

CC/GOM

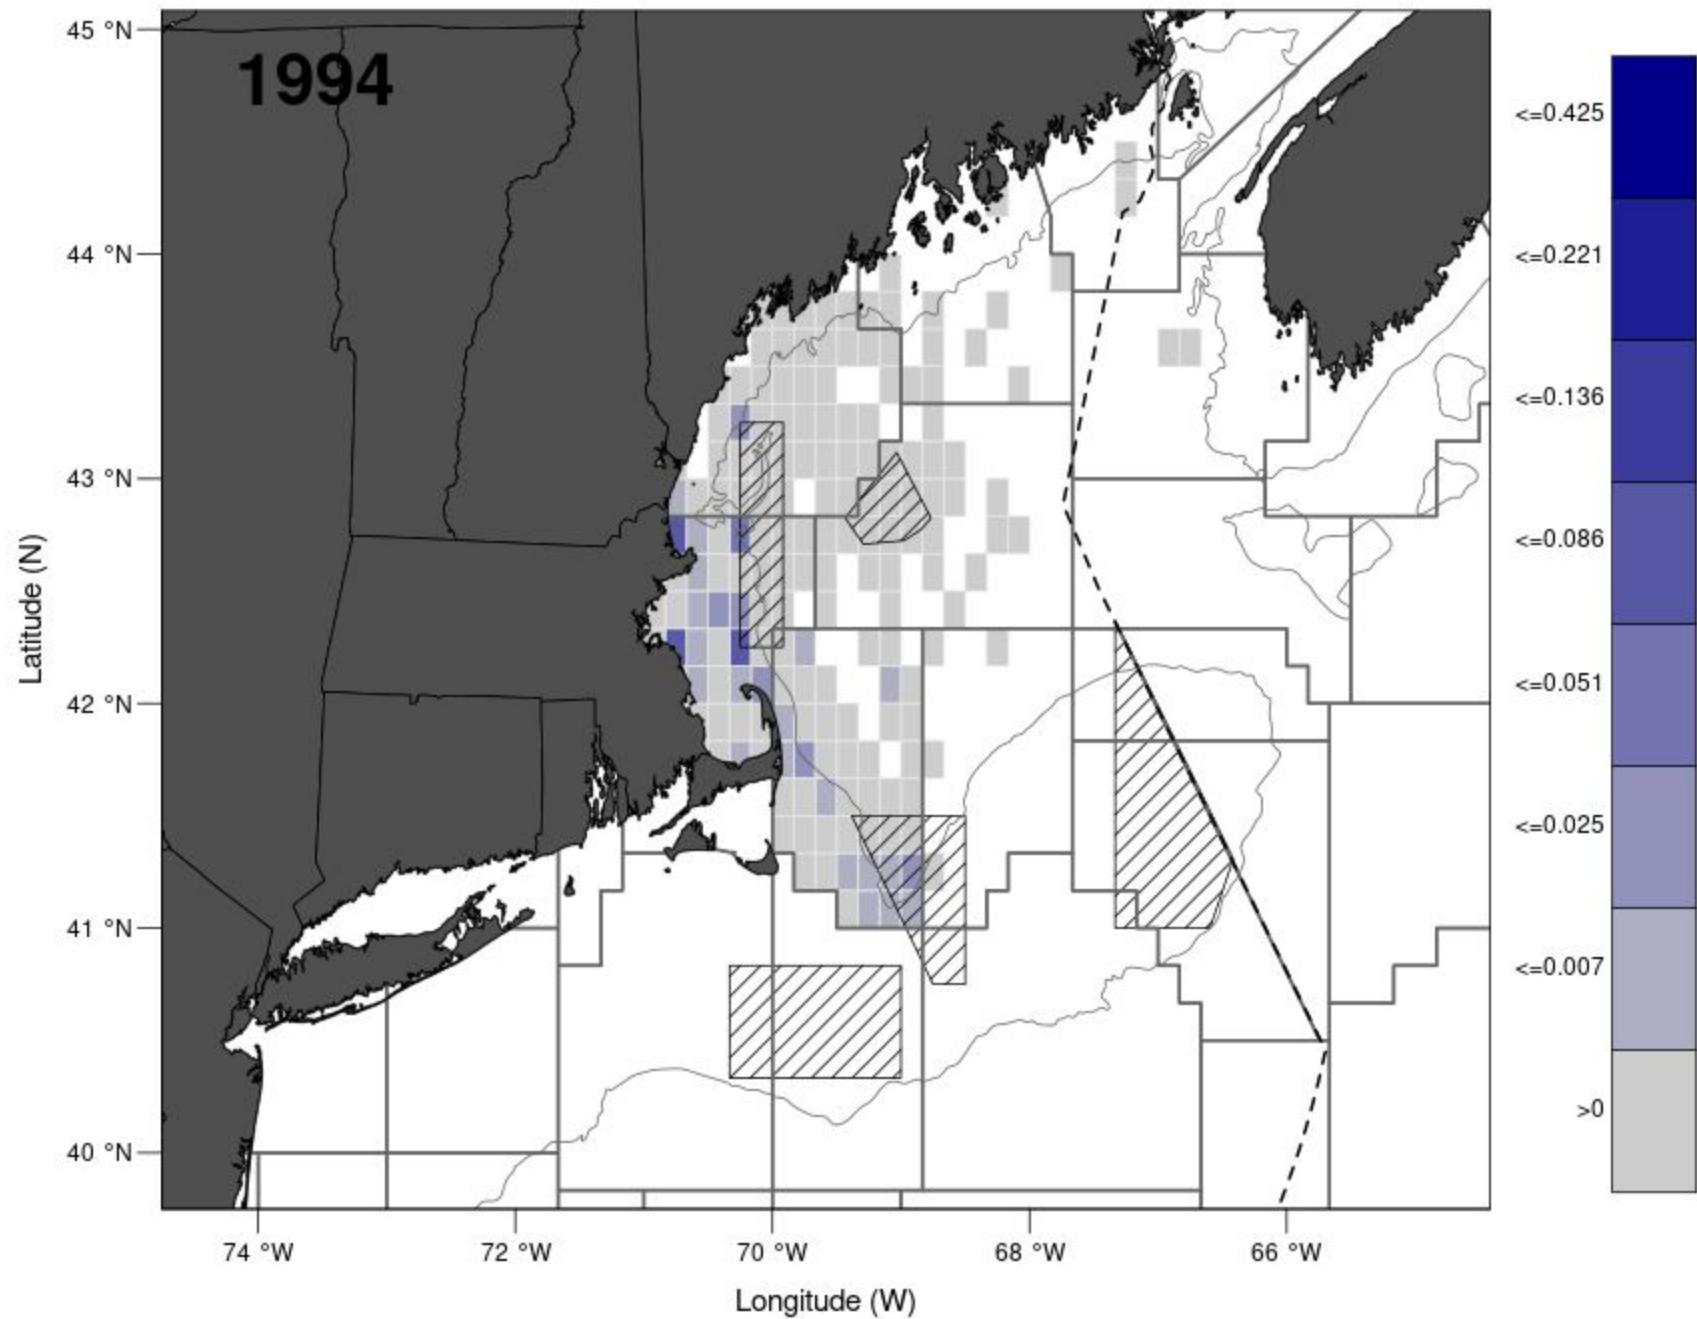

Take-home points

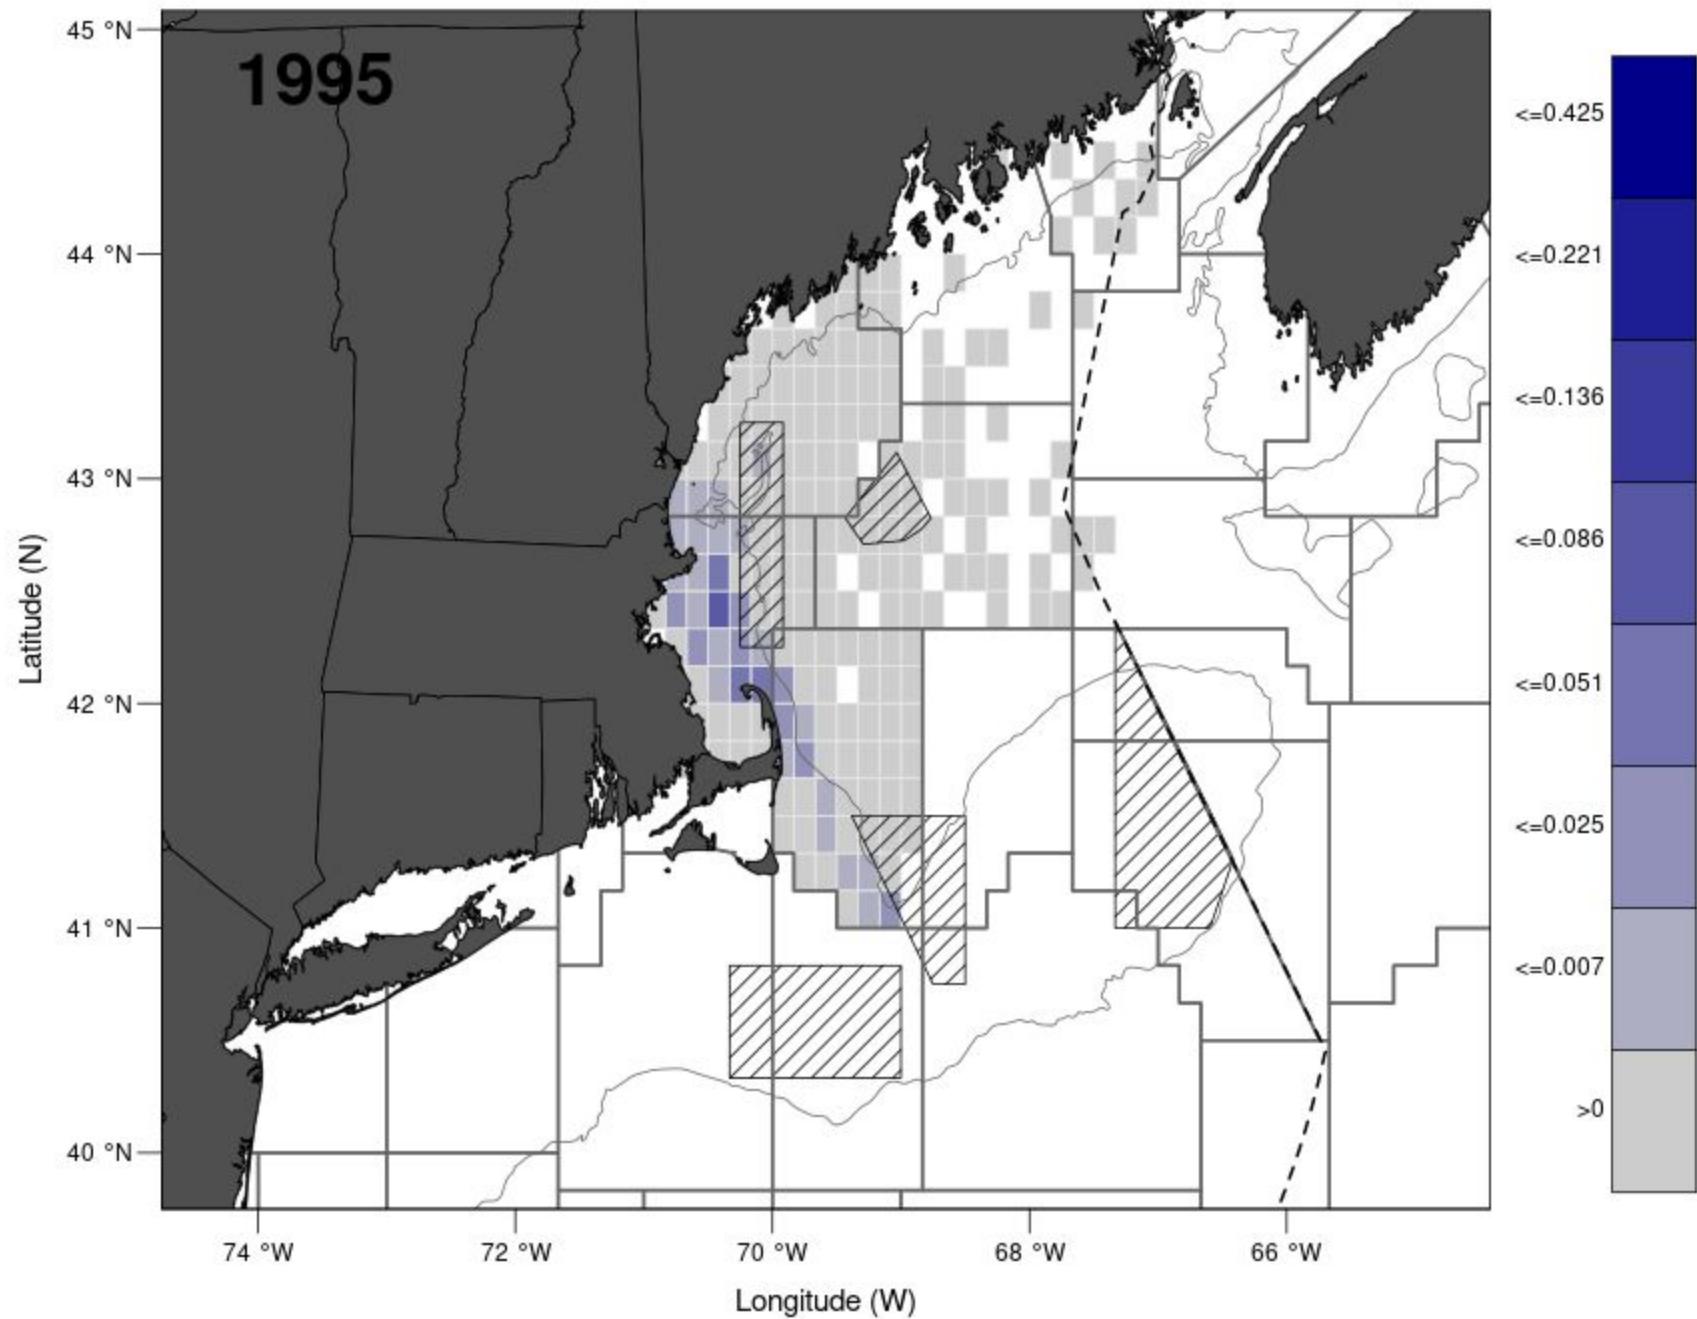

- Landings
 - Landings north of Cape Cod (513 & 514) became more dominant over time.
 - After 200, a significant portion of yellowtail landings came from northern waters (~70% in 514).
 - By the late 2010's southern and inshore regions contributed little to overall landings
 - 2015 onward, distribution of landings stabilize with area 514 consistently having the highest landings and fewer variations in other areas.

