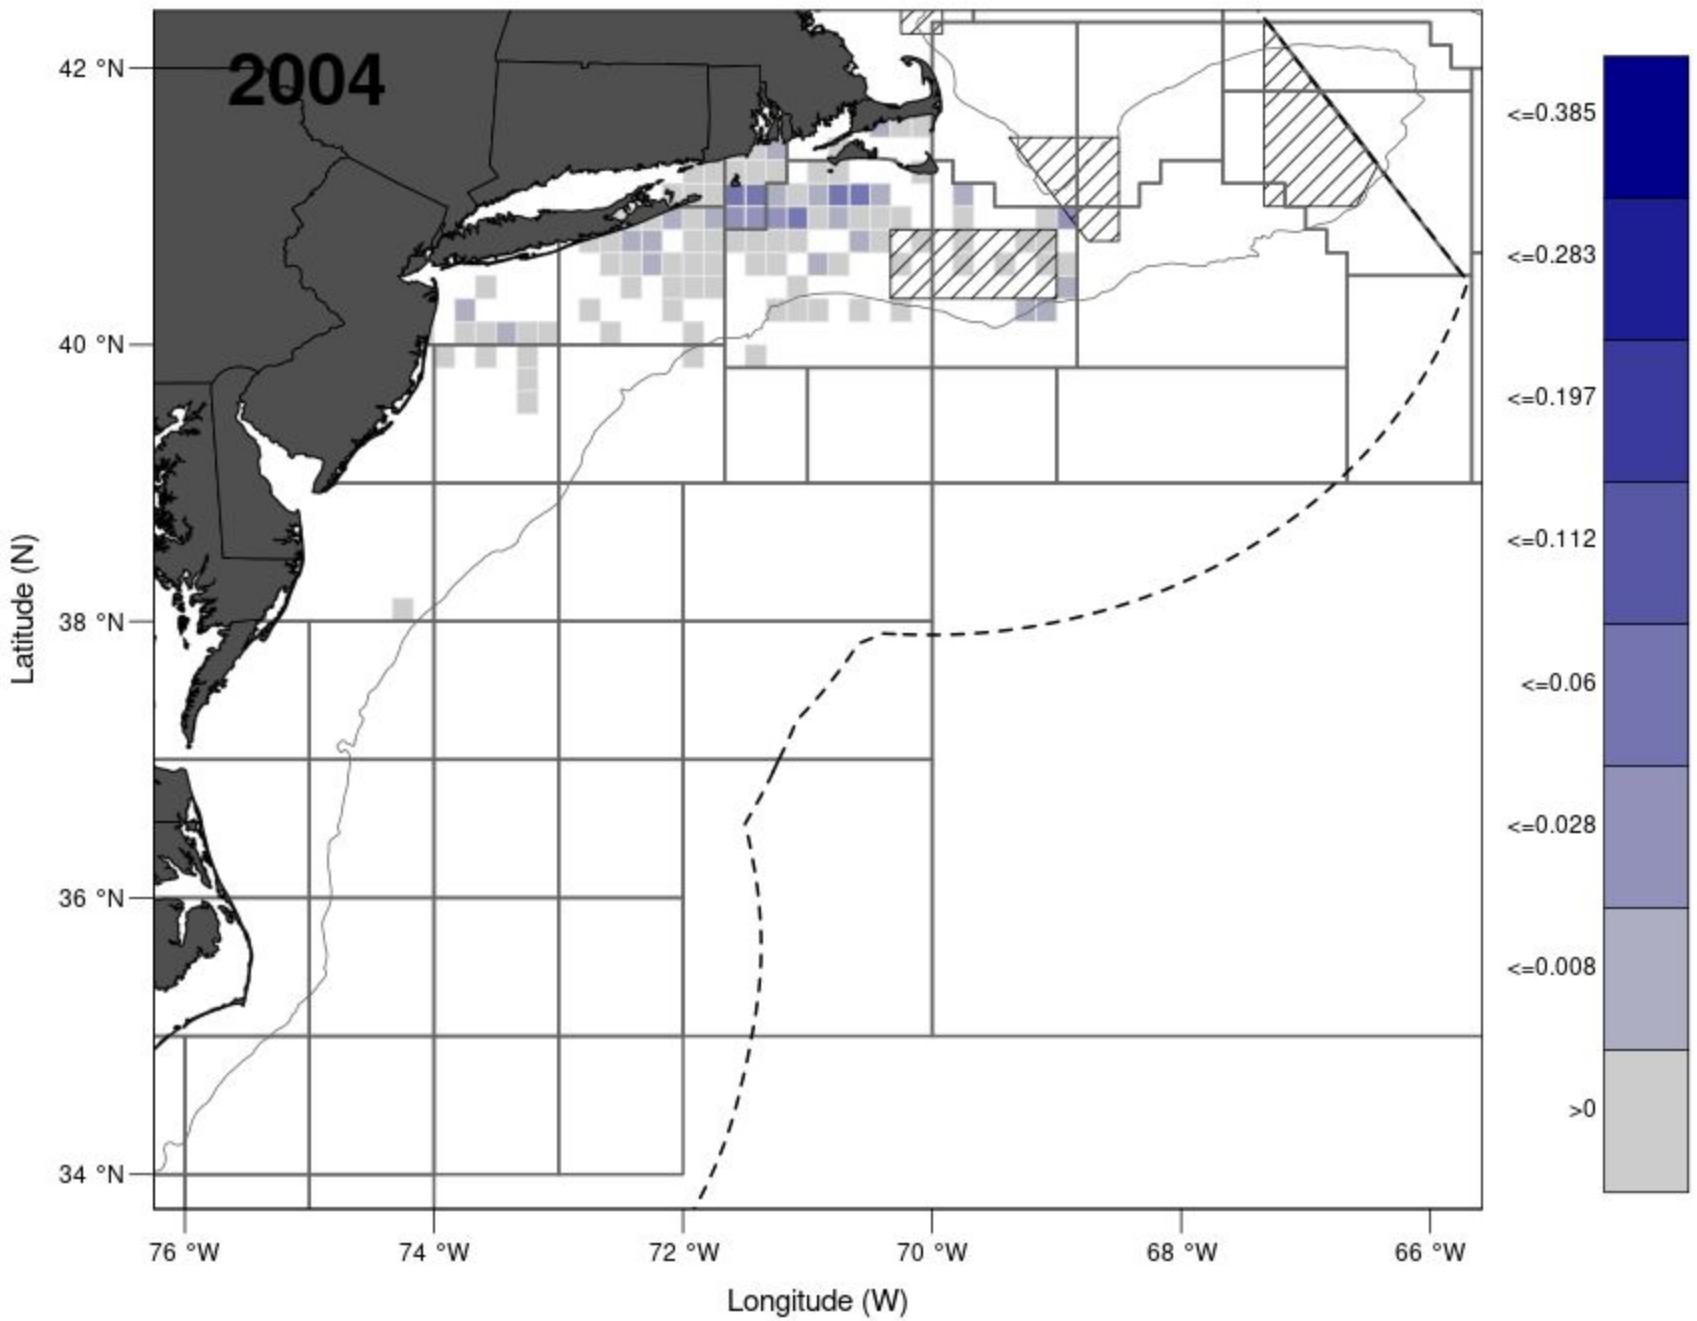

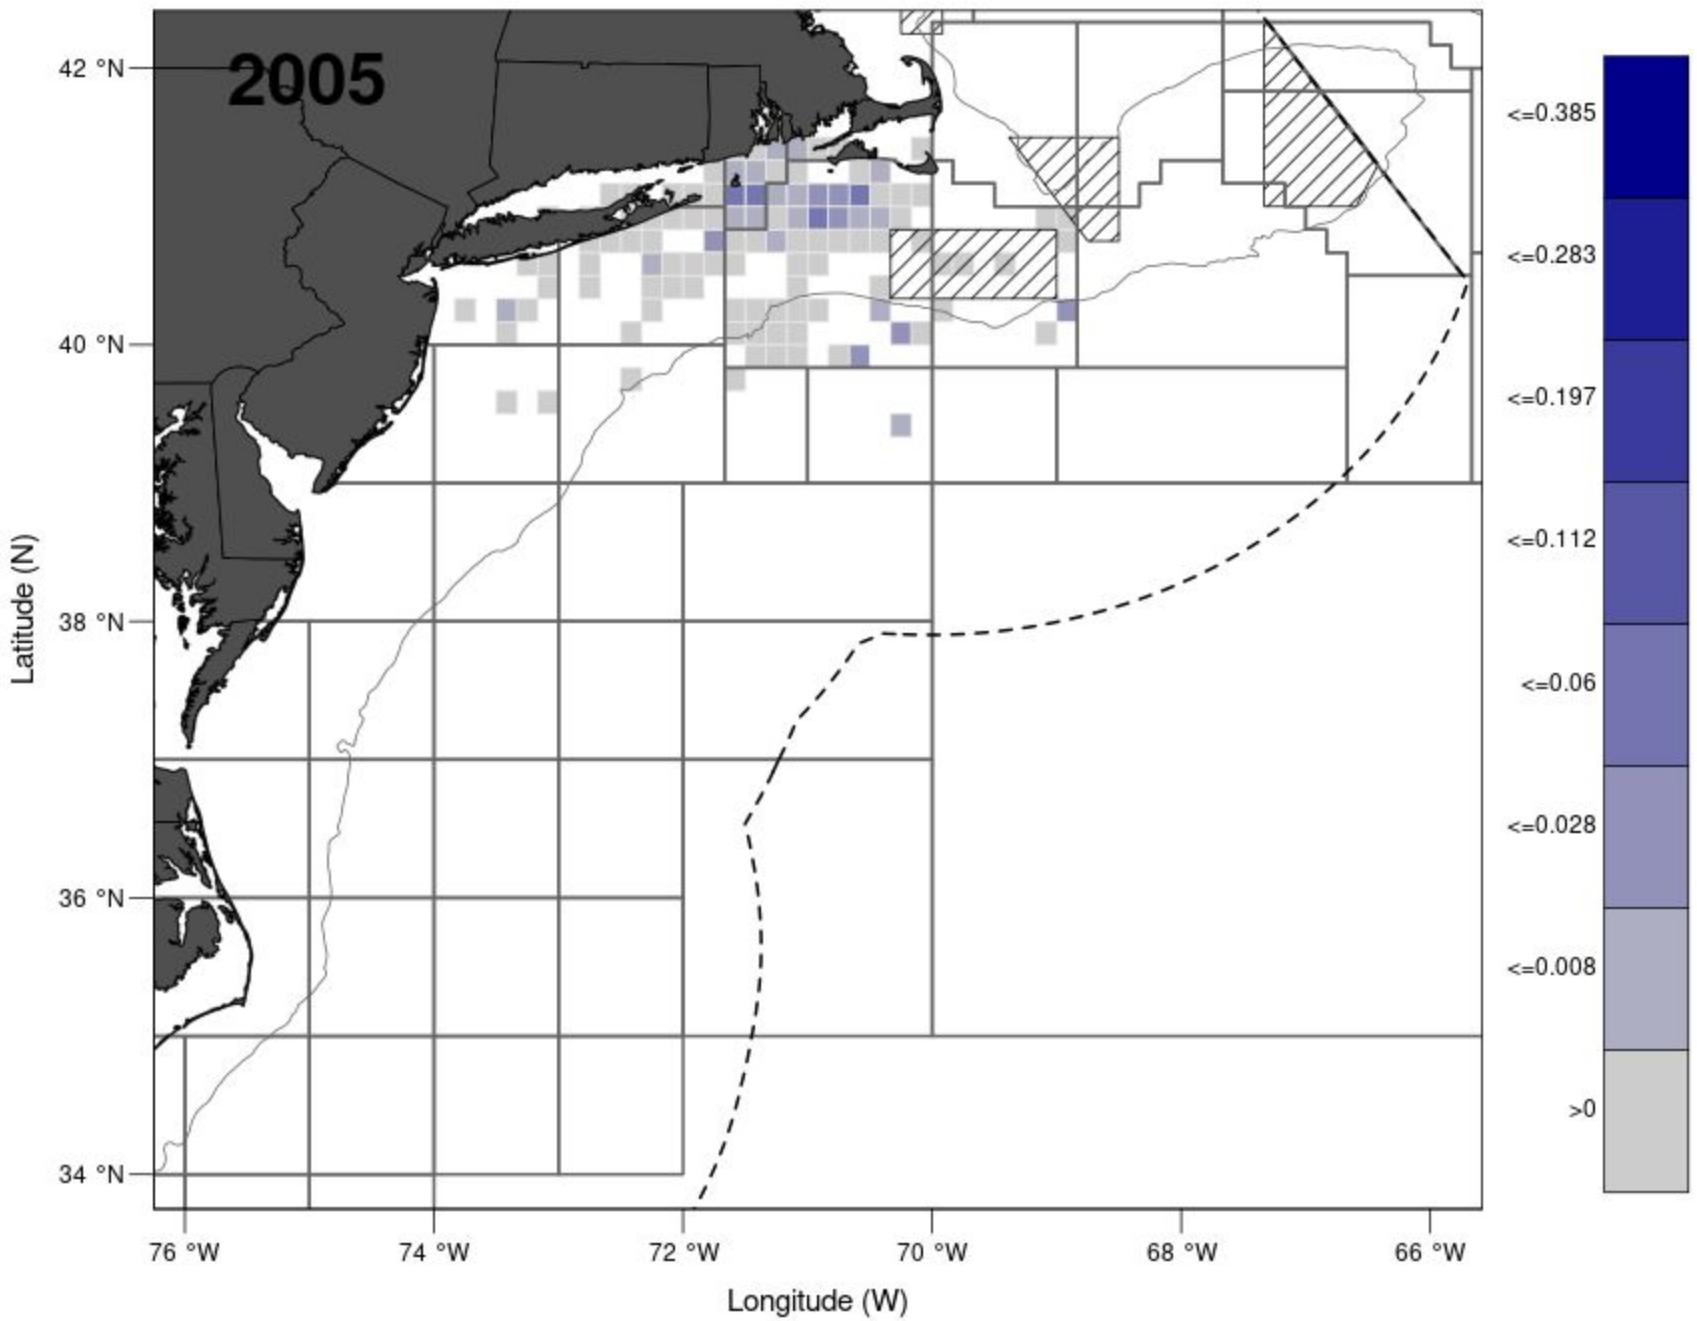

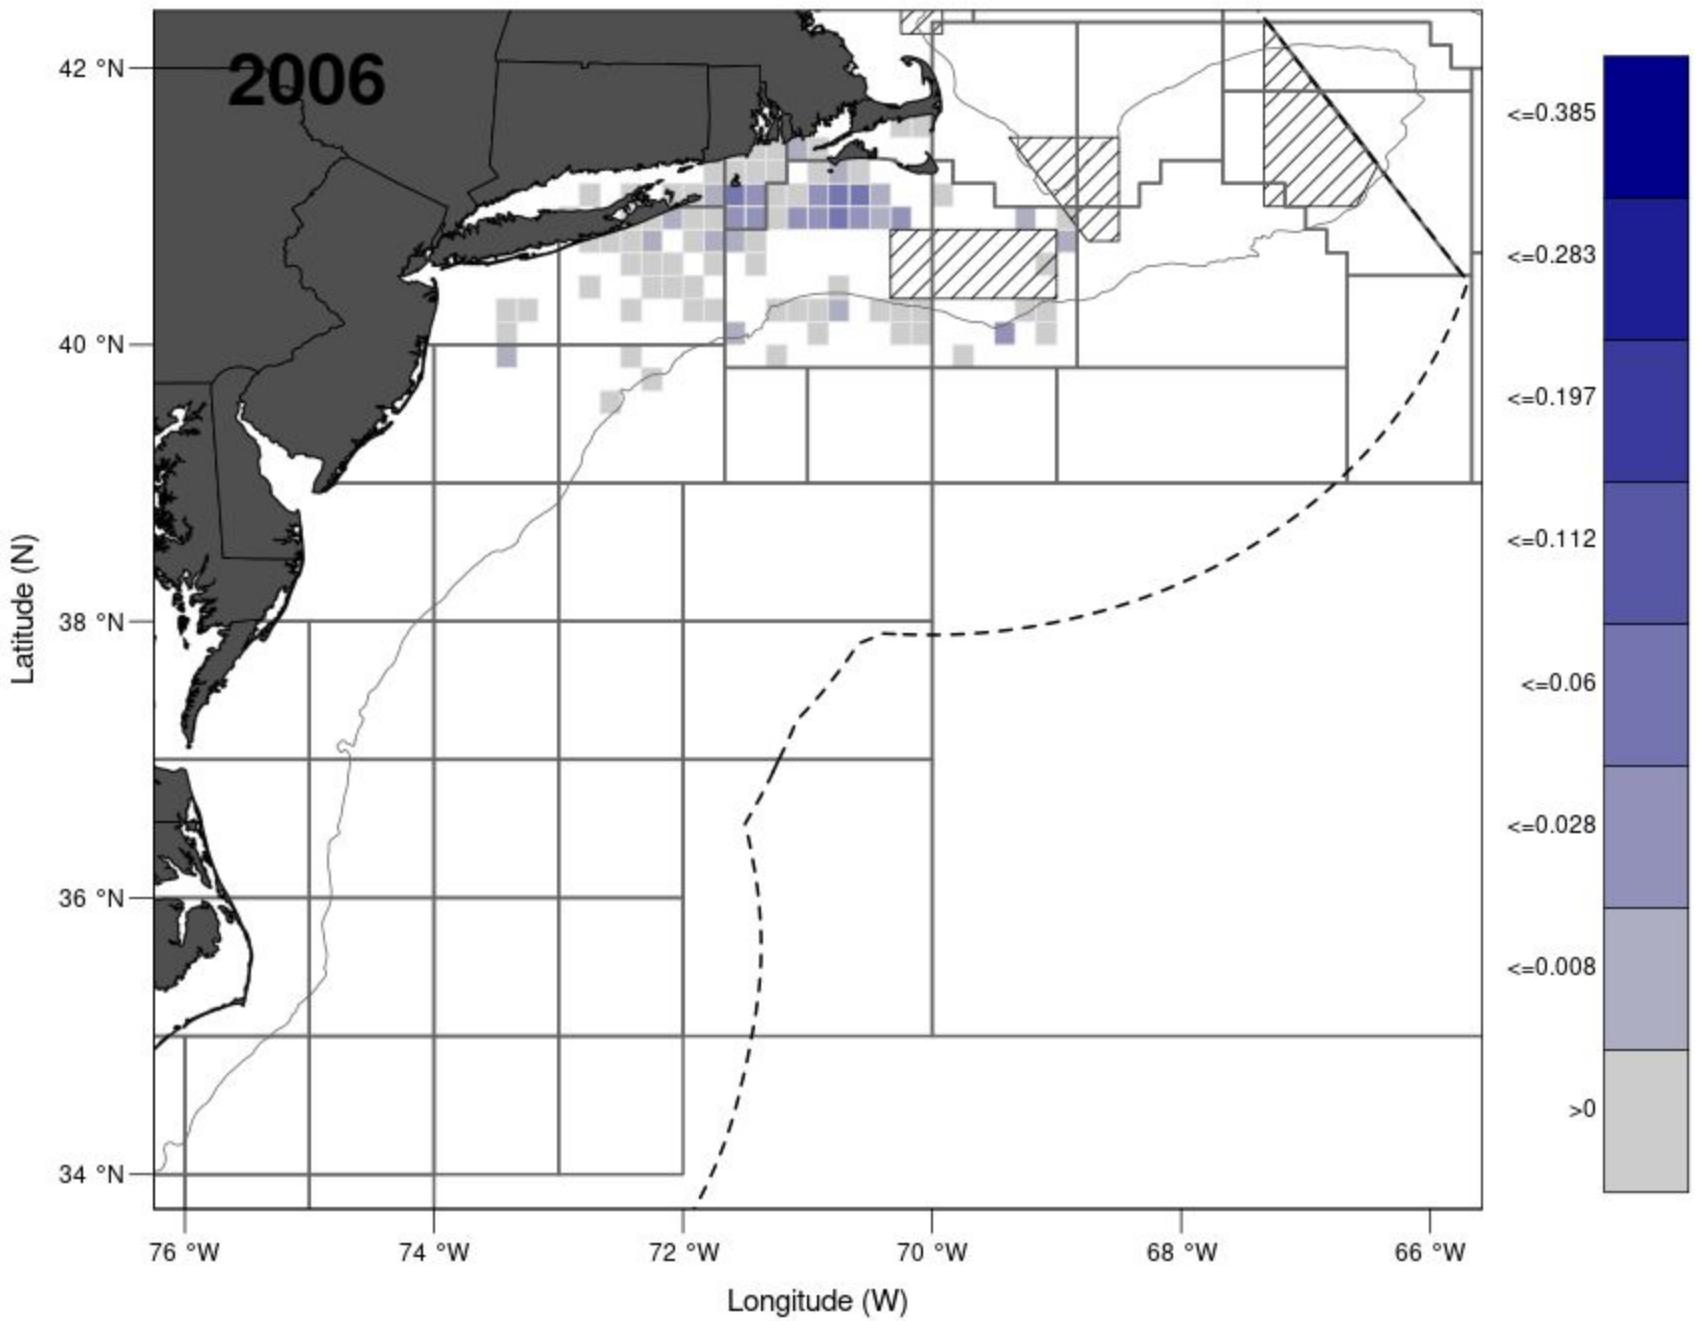