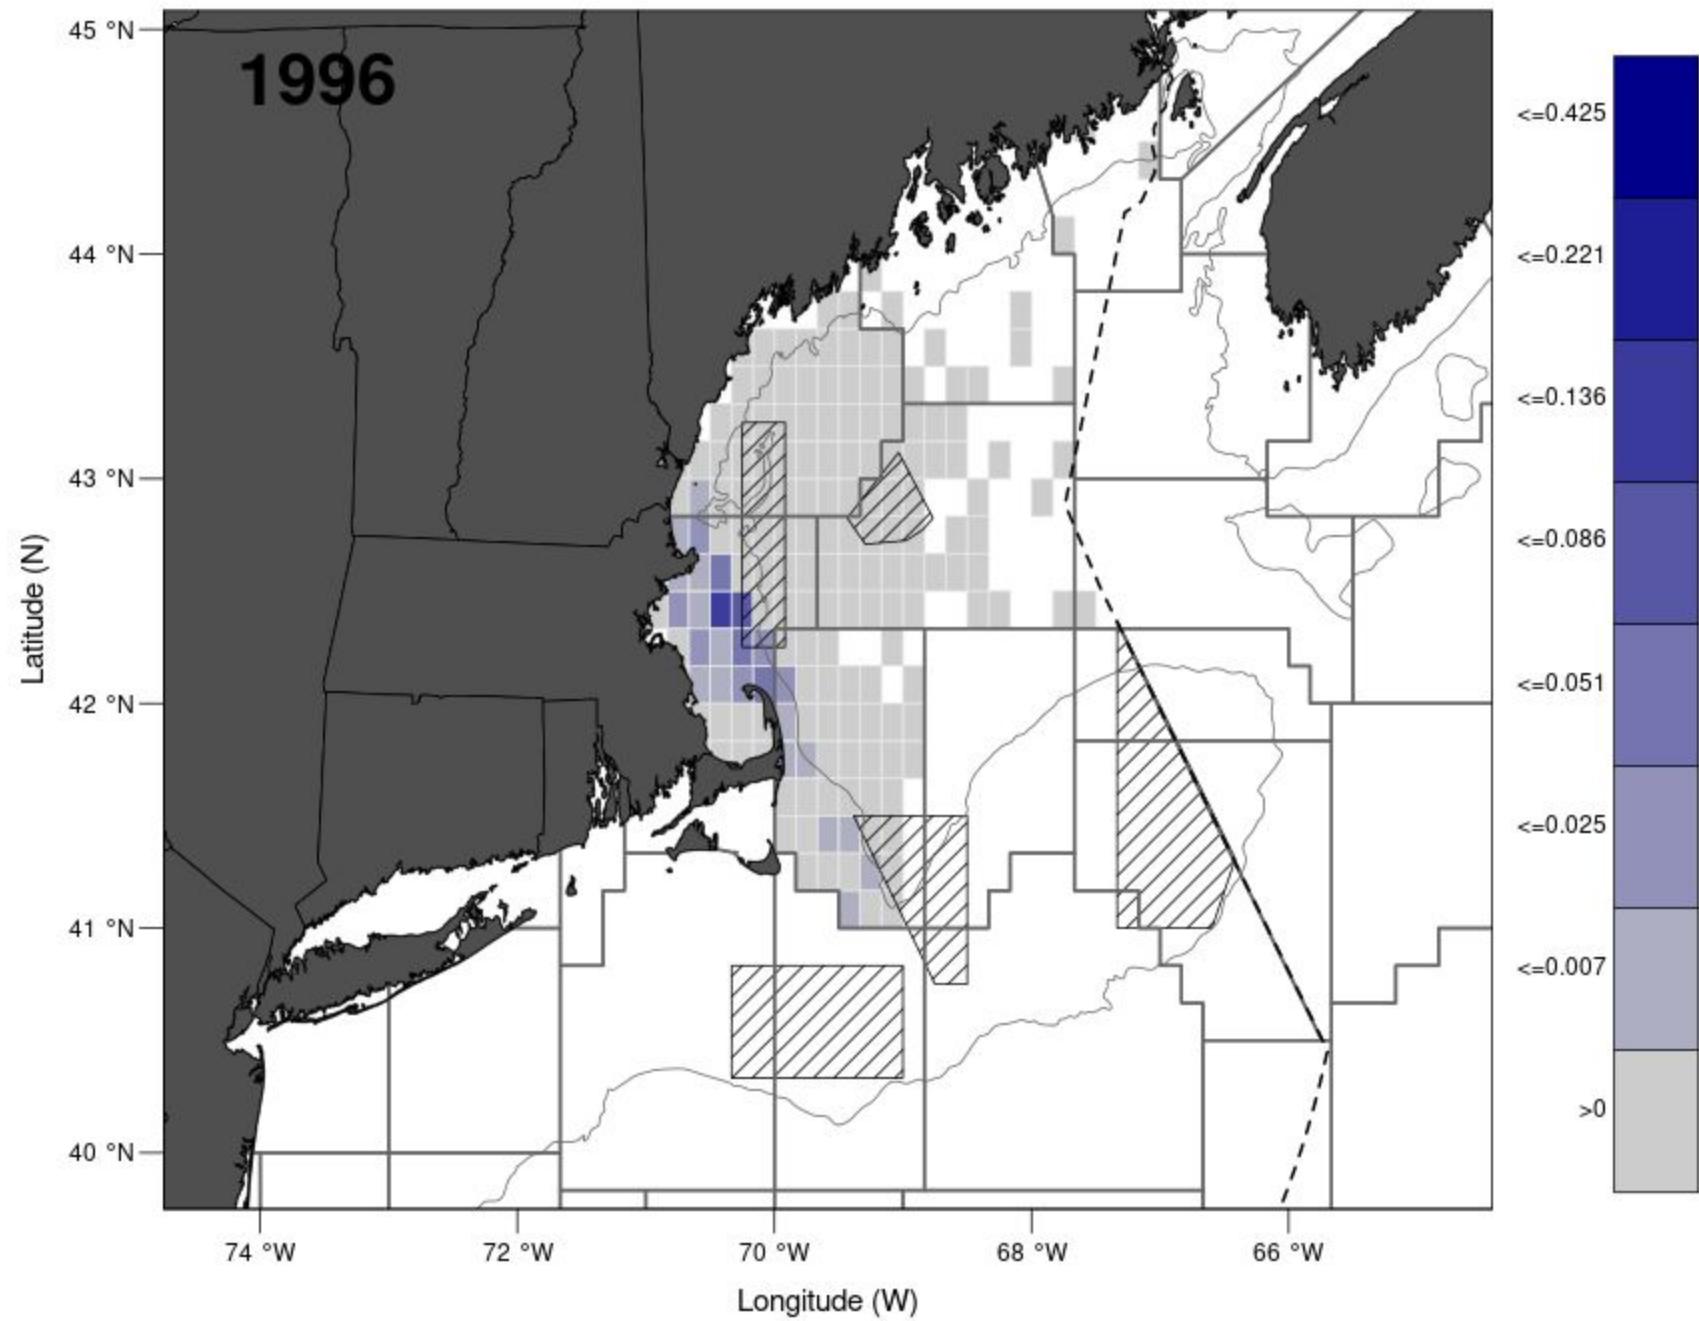

Take-home points

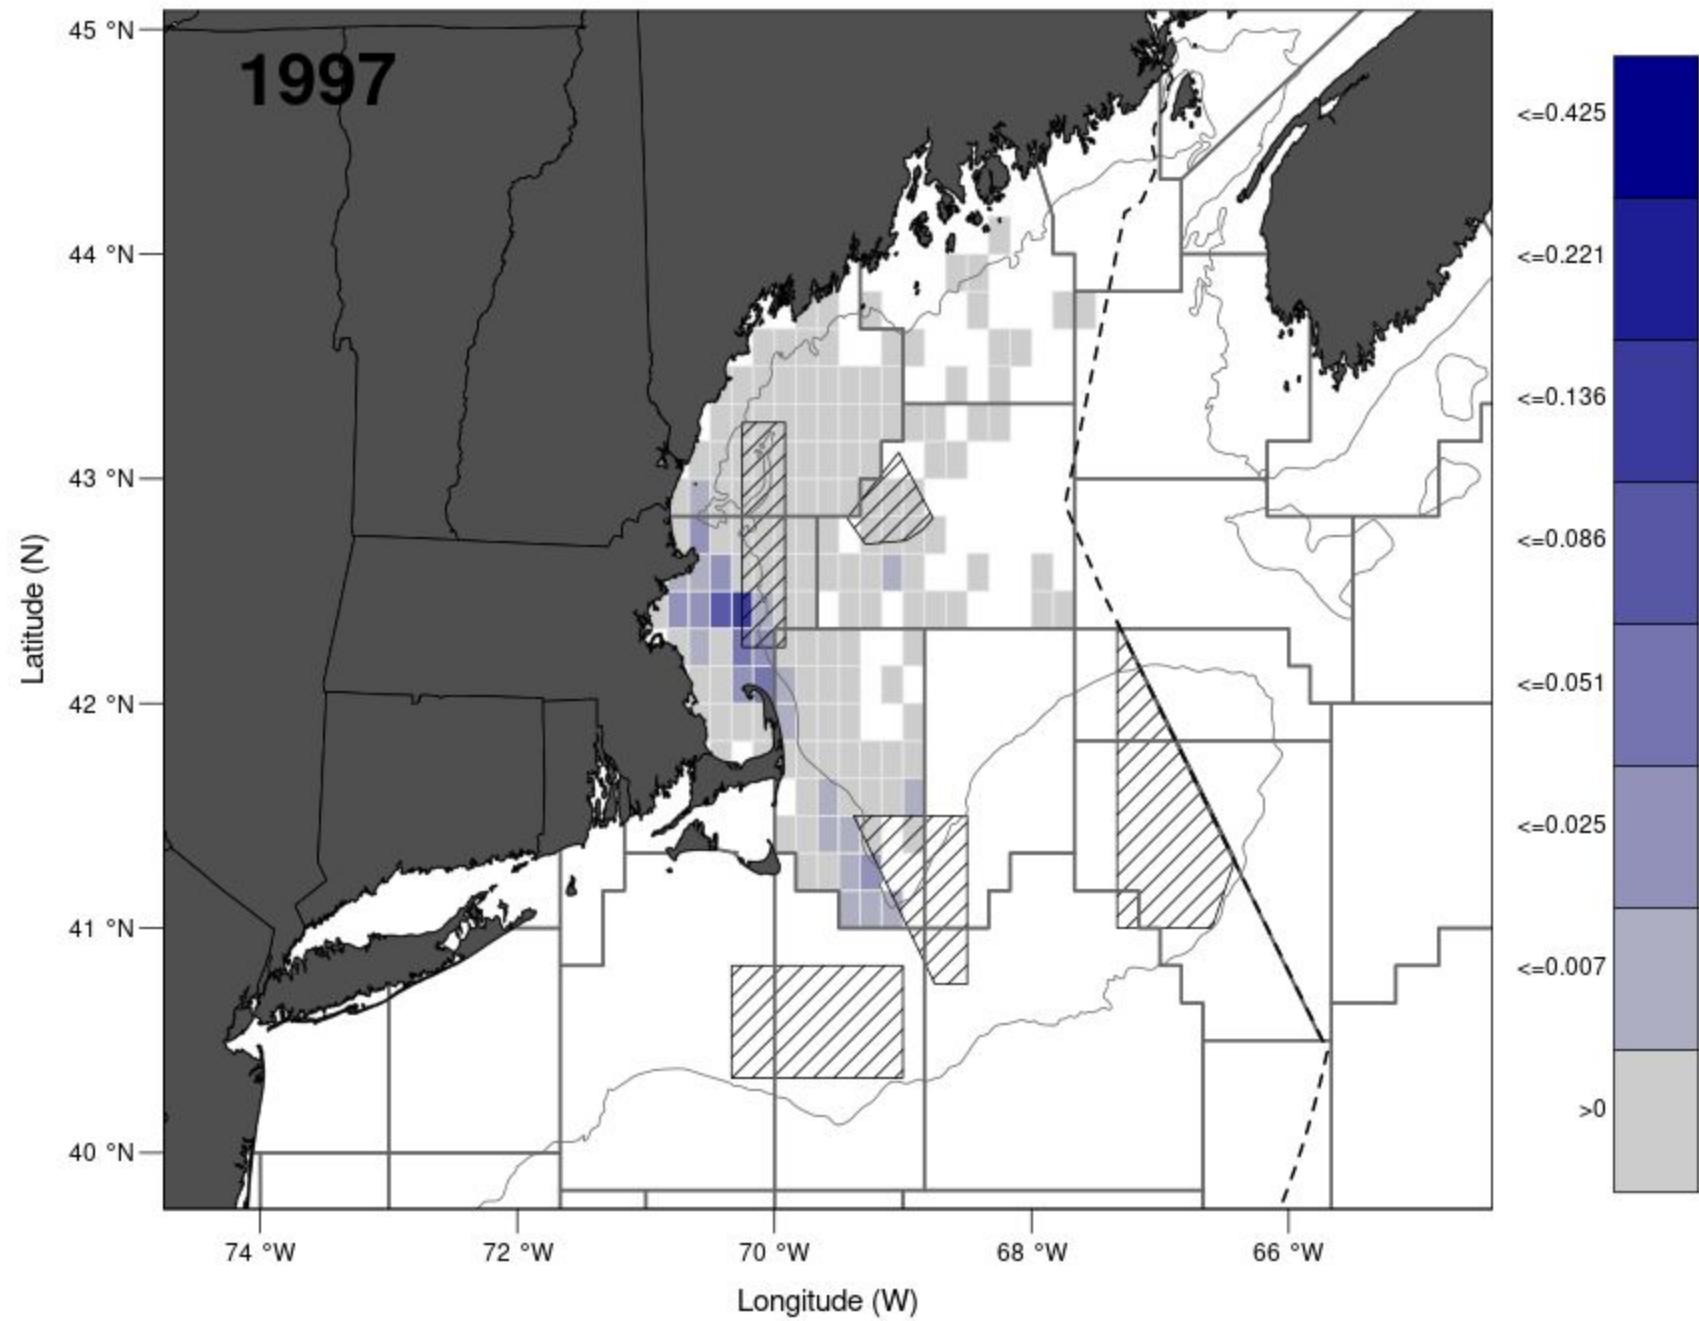

- Discards
 - Significant increase in discards, especially from 2005 onwards
 - Highest discards consistently north of Cape Cod in offshore waters
 - Decline in discards south of Cape Cod and in inshore regions
 - Stabilization in discards in the northern offshore areas post-2015

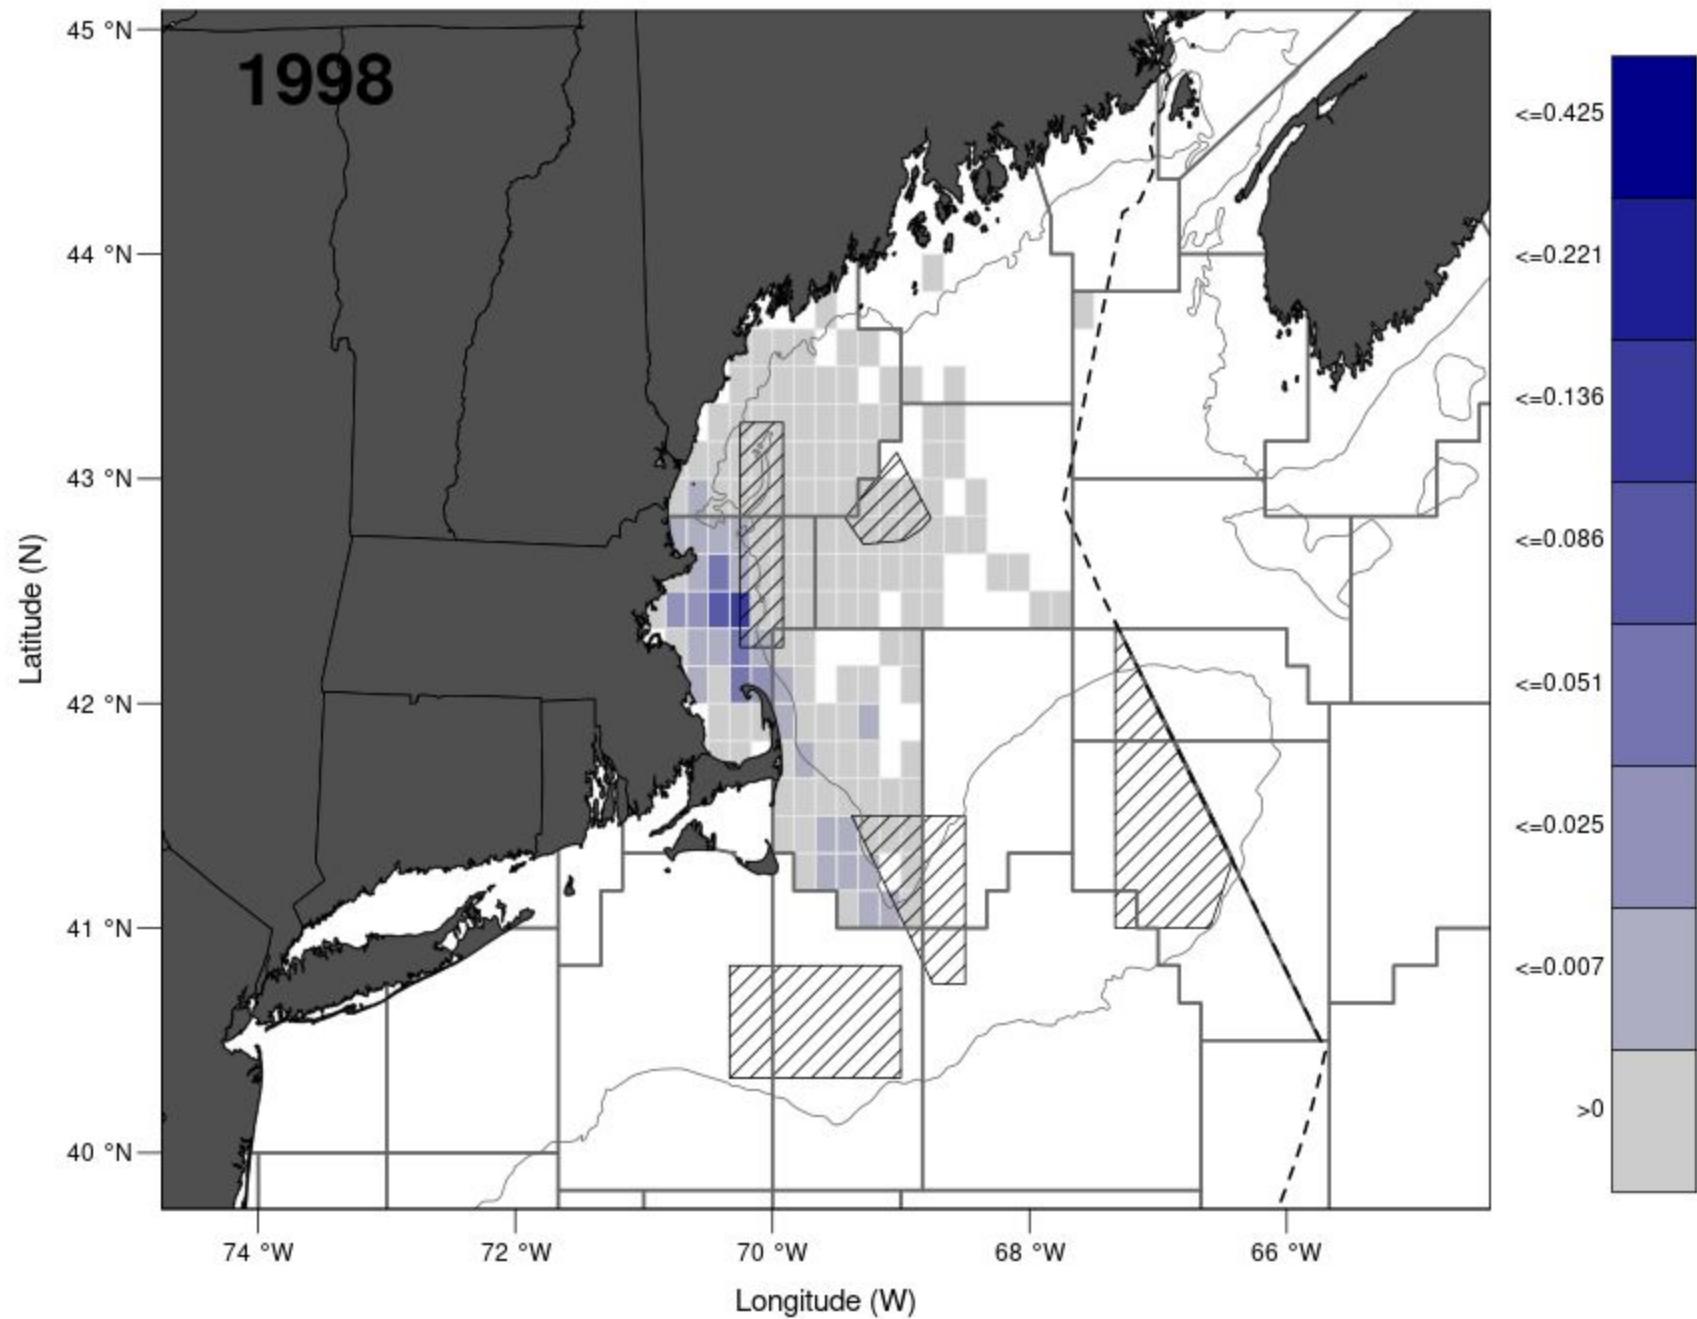

Commercial Landings