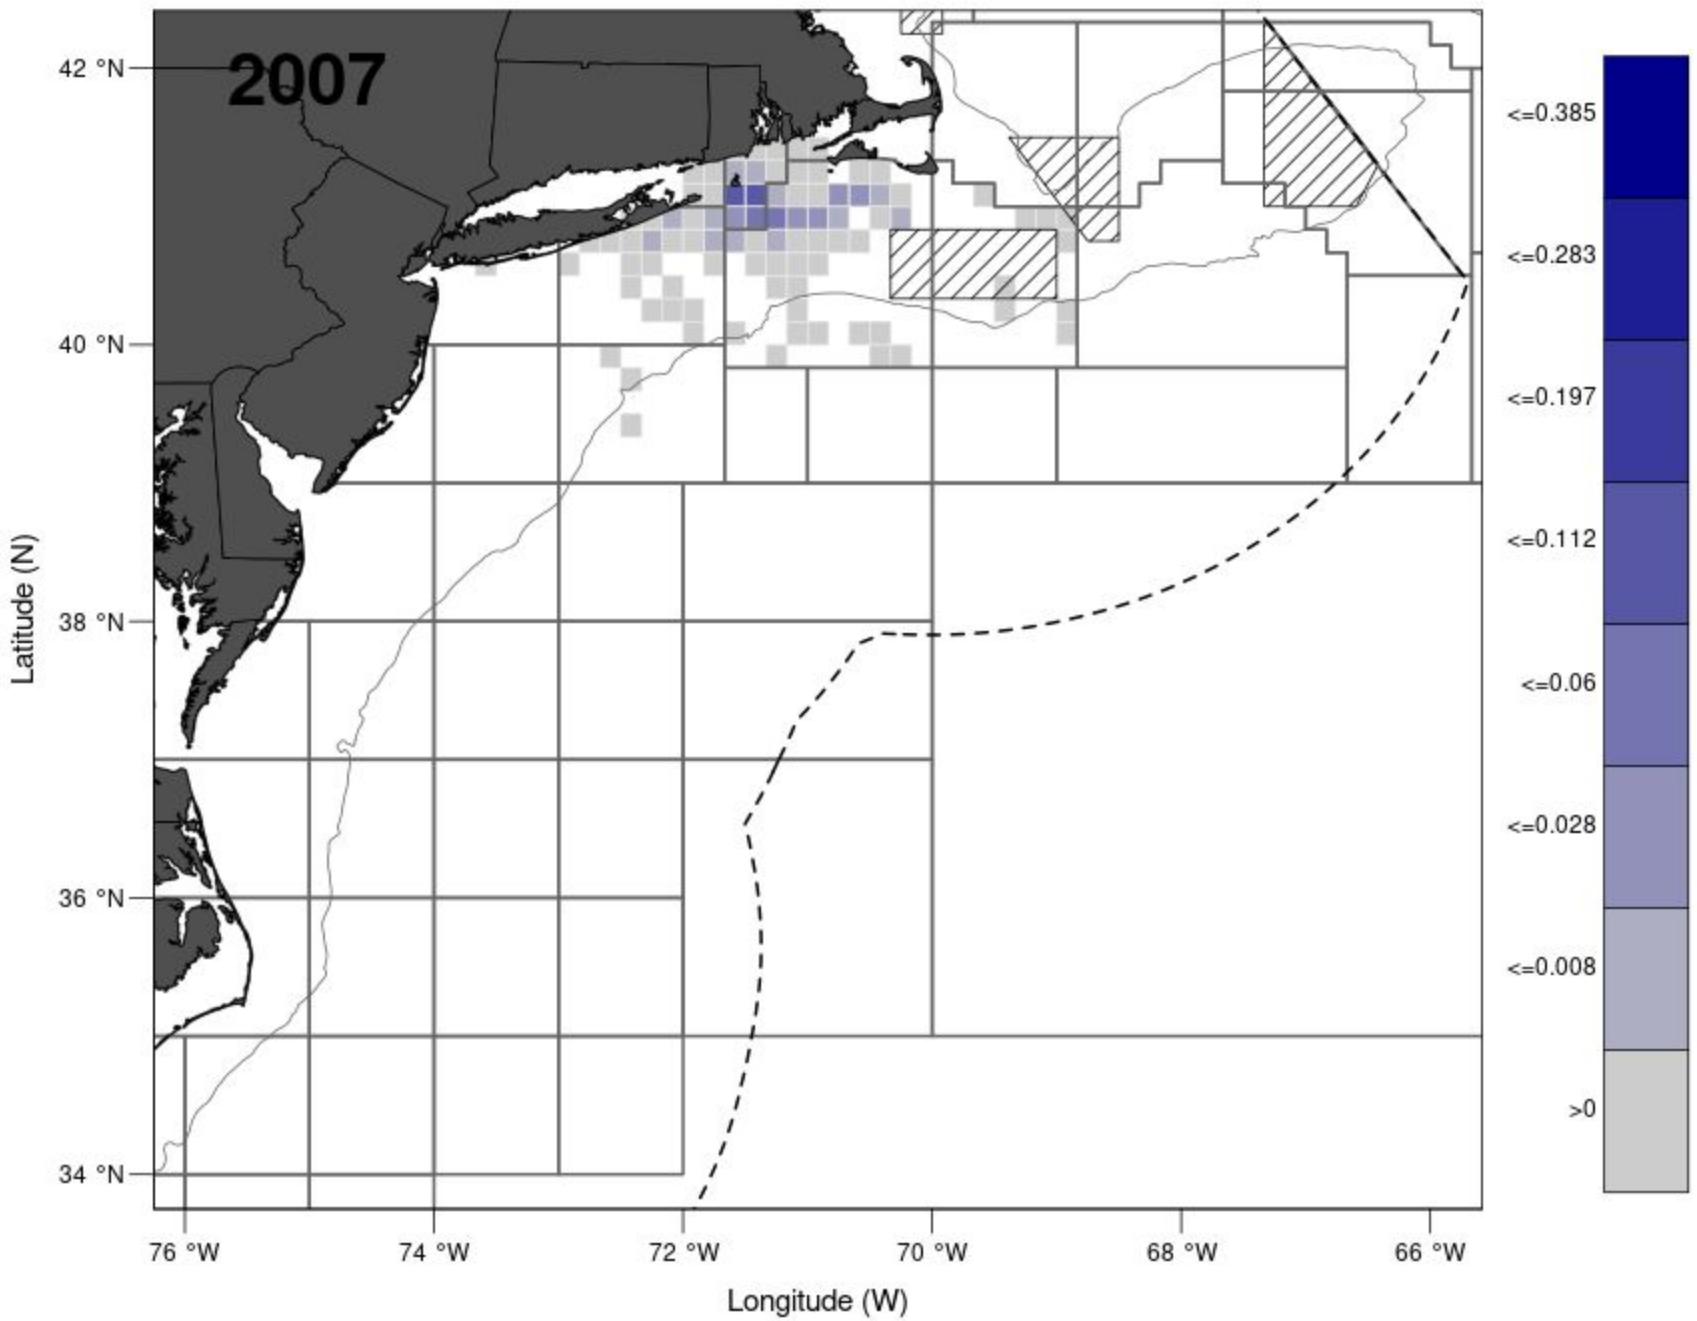

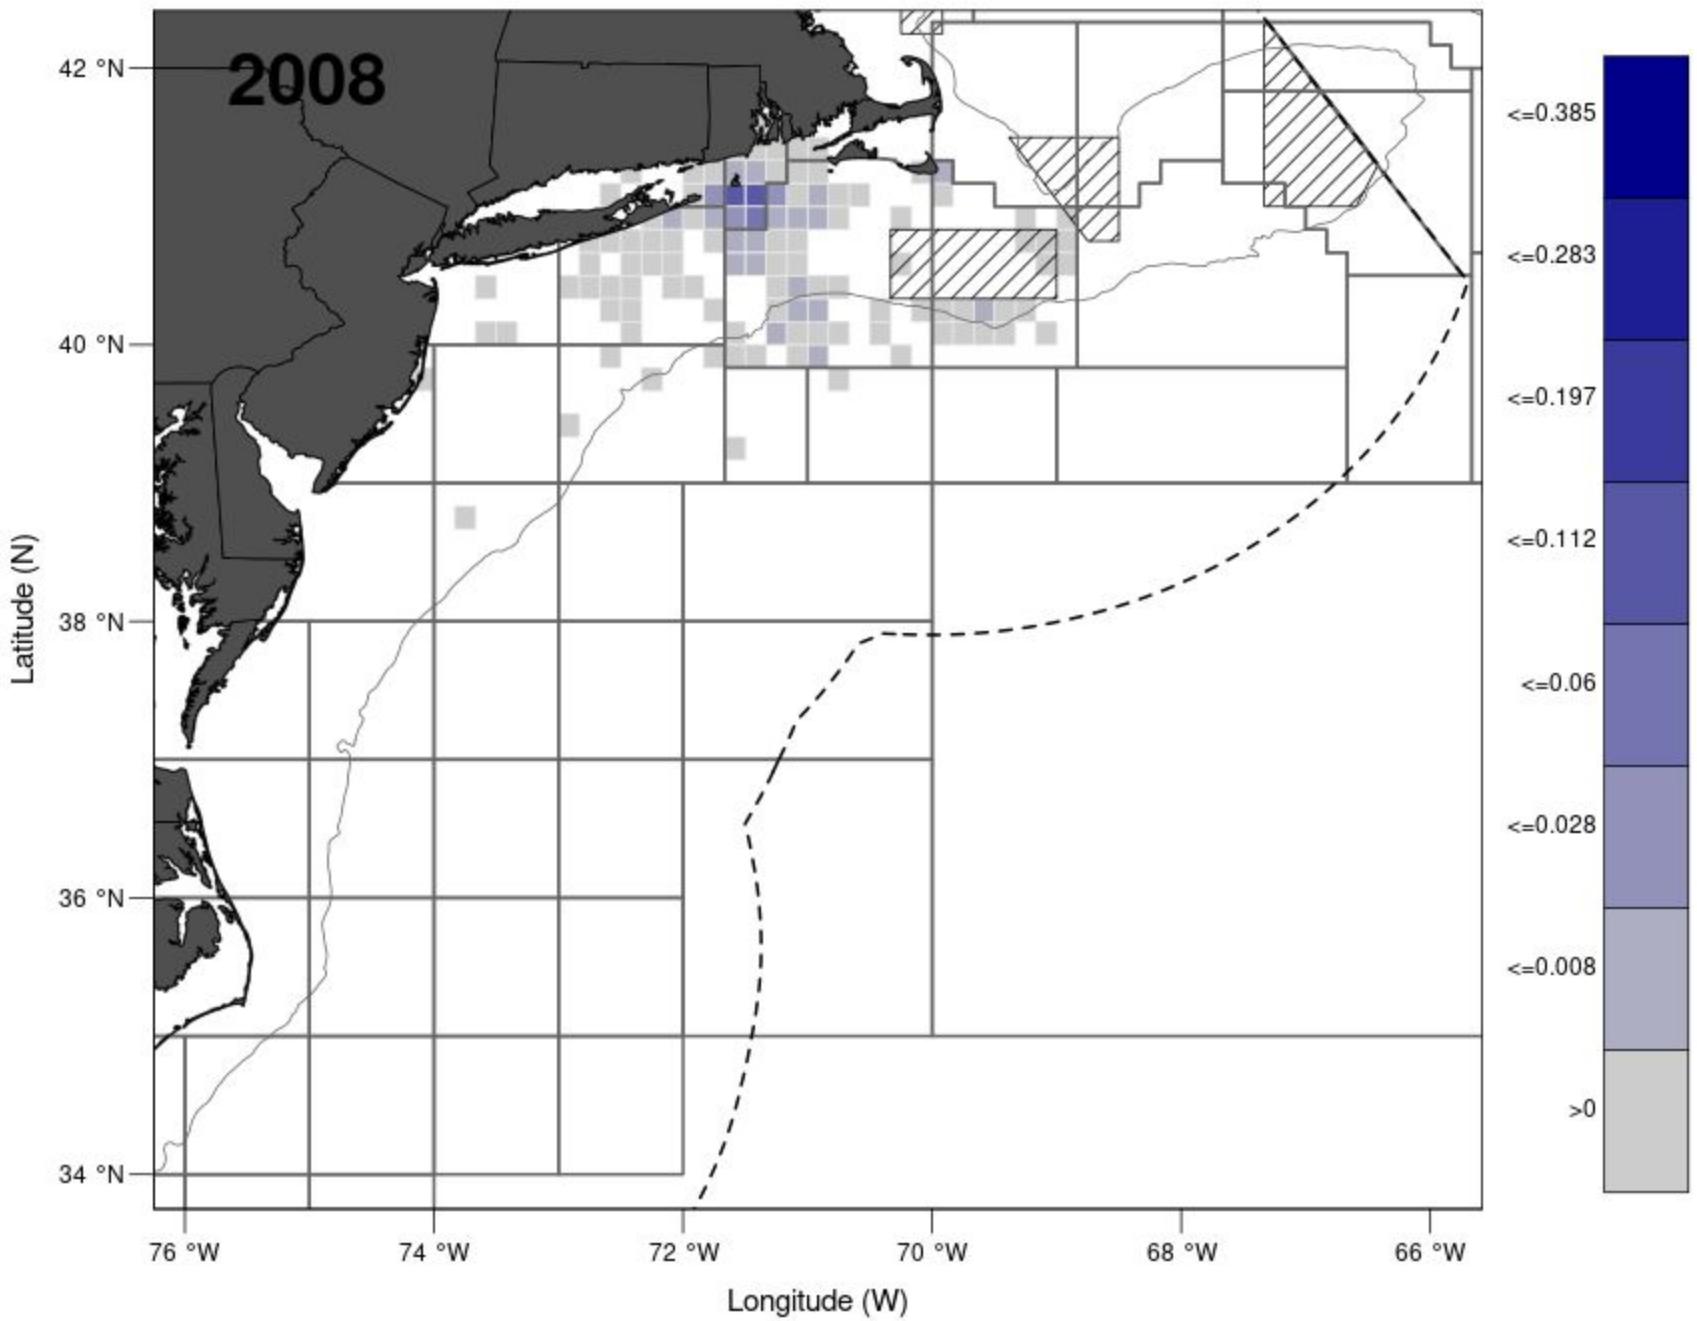

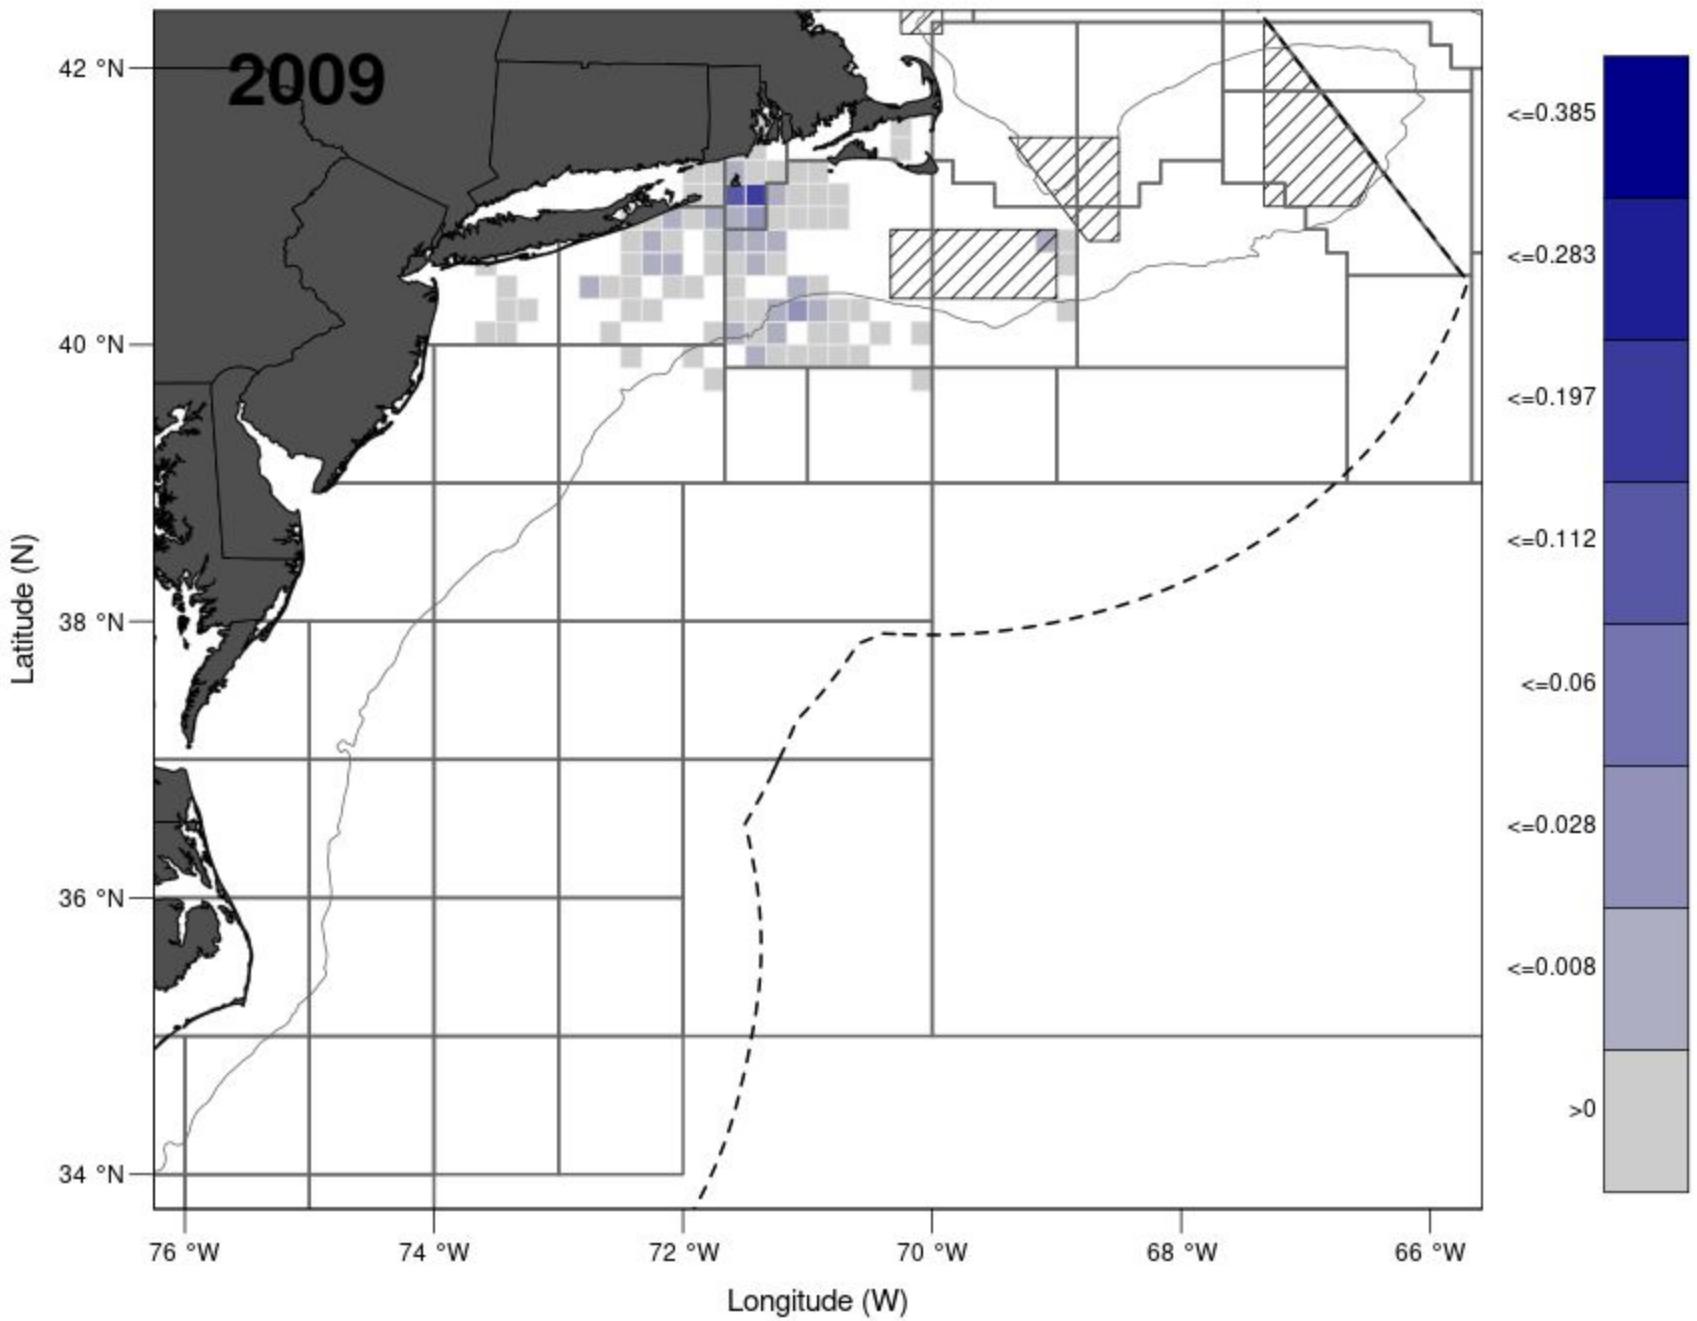

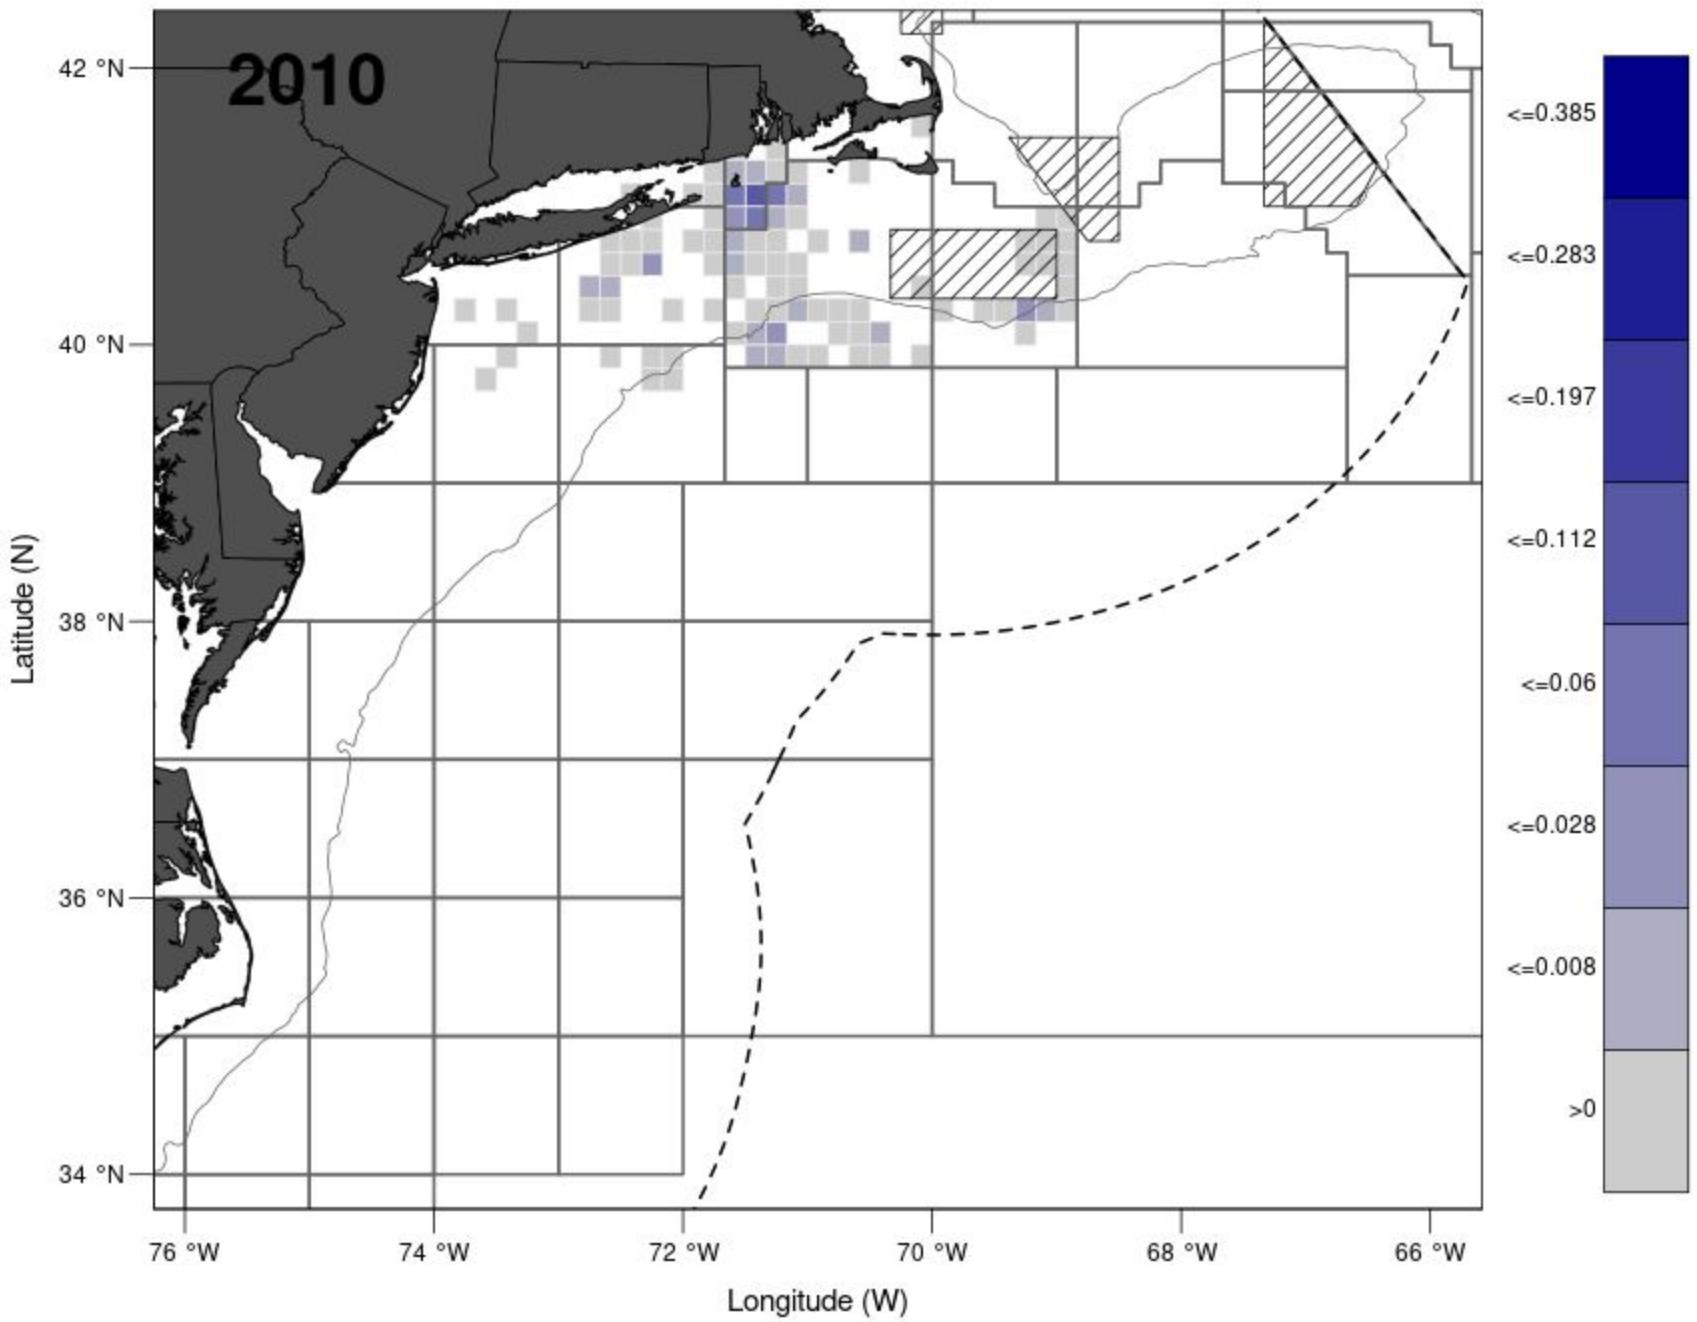

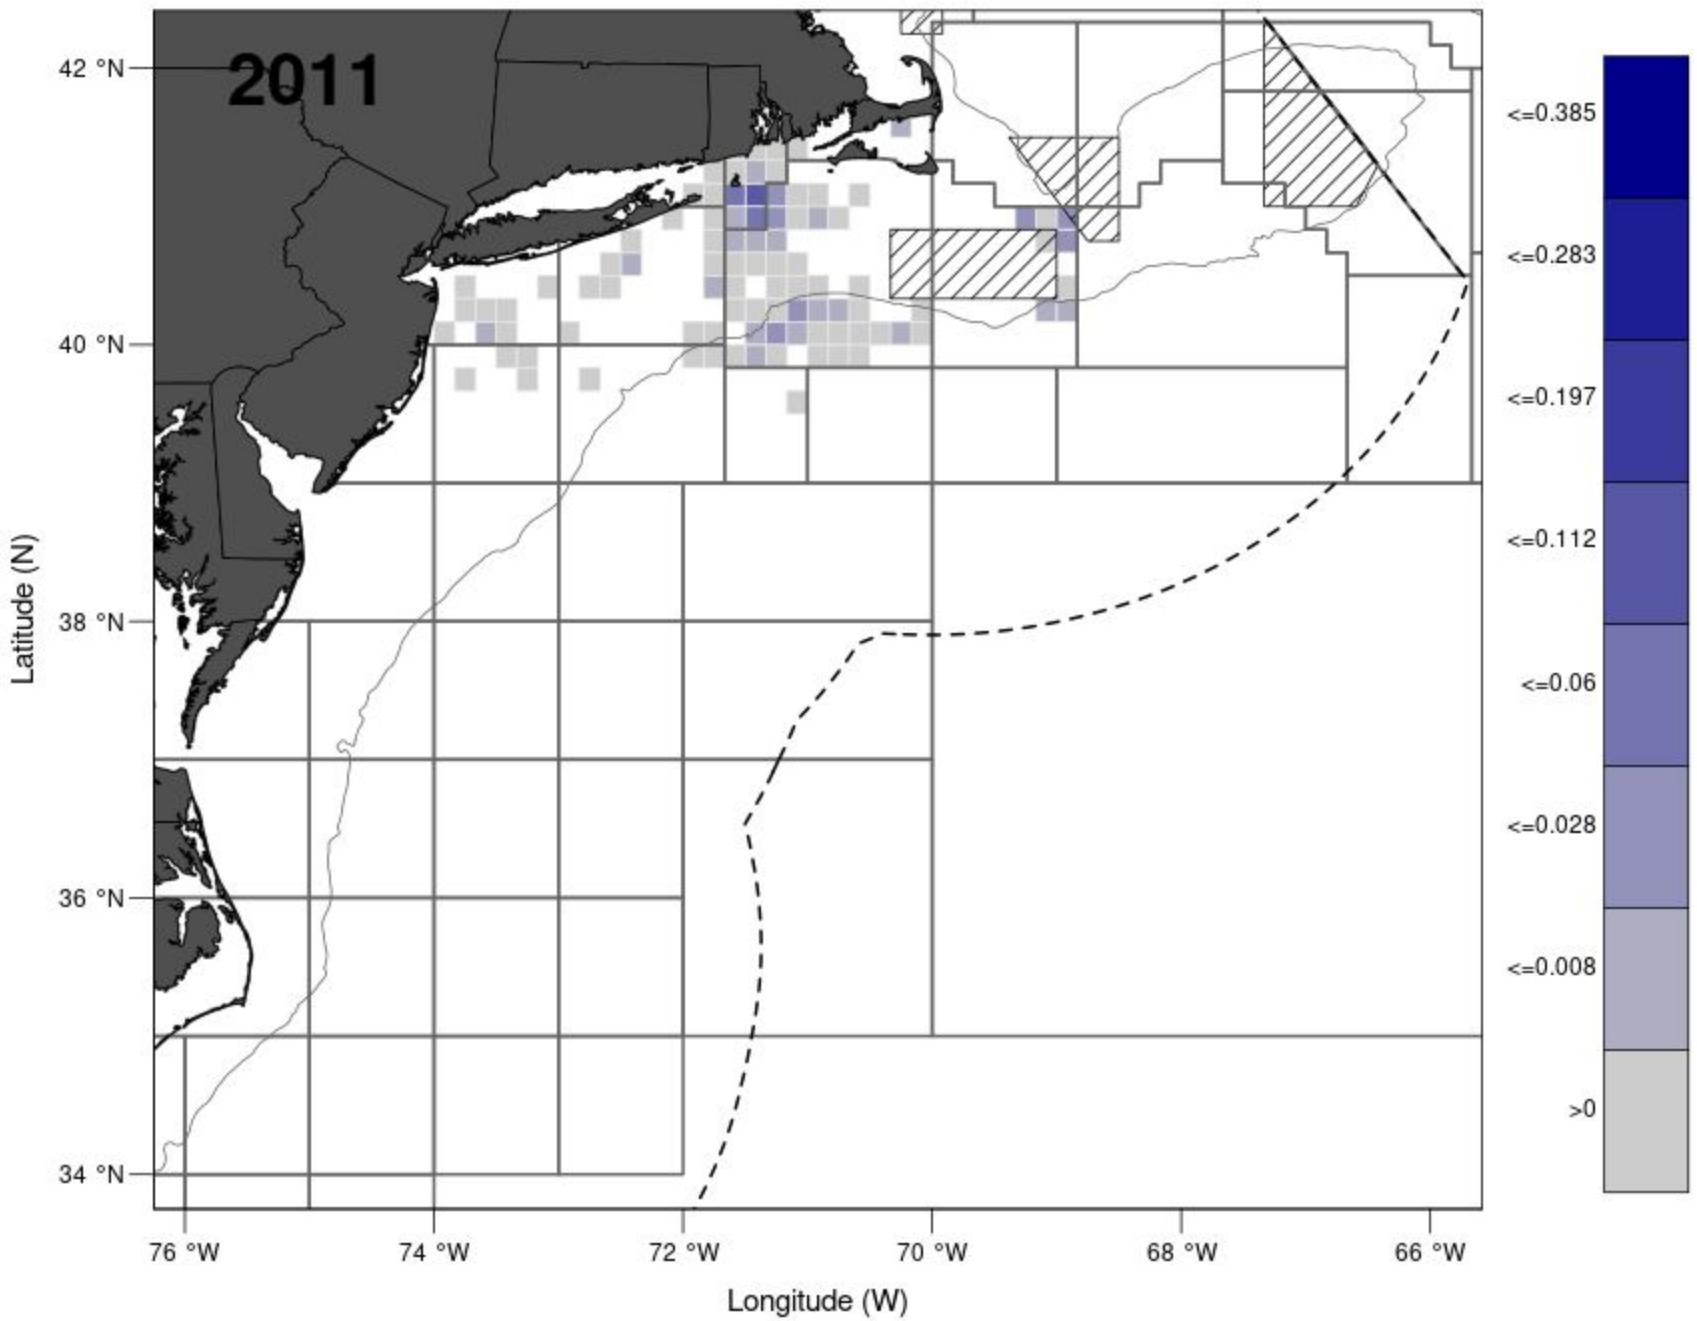

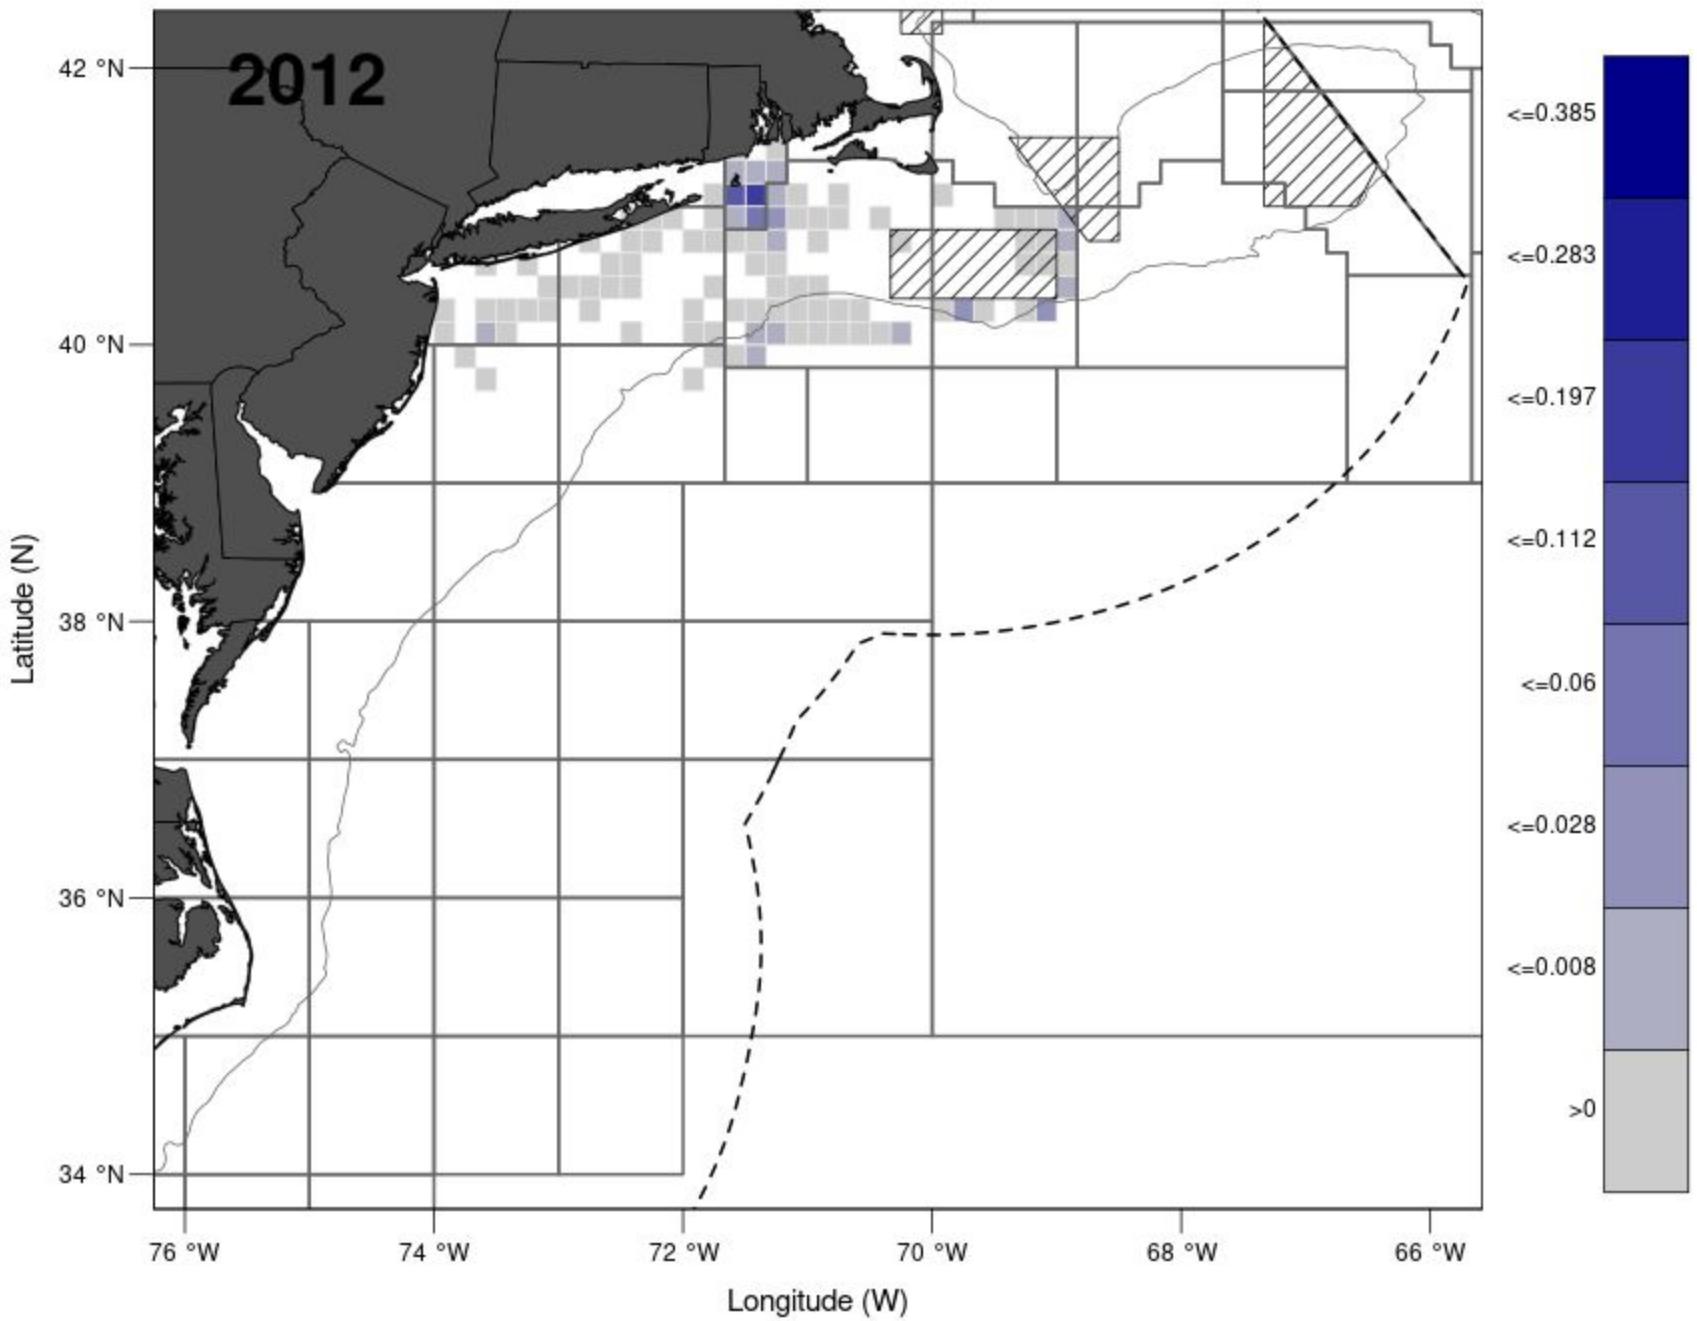