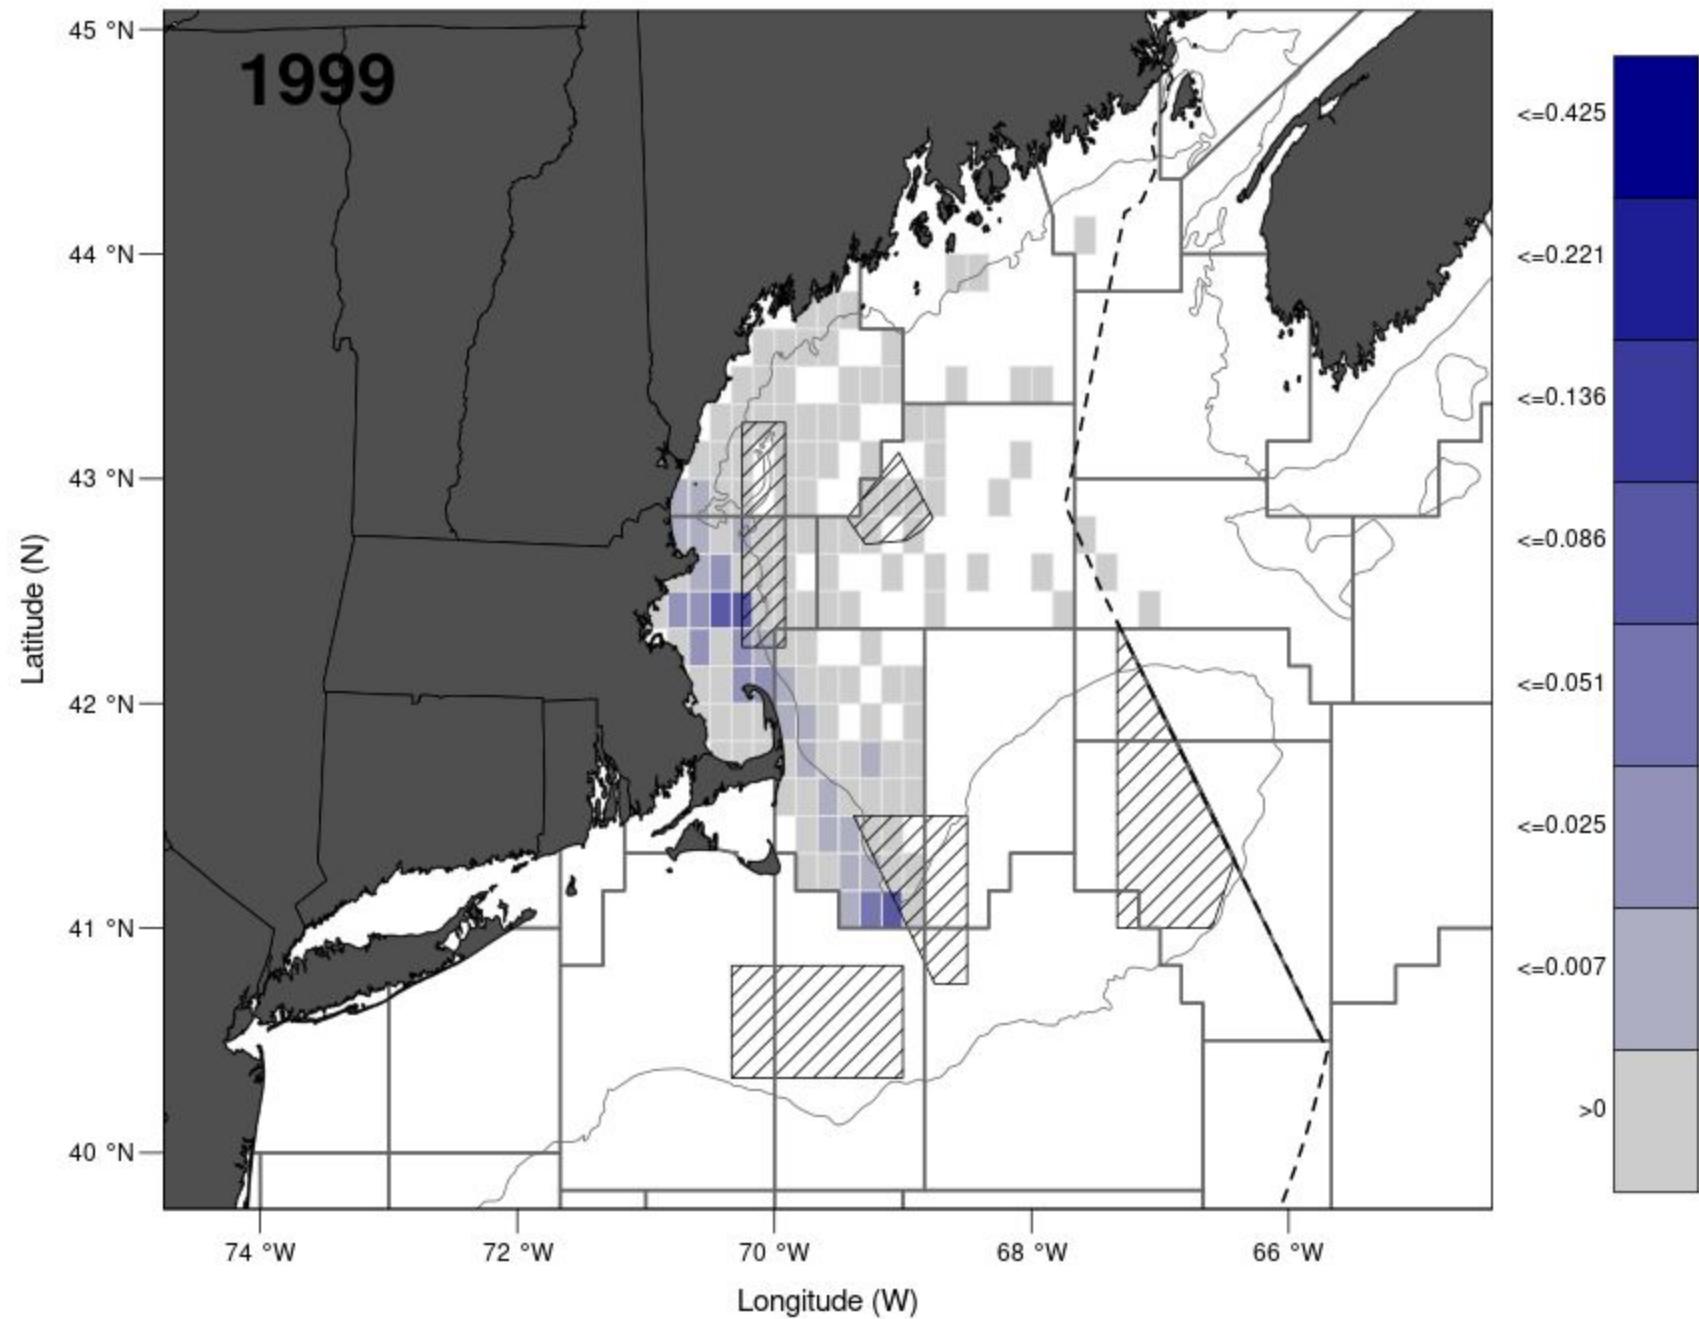