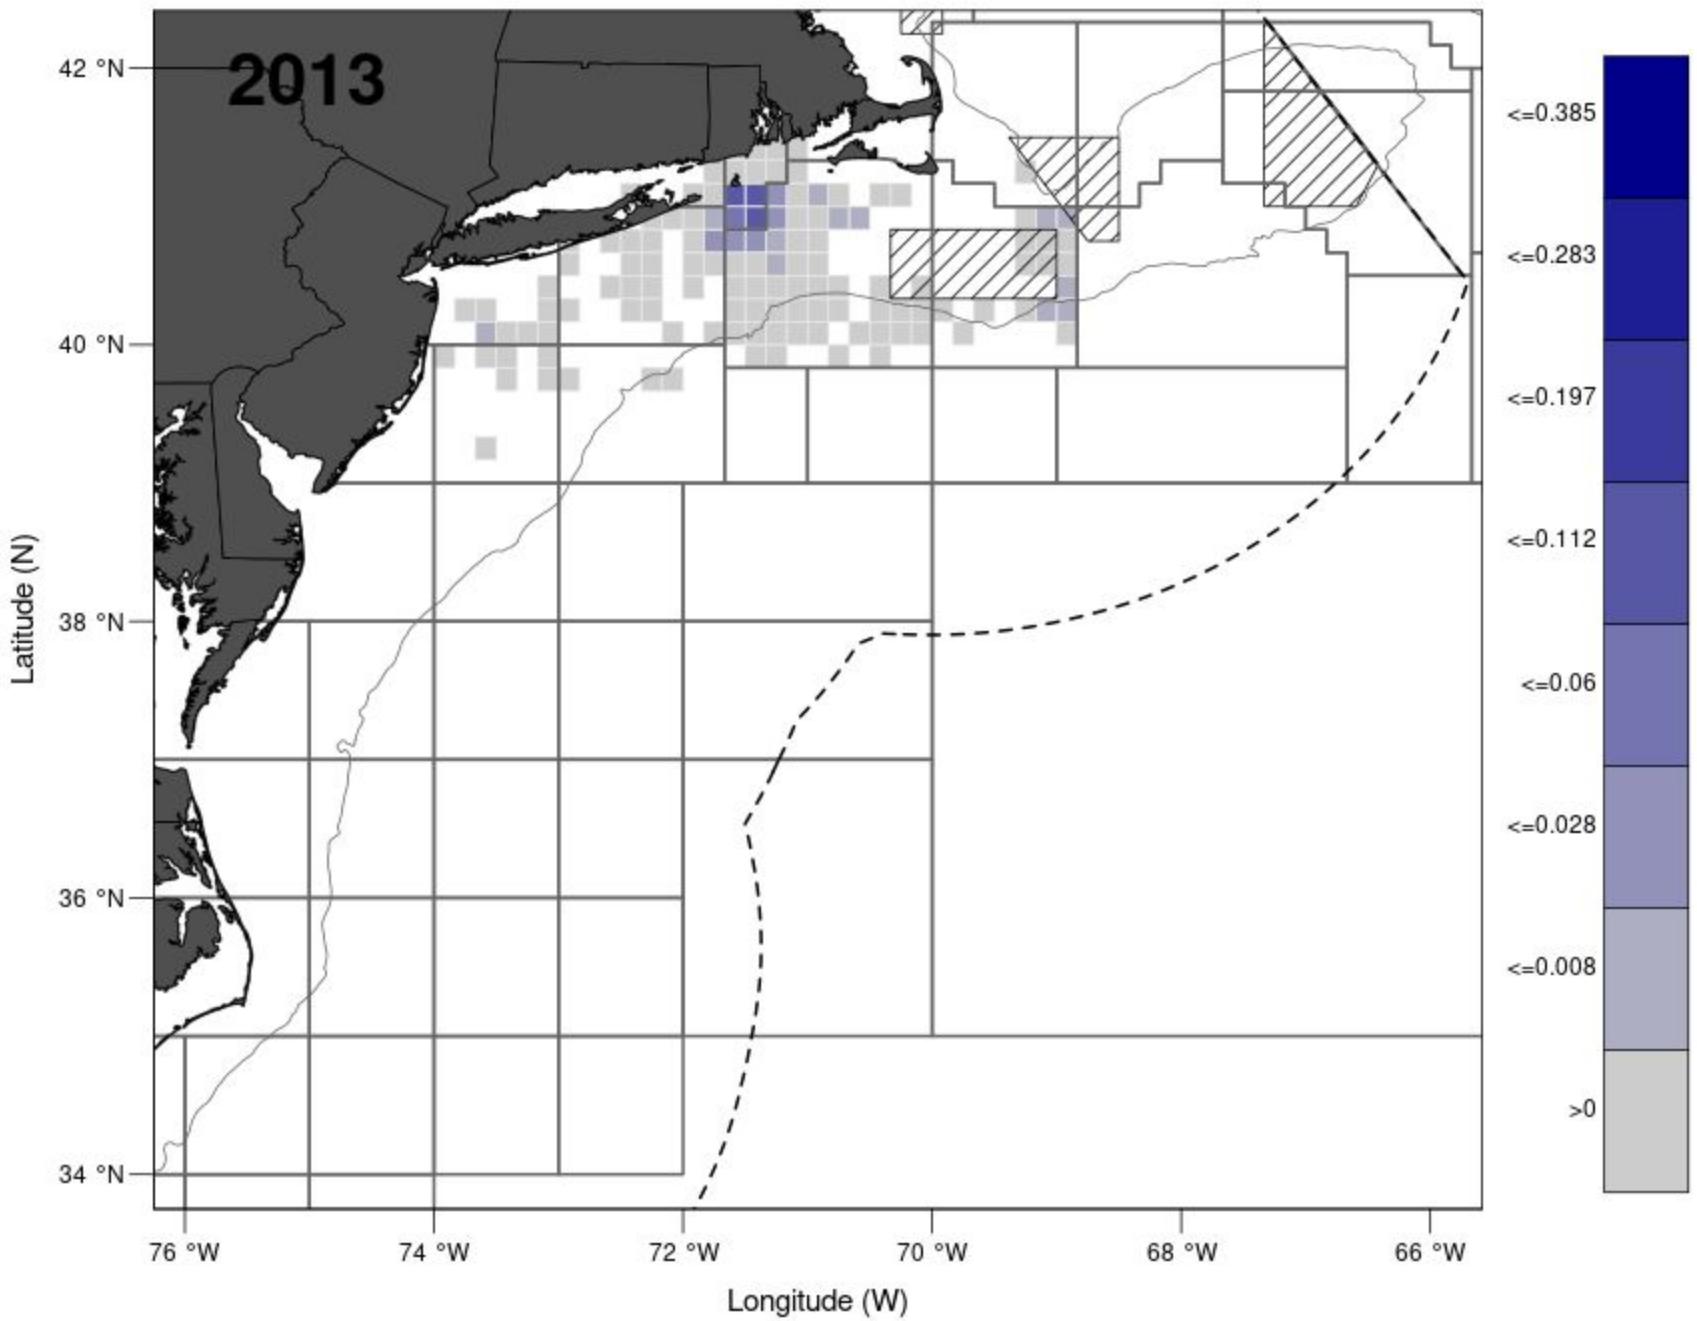

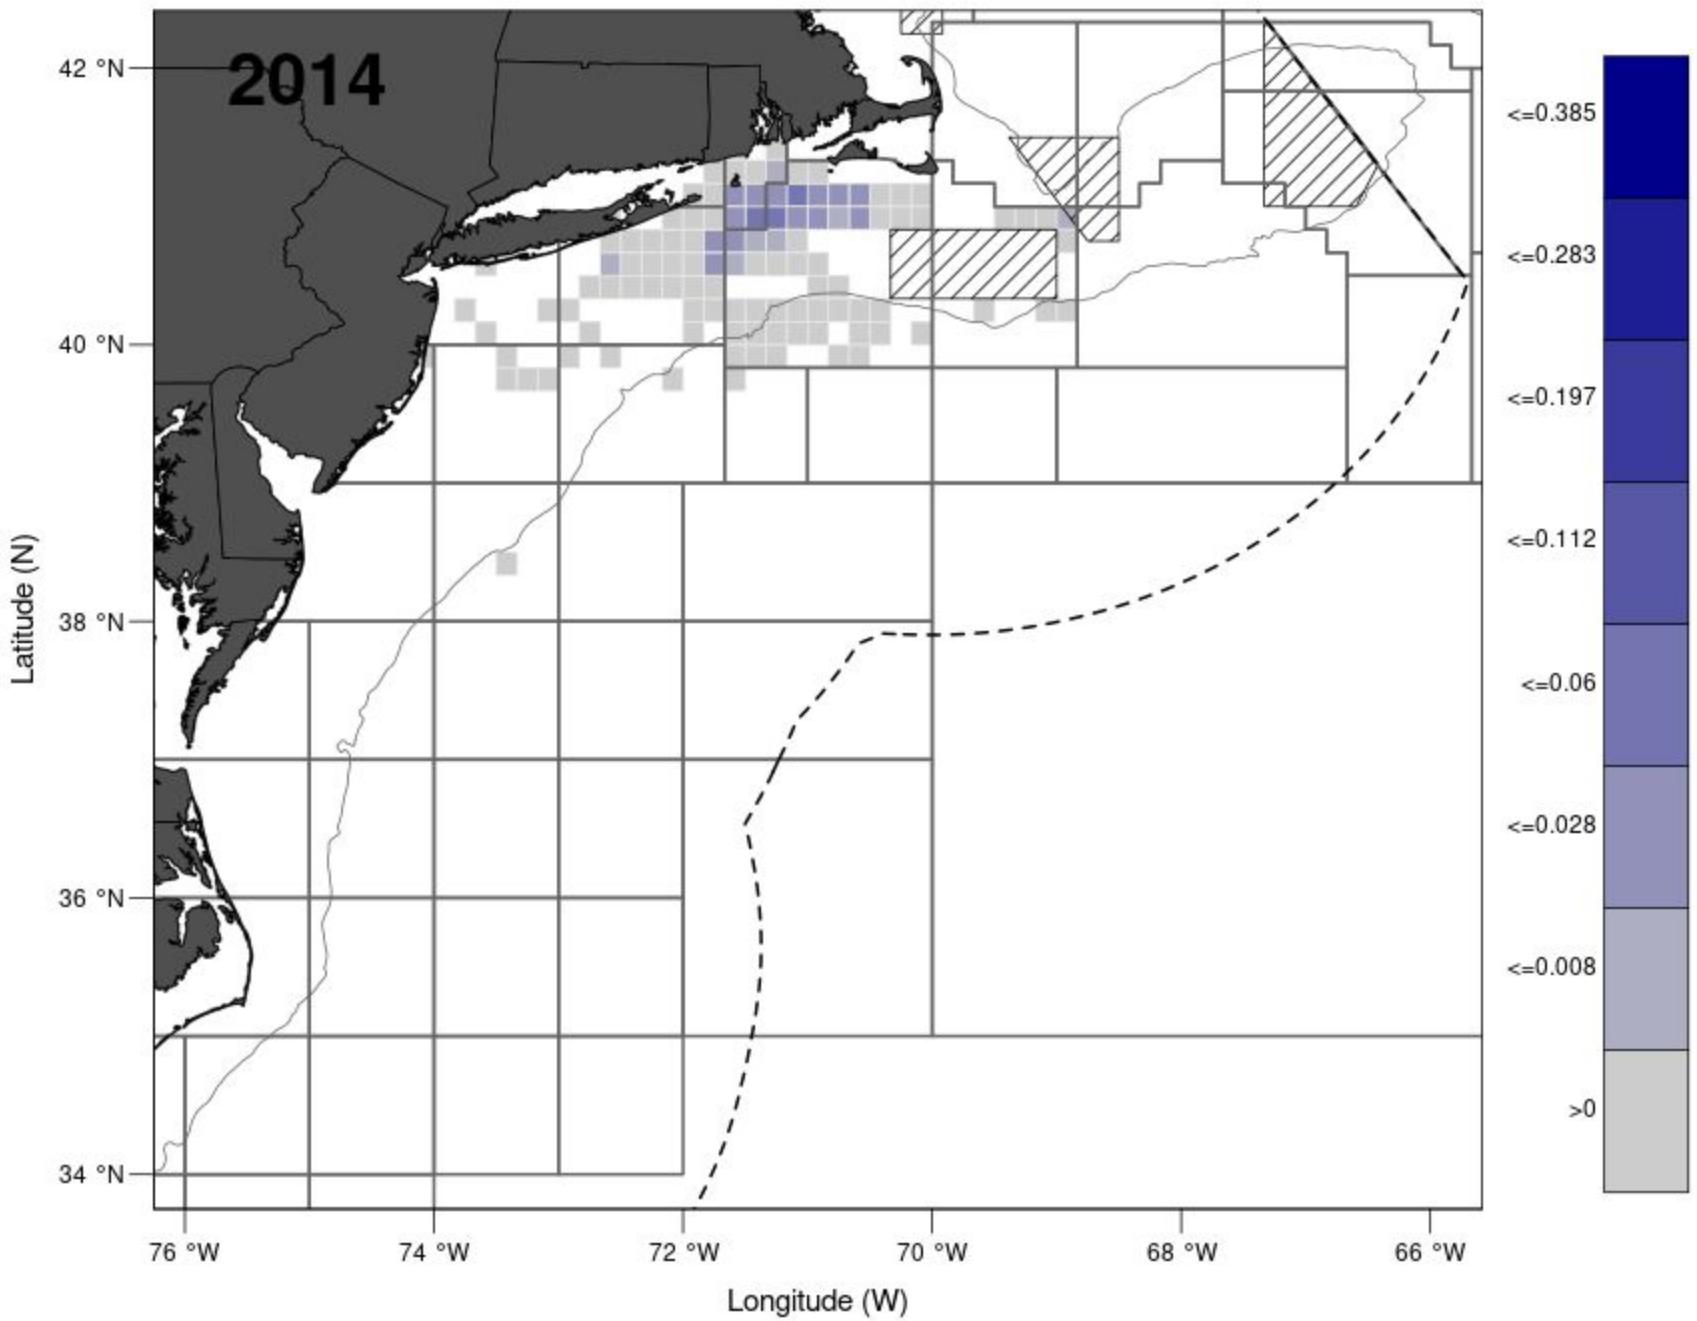

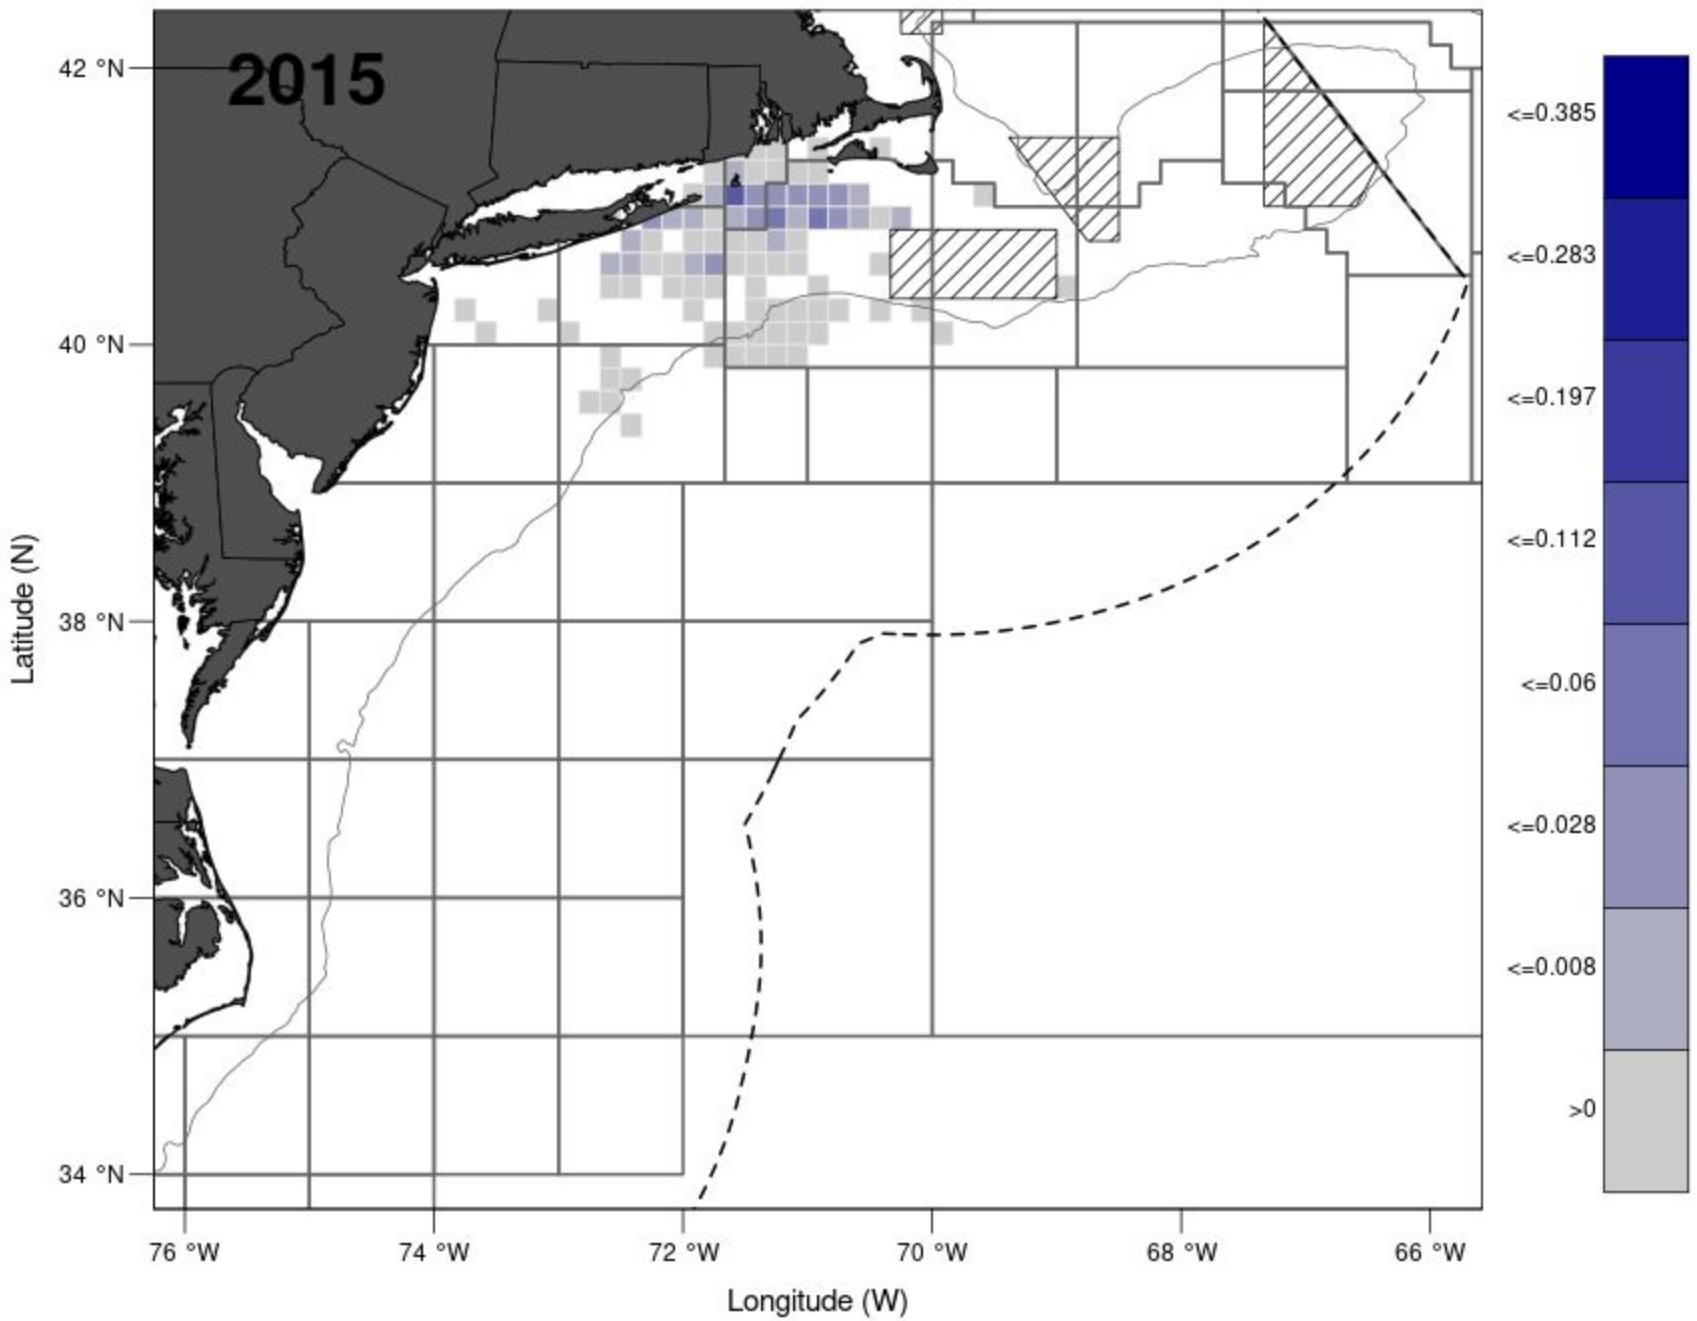

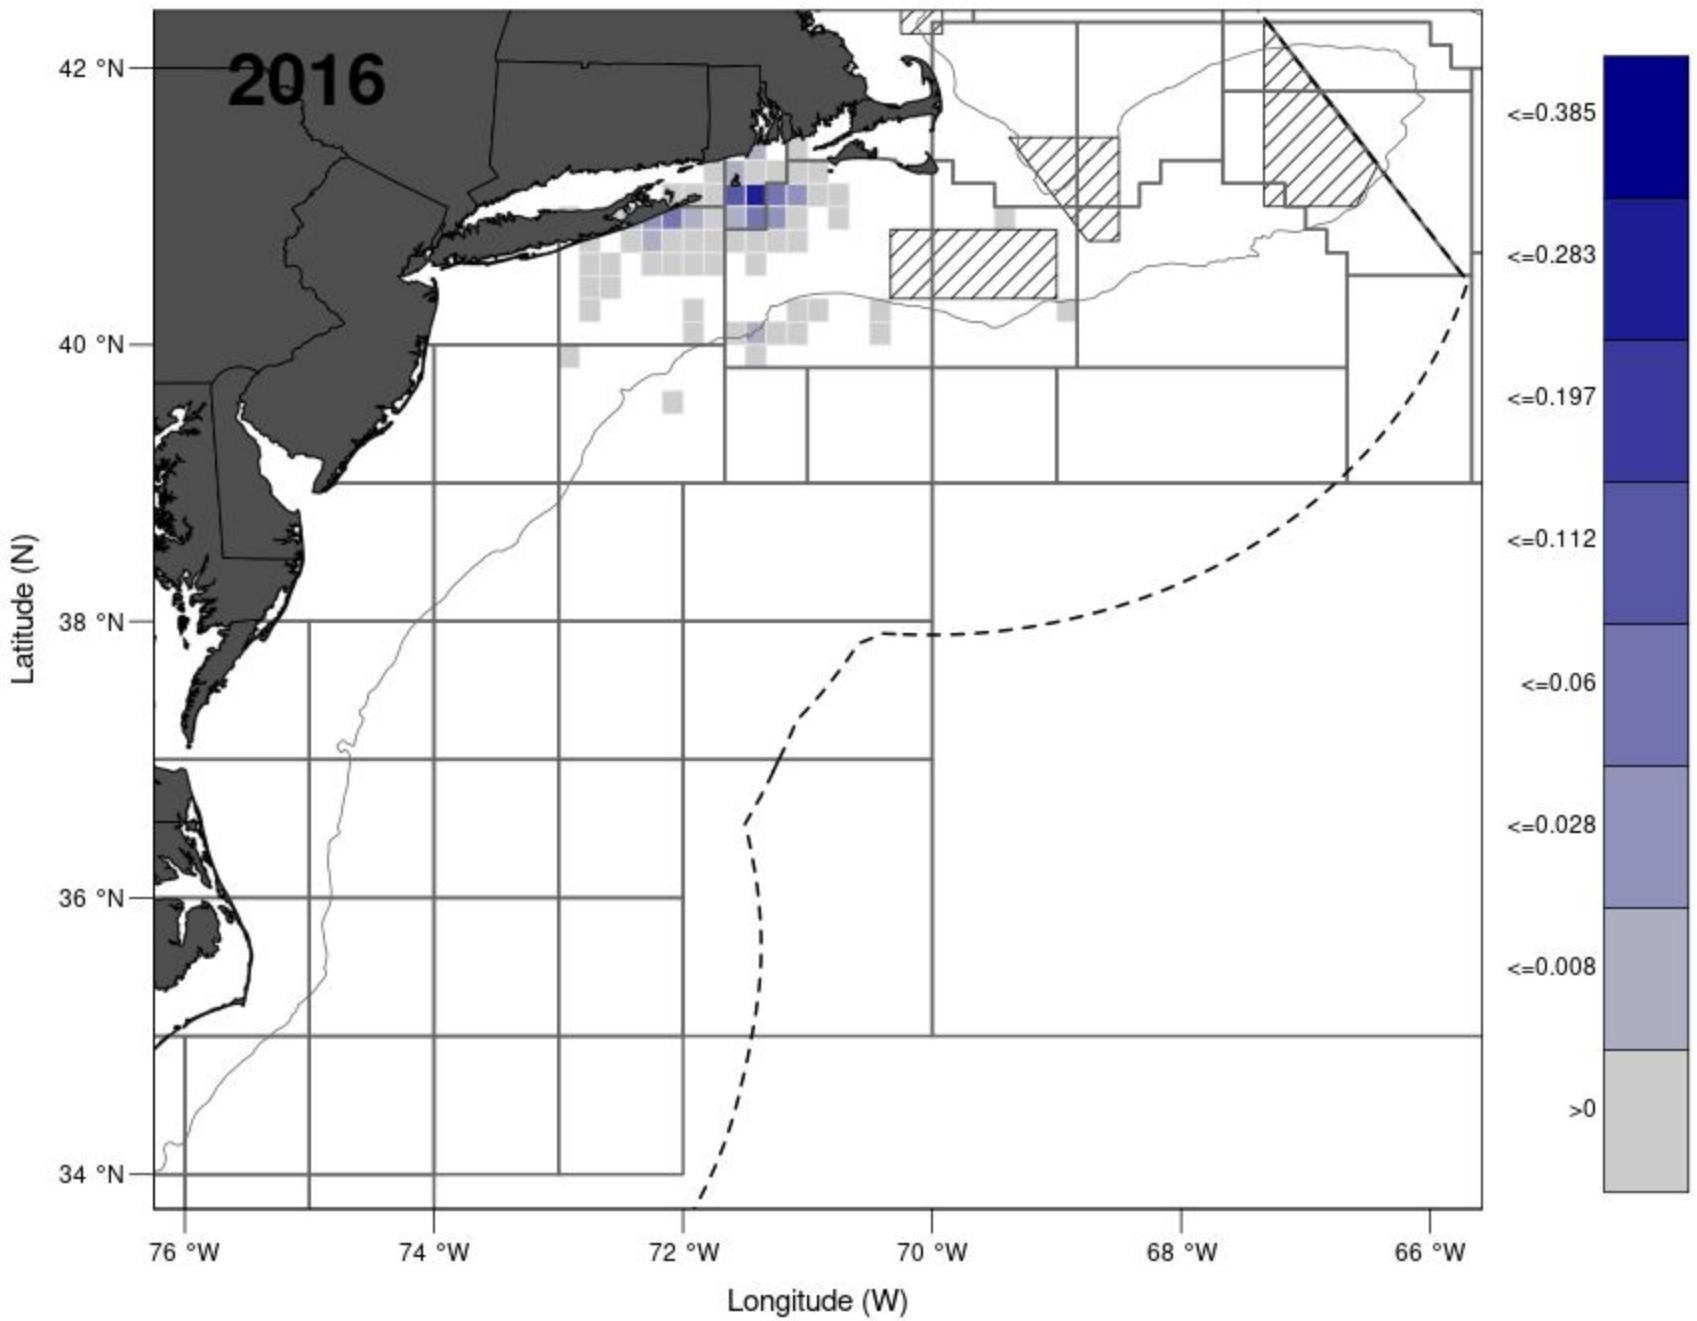

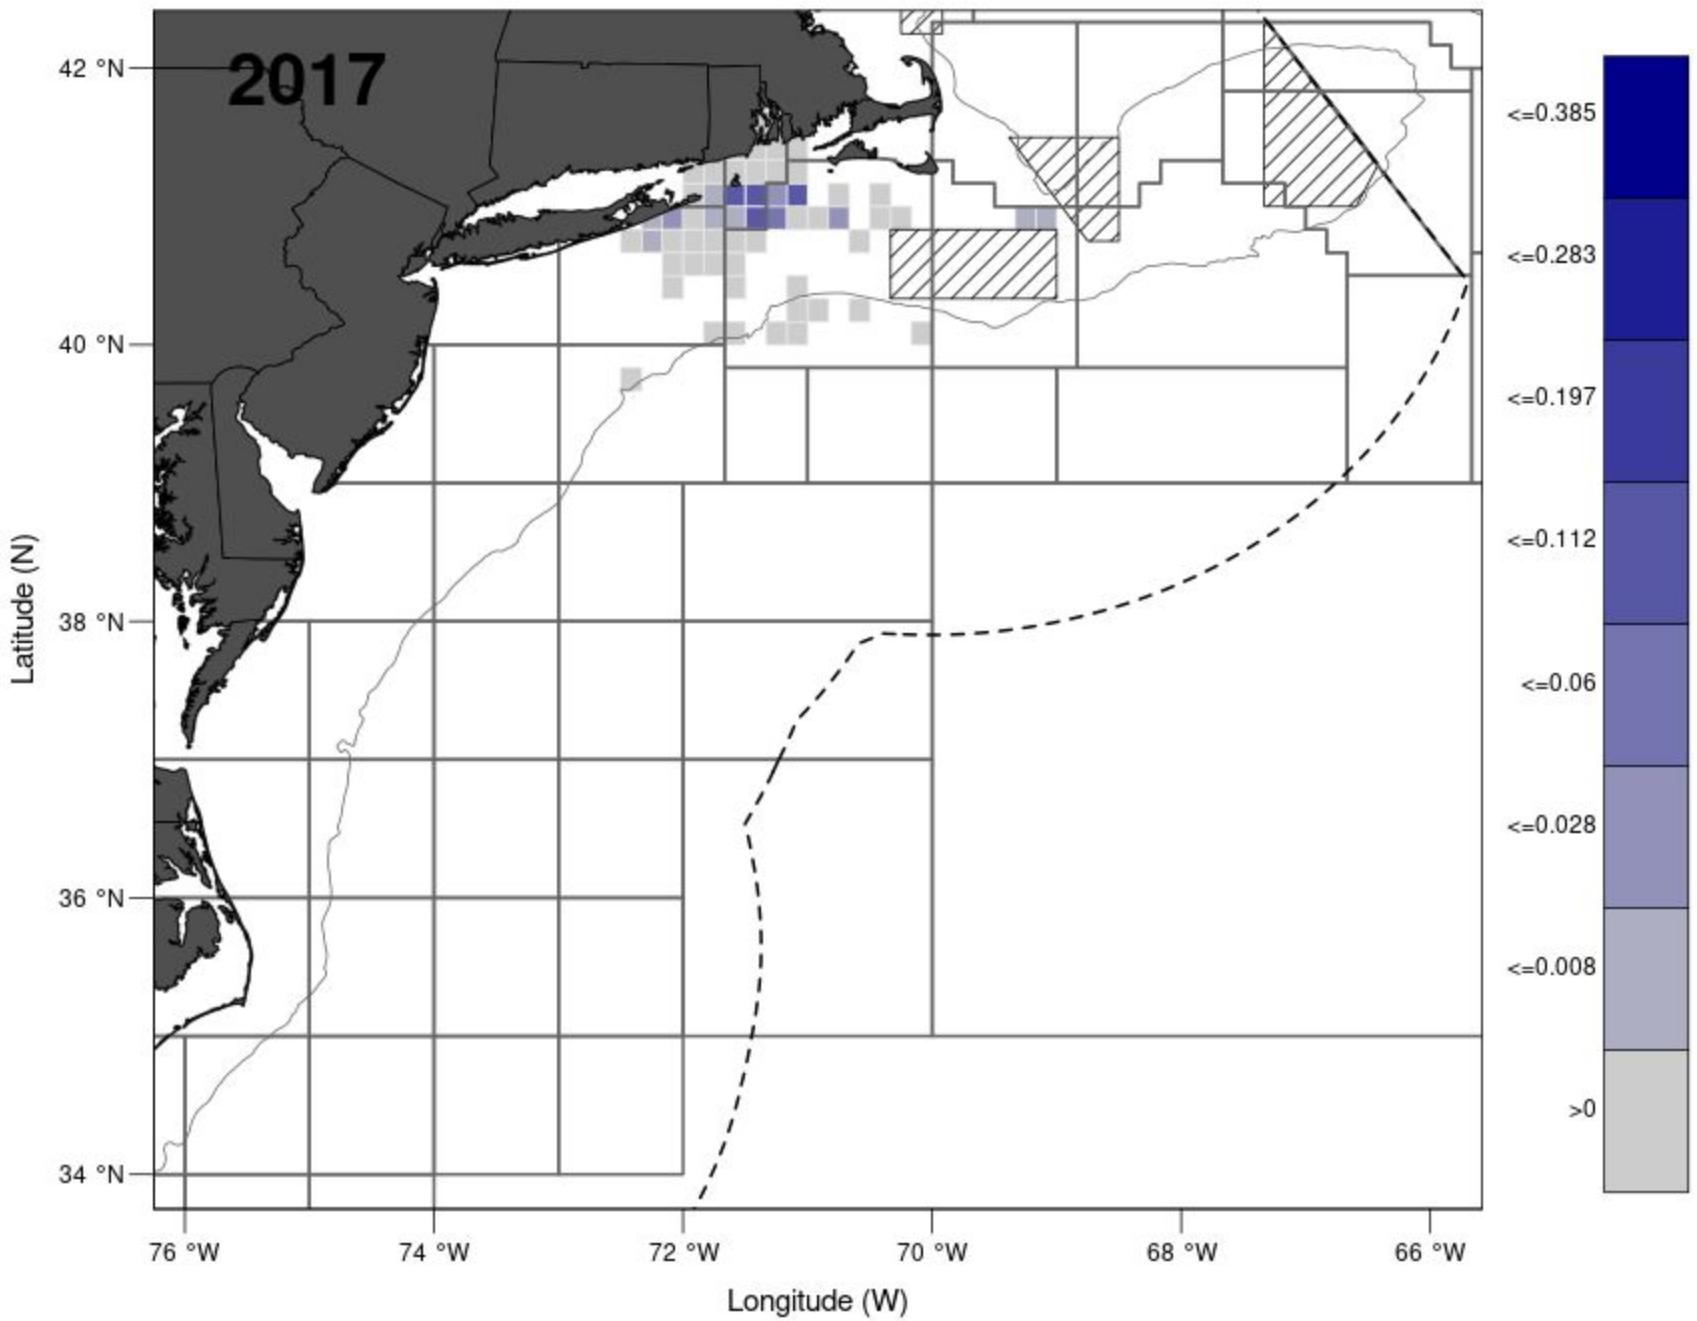