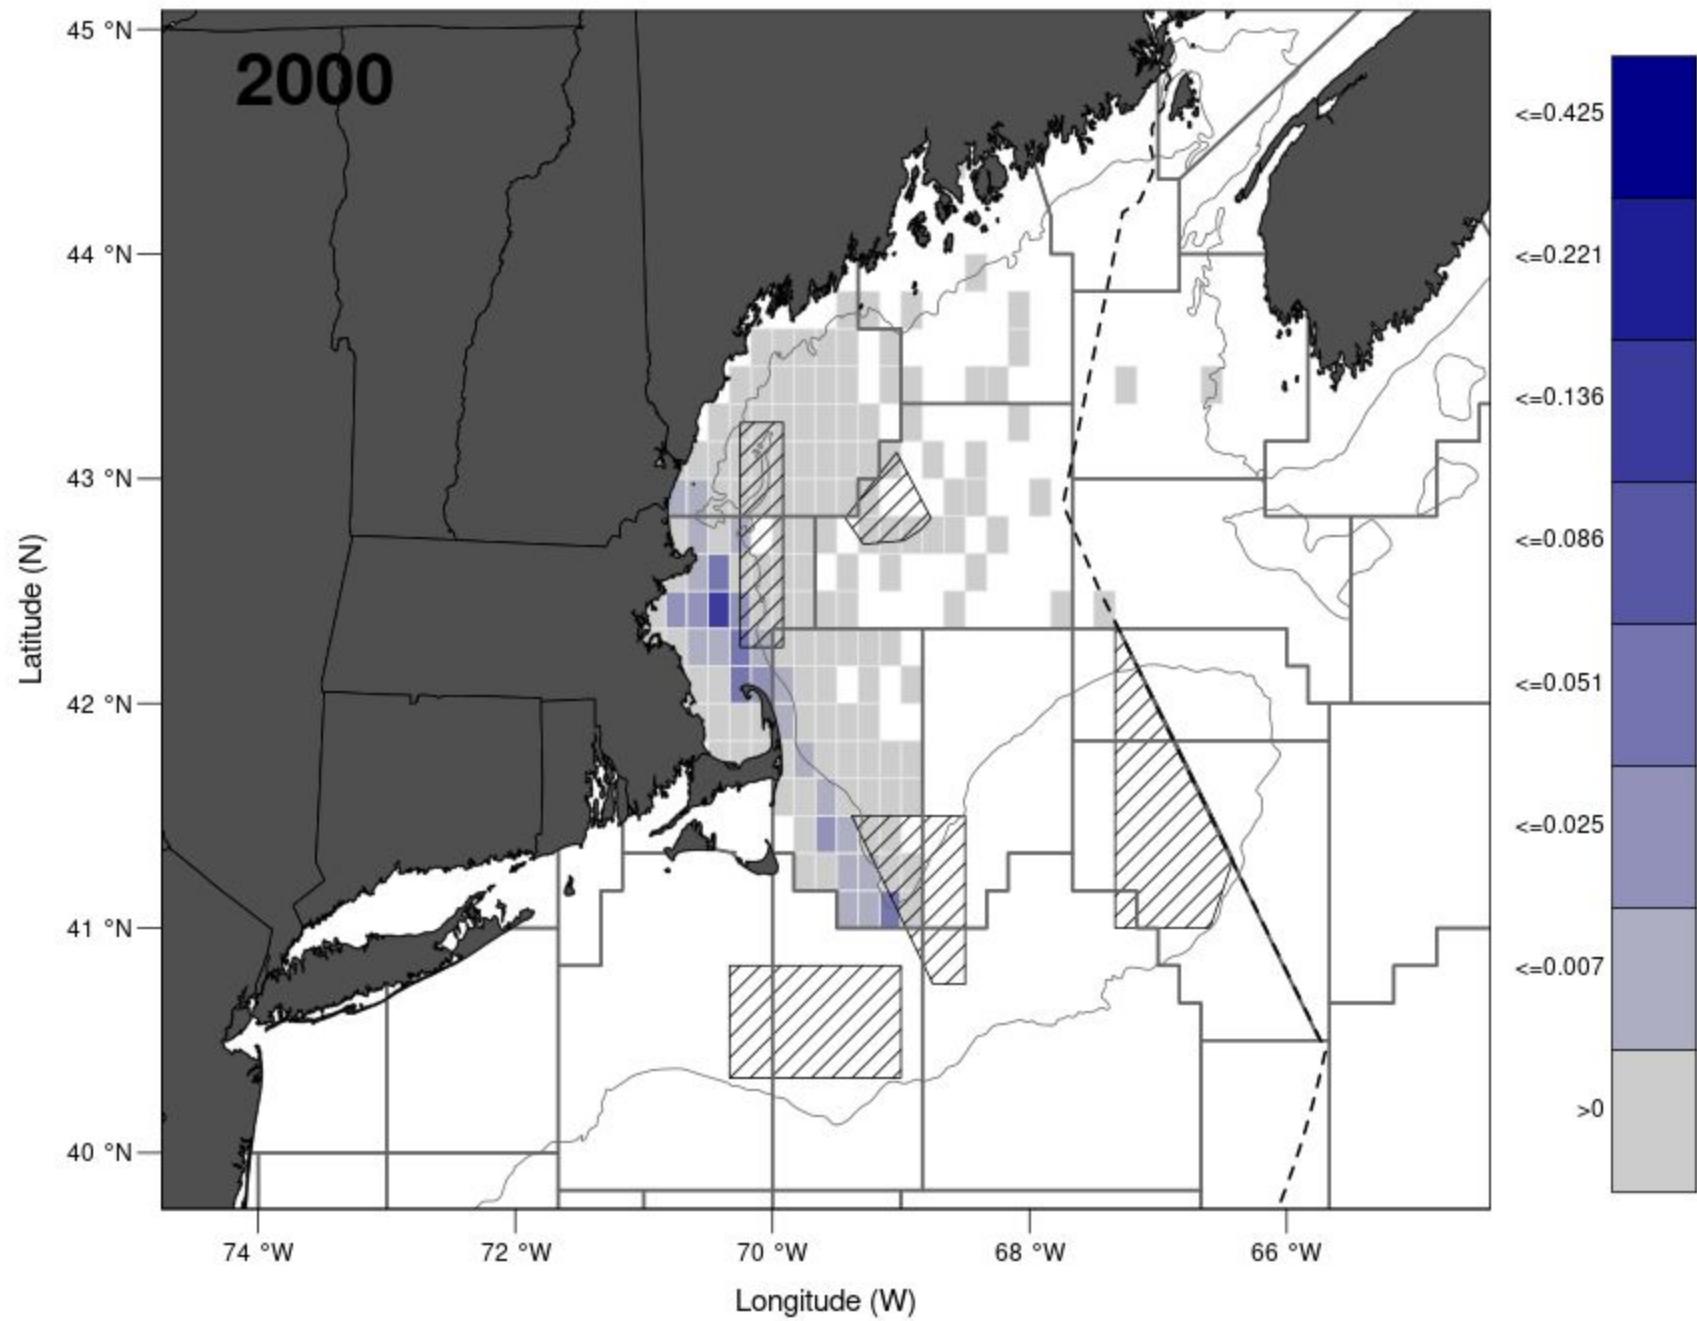

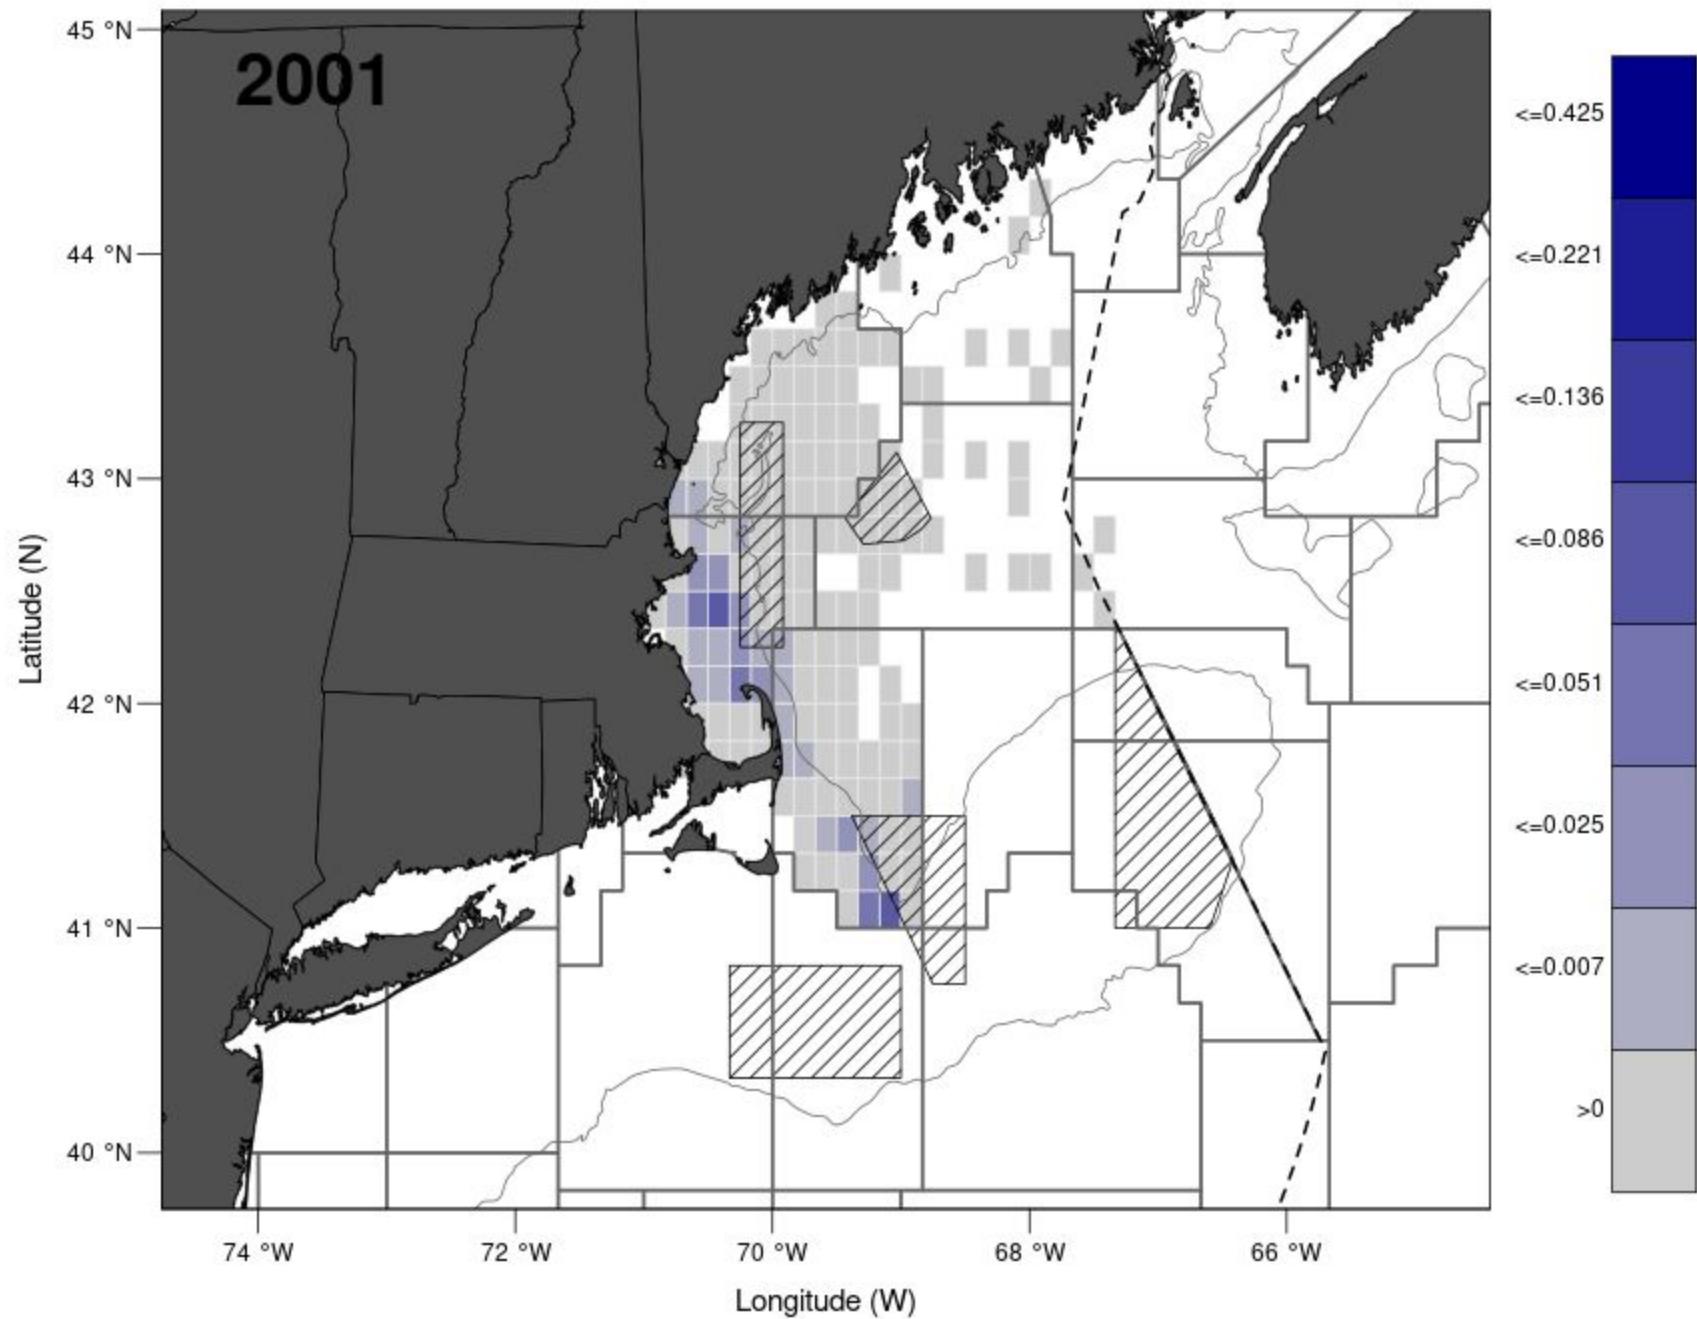