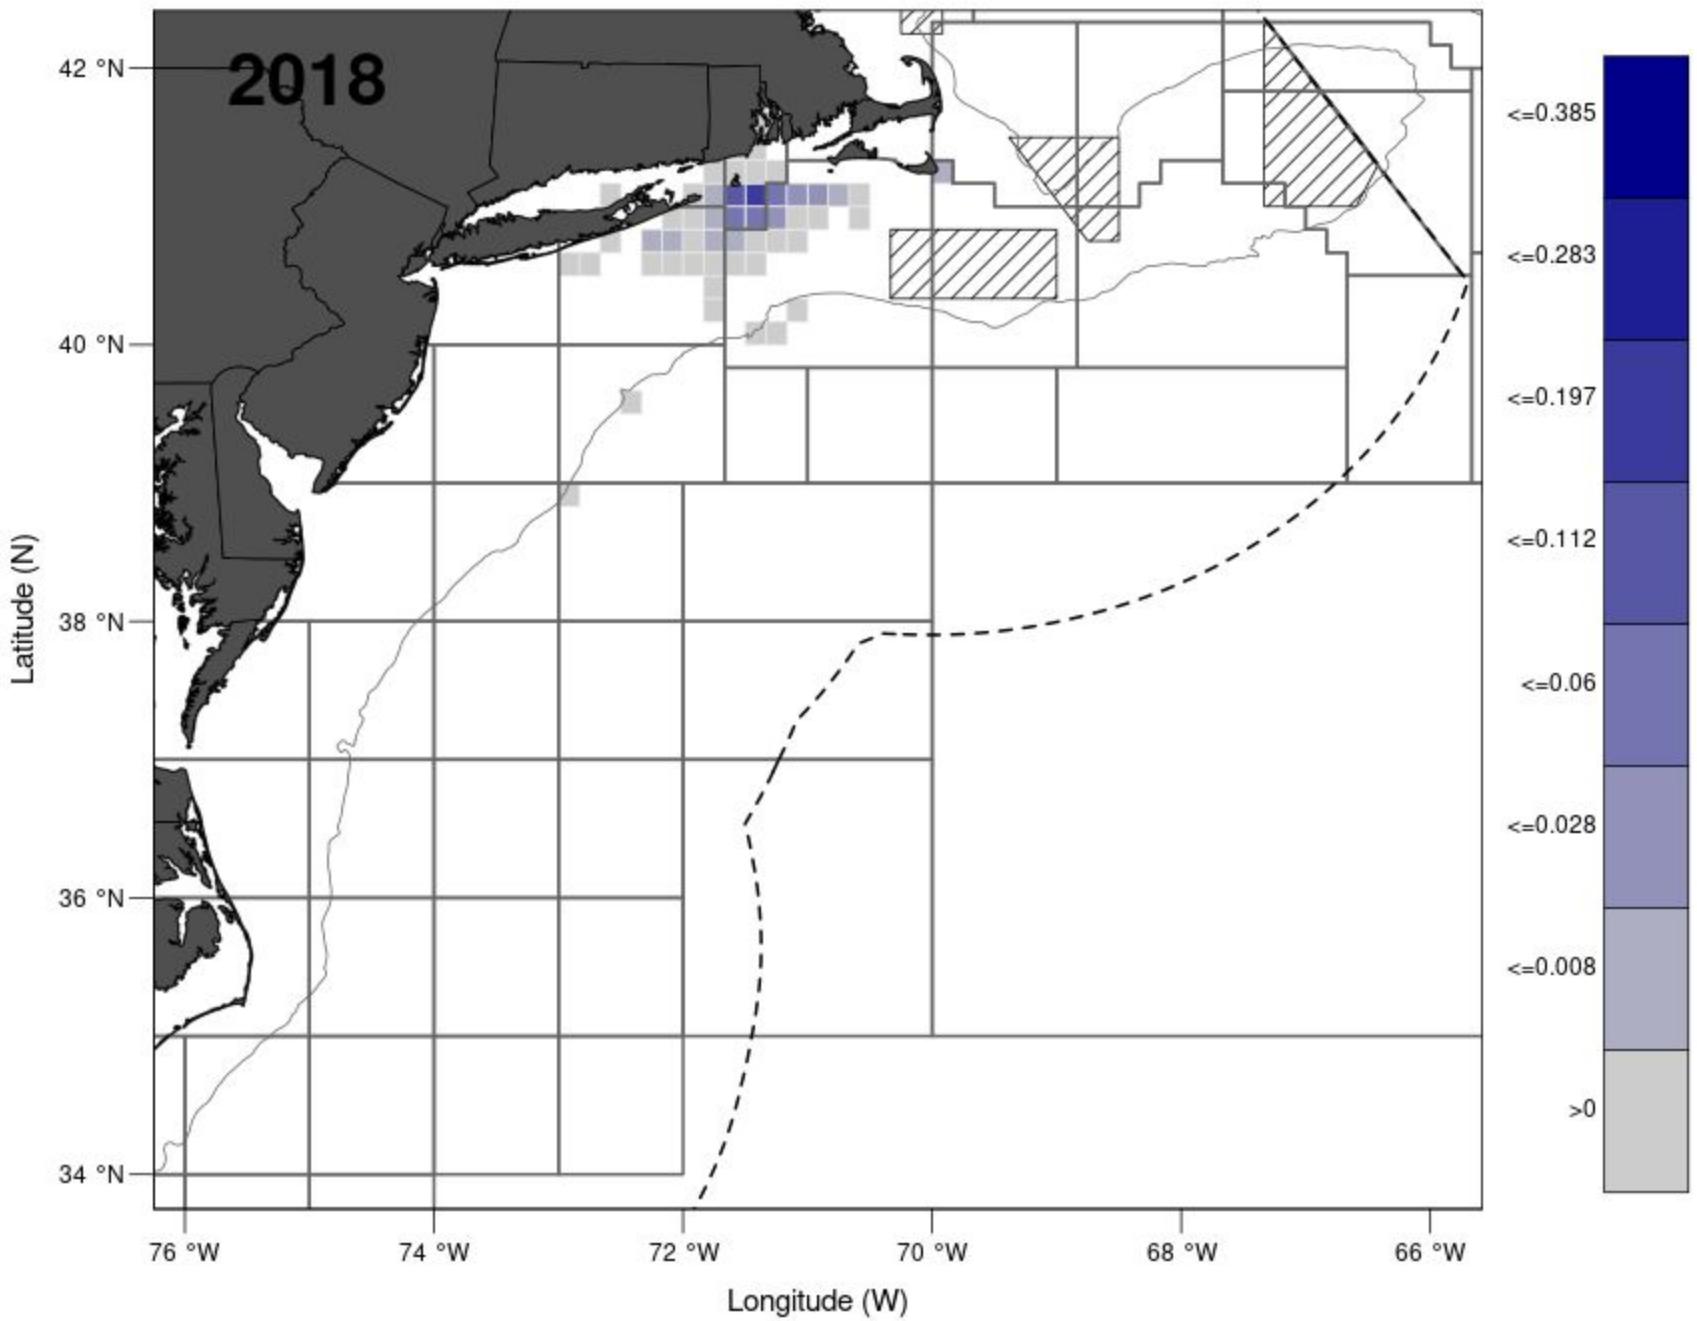

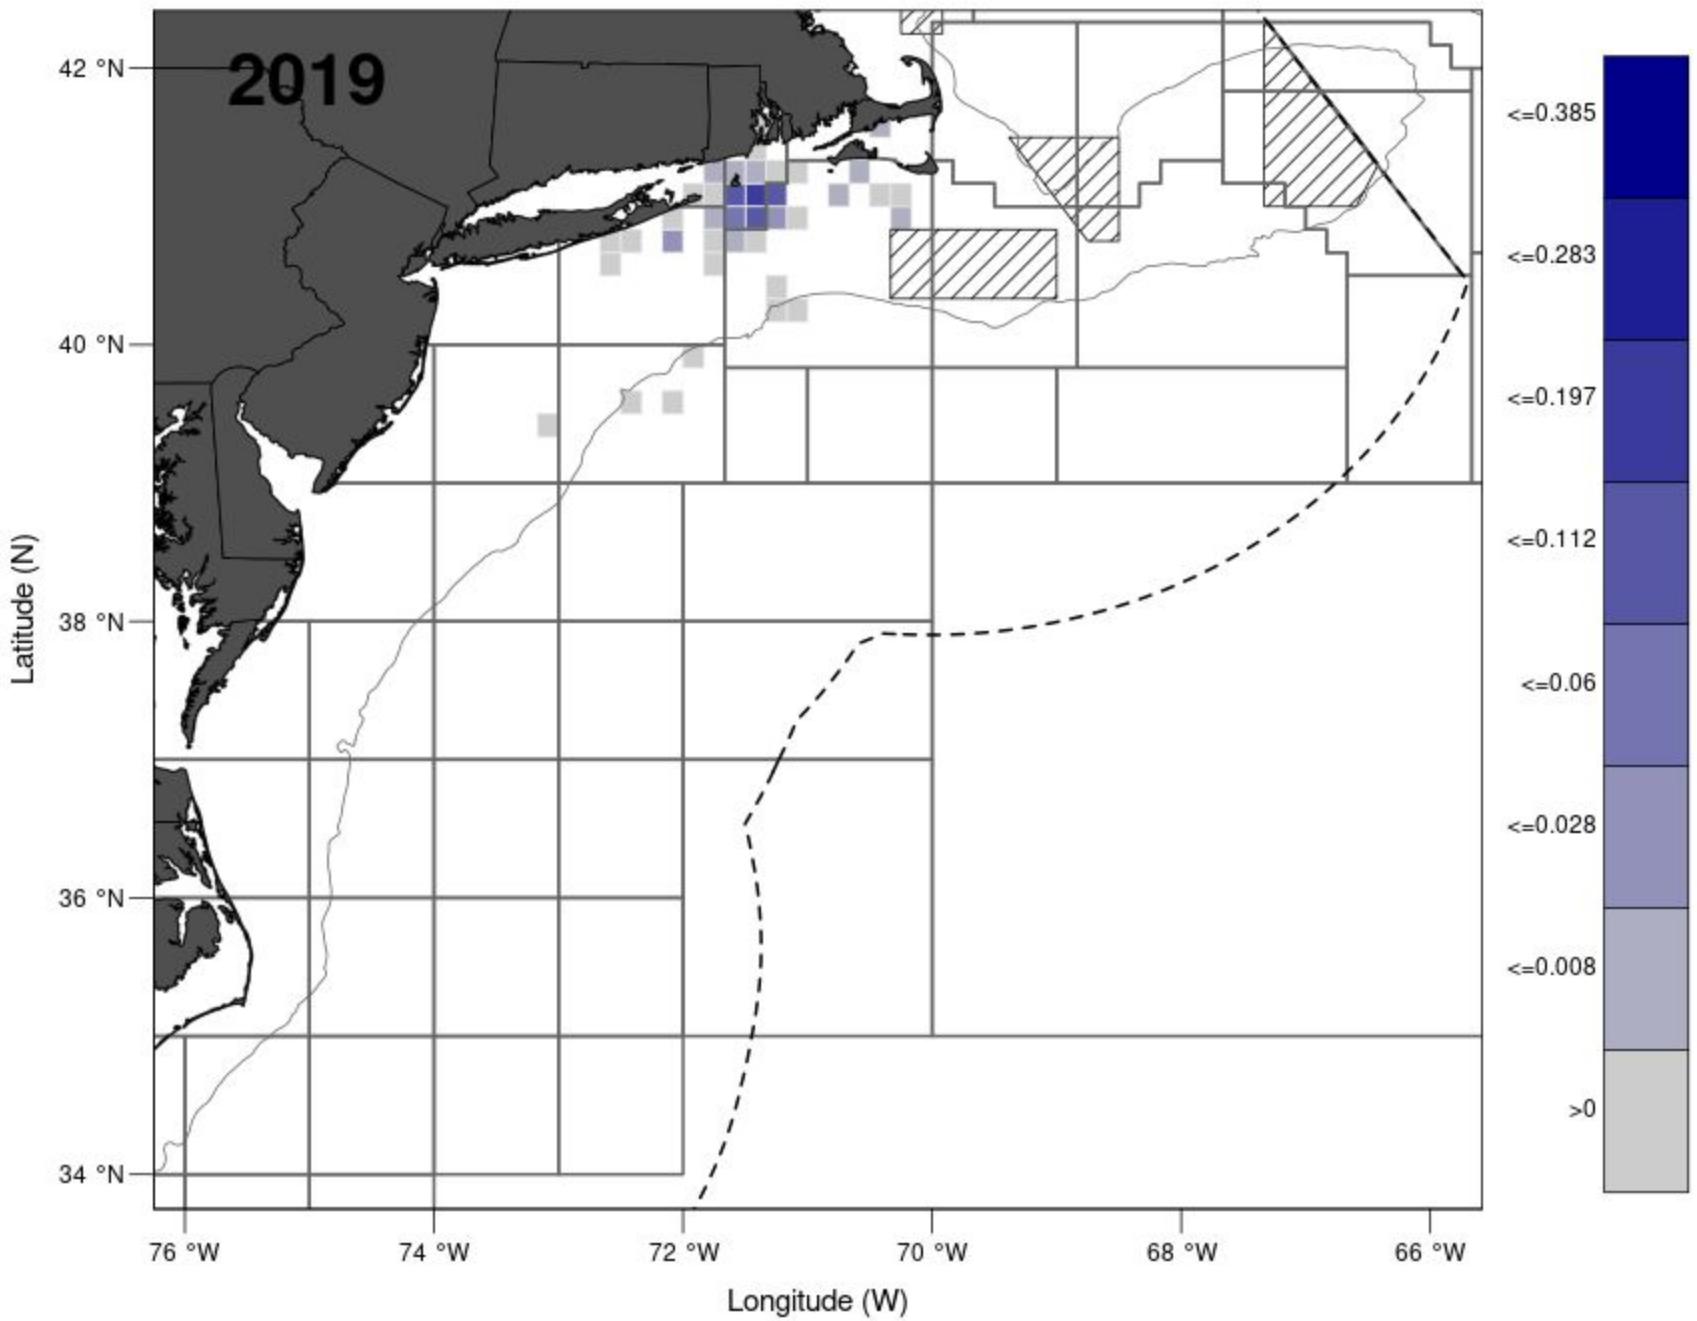

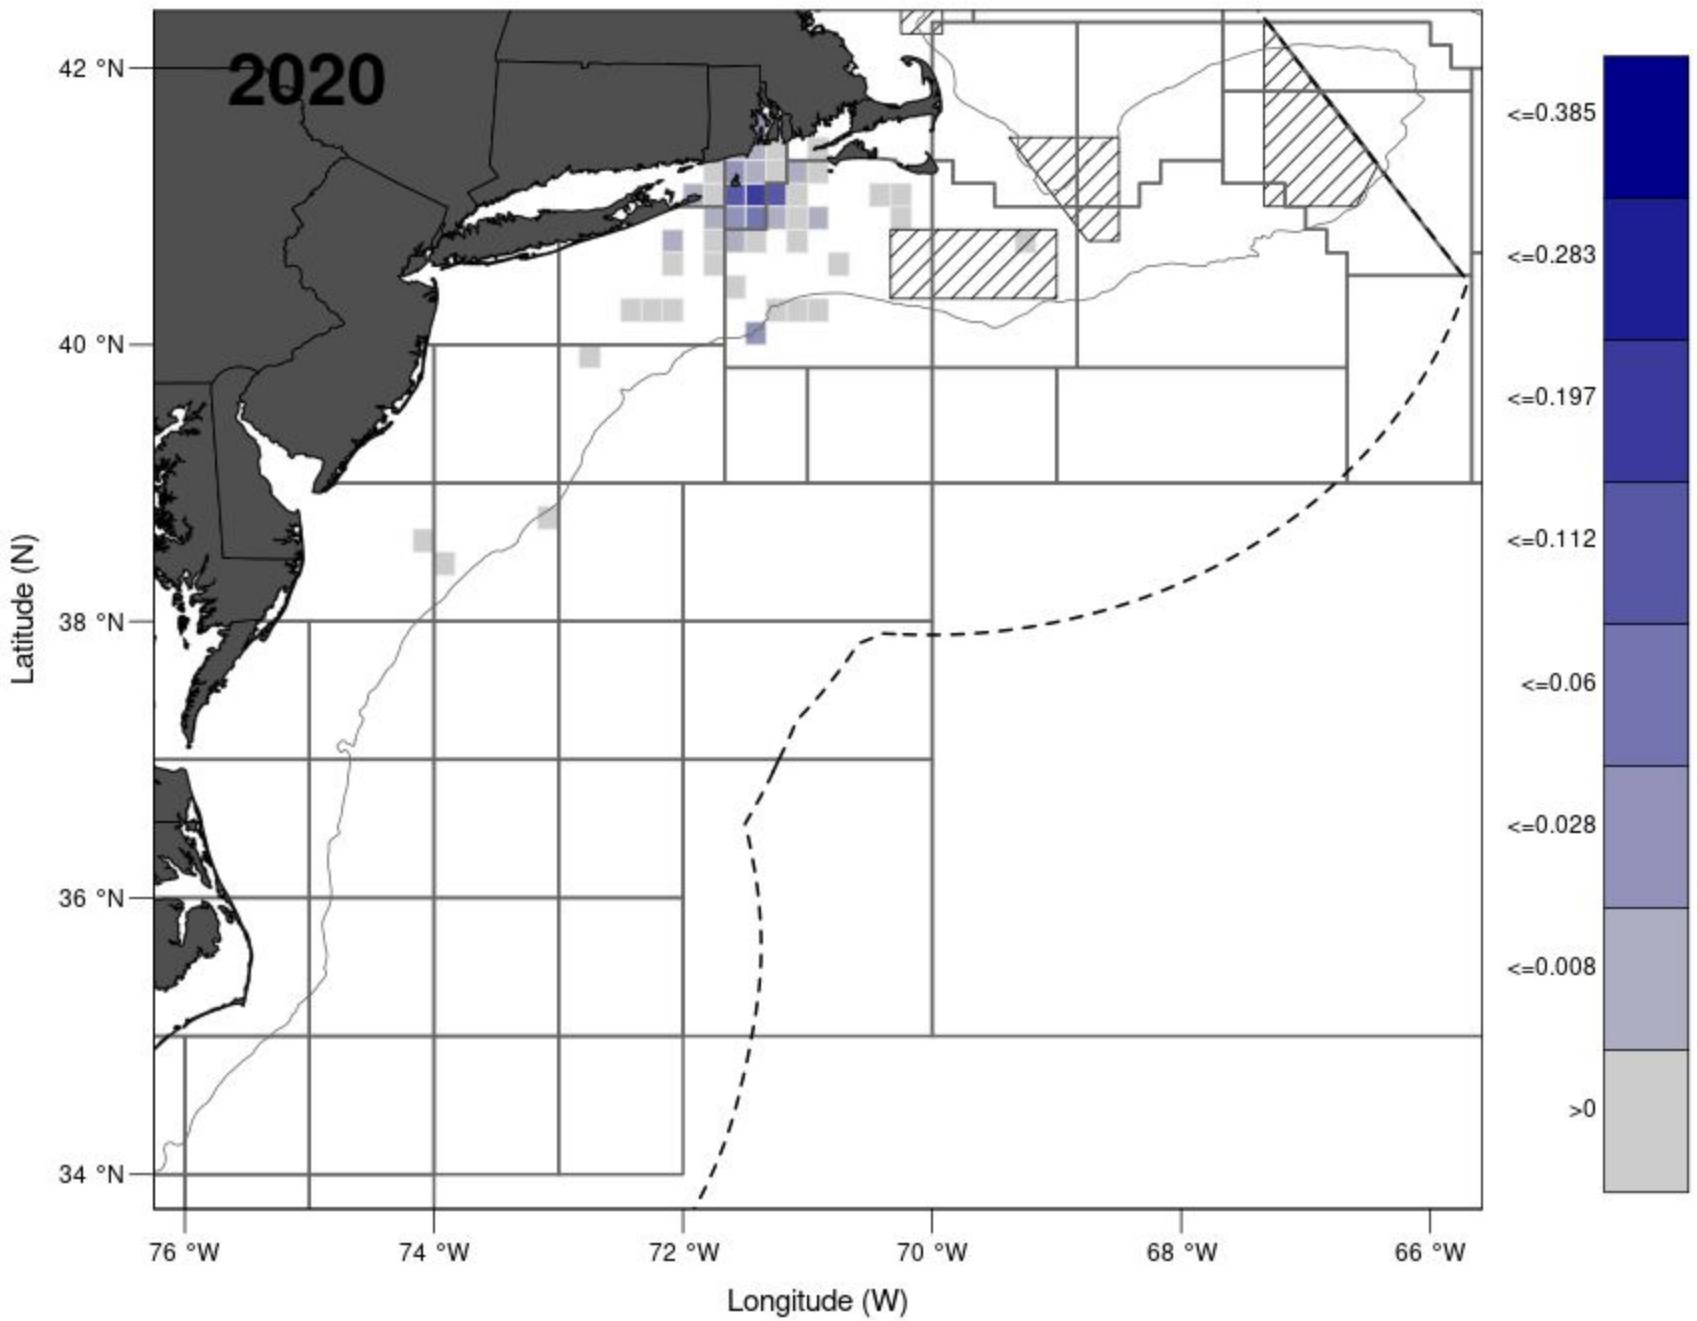

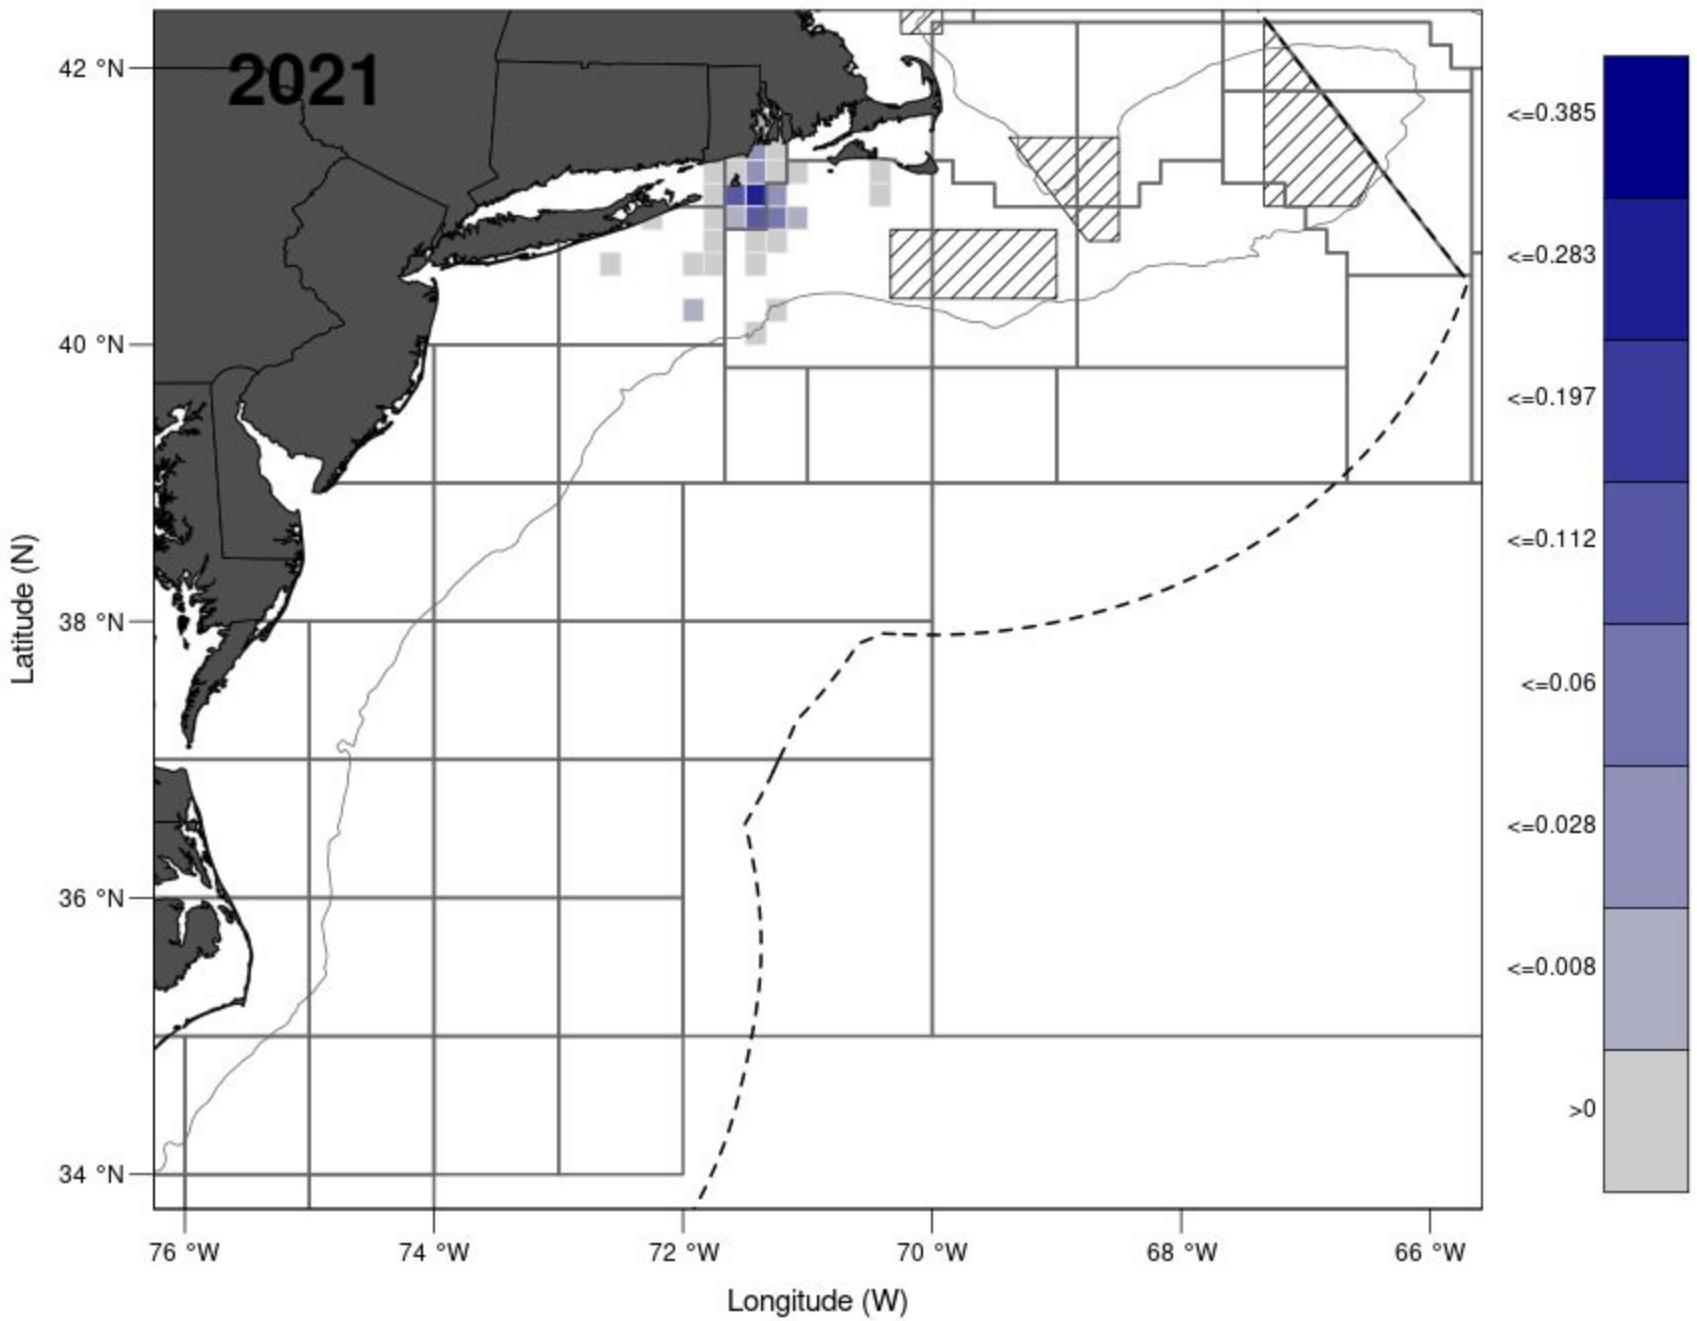

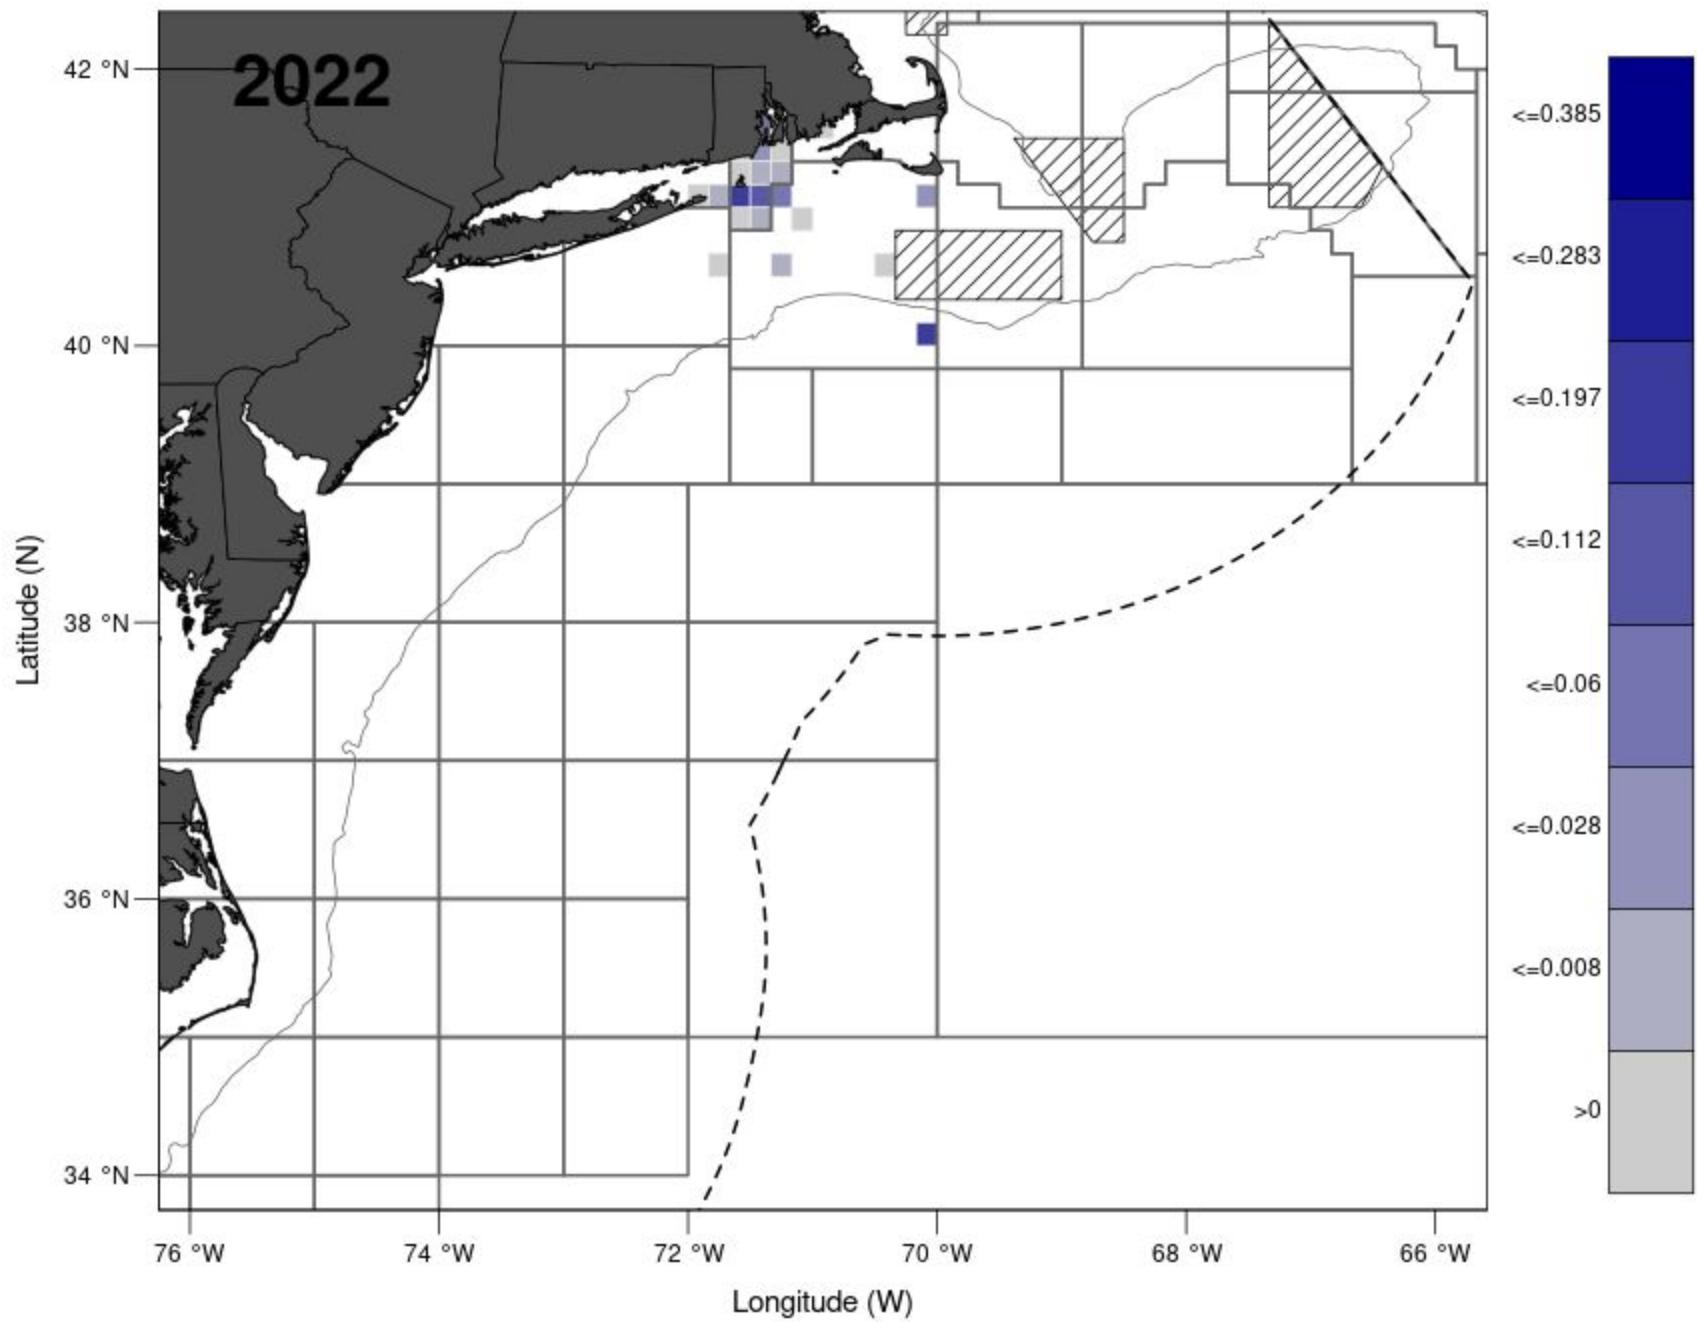

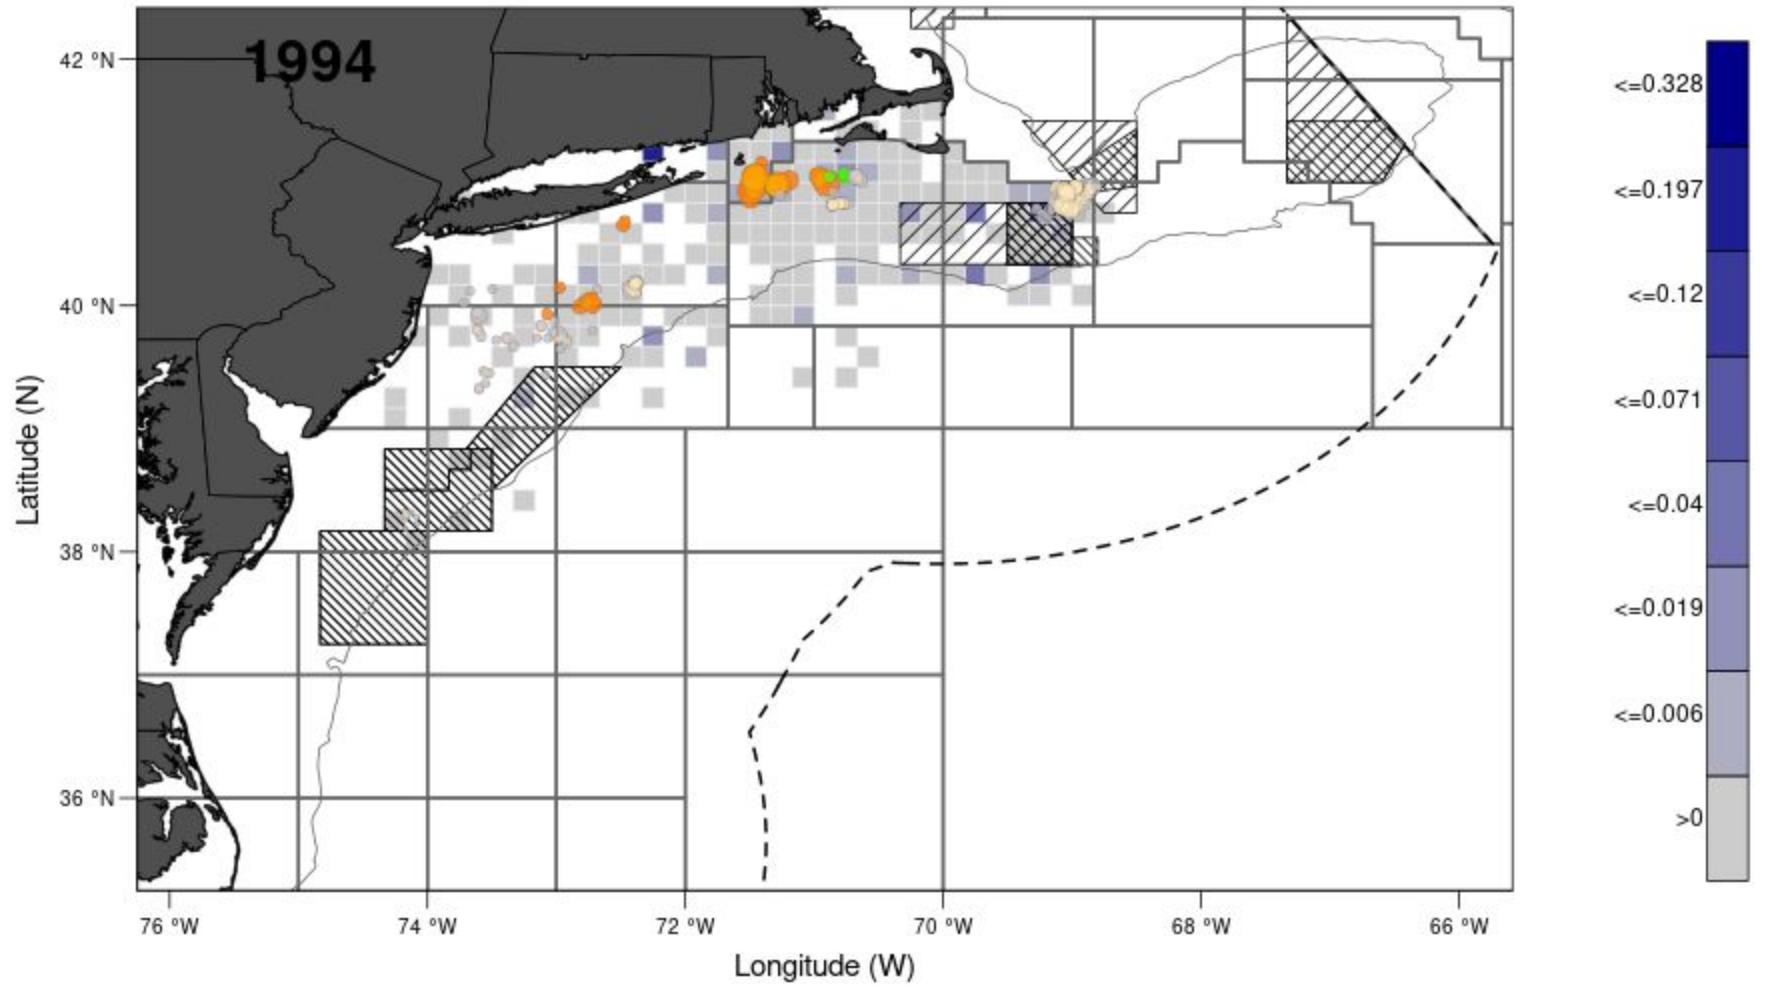

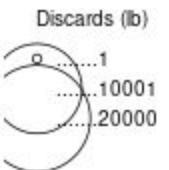

Commercial landings by 10'
square with observed
(non-extrapolated) discards by
fleet