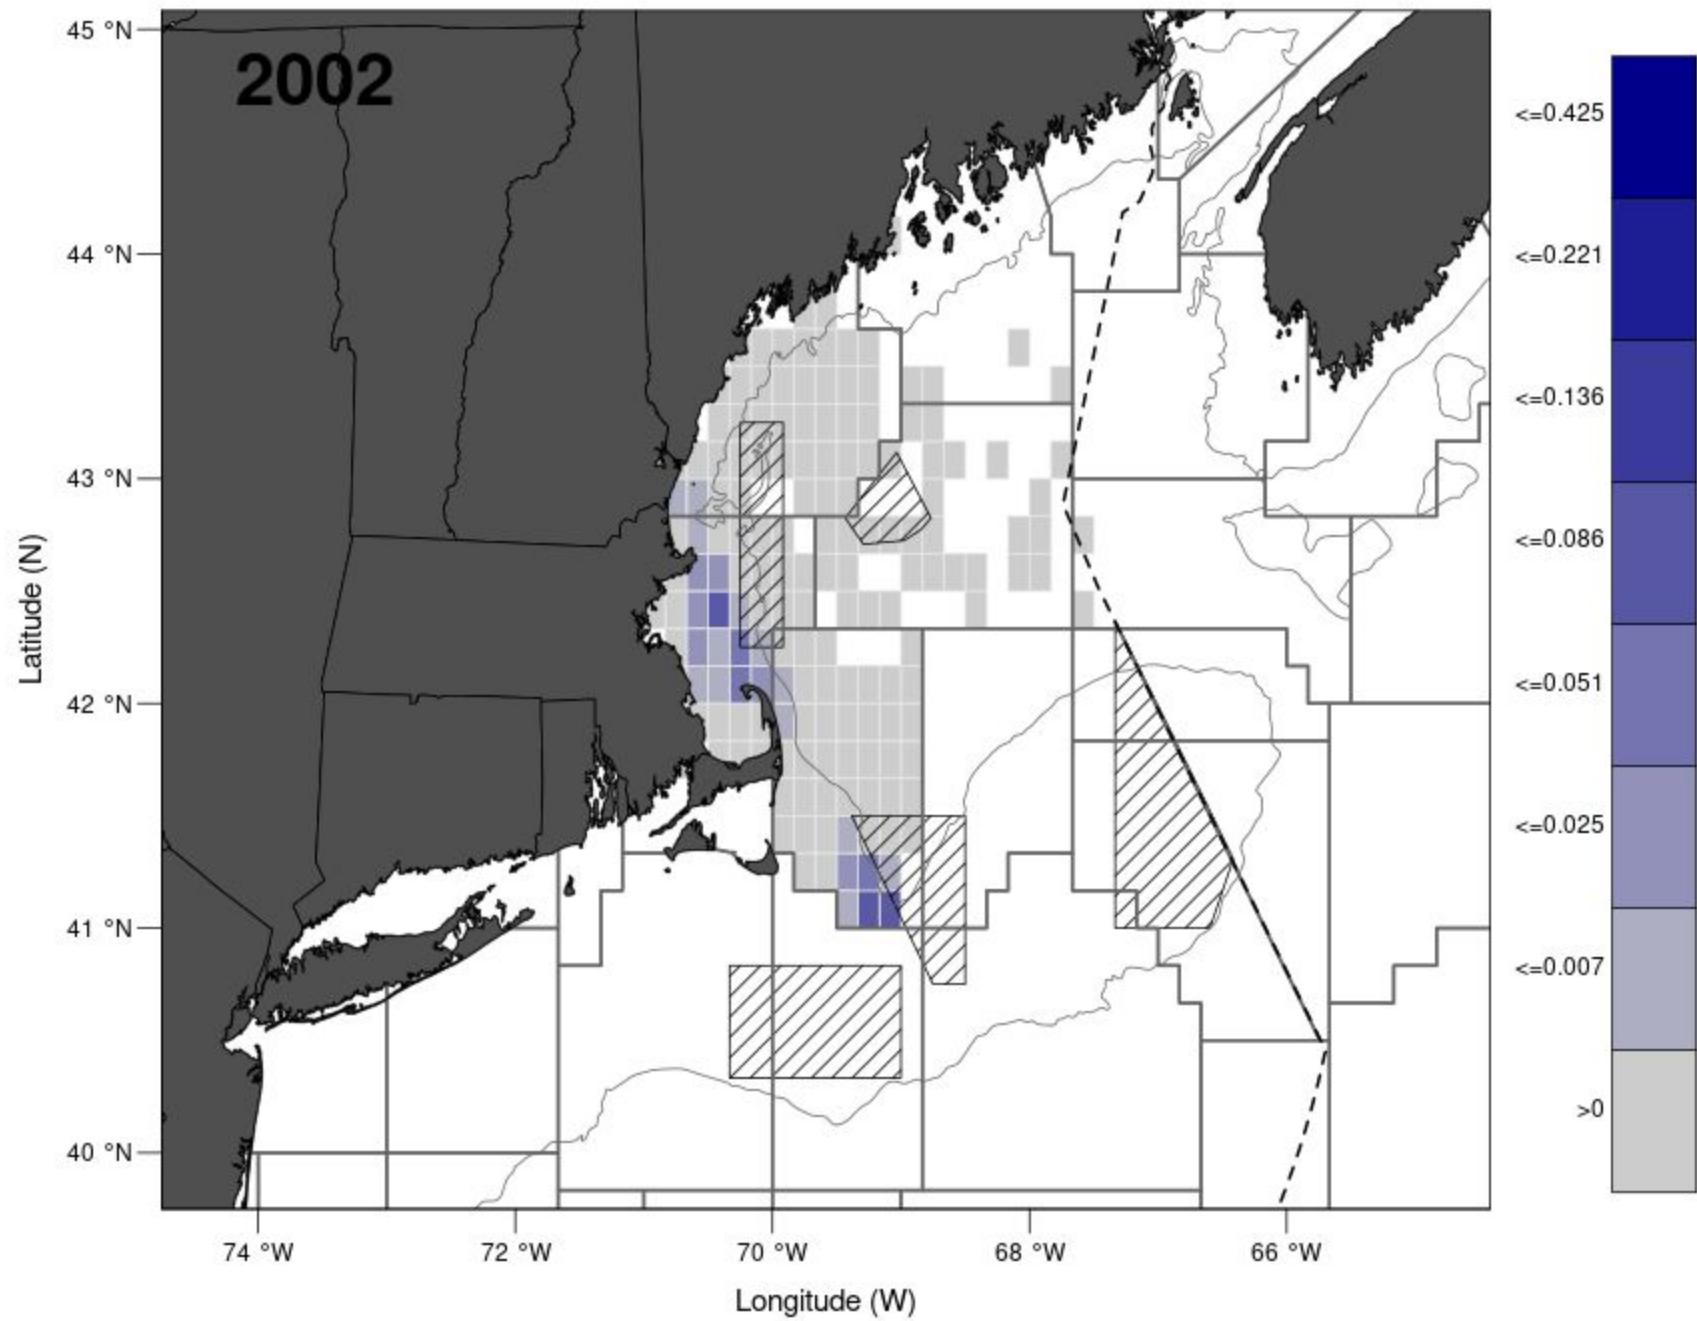

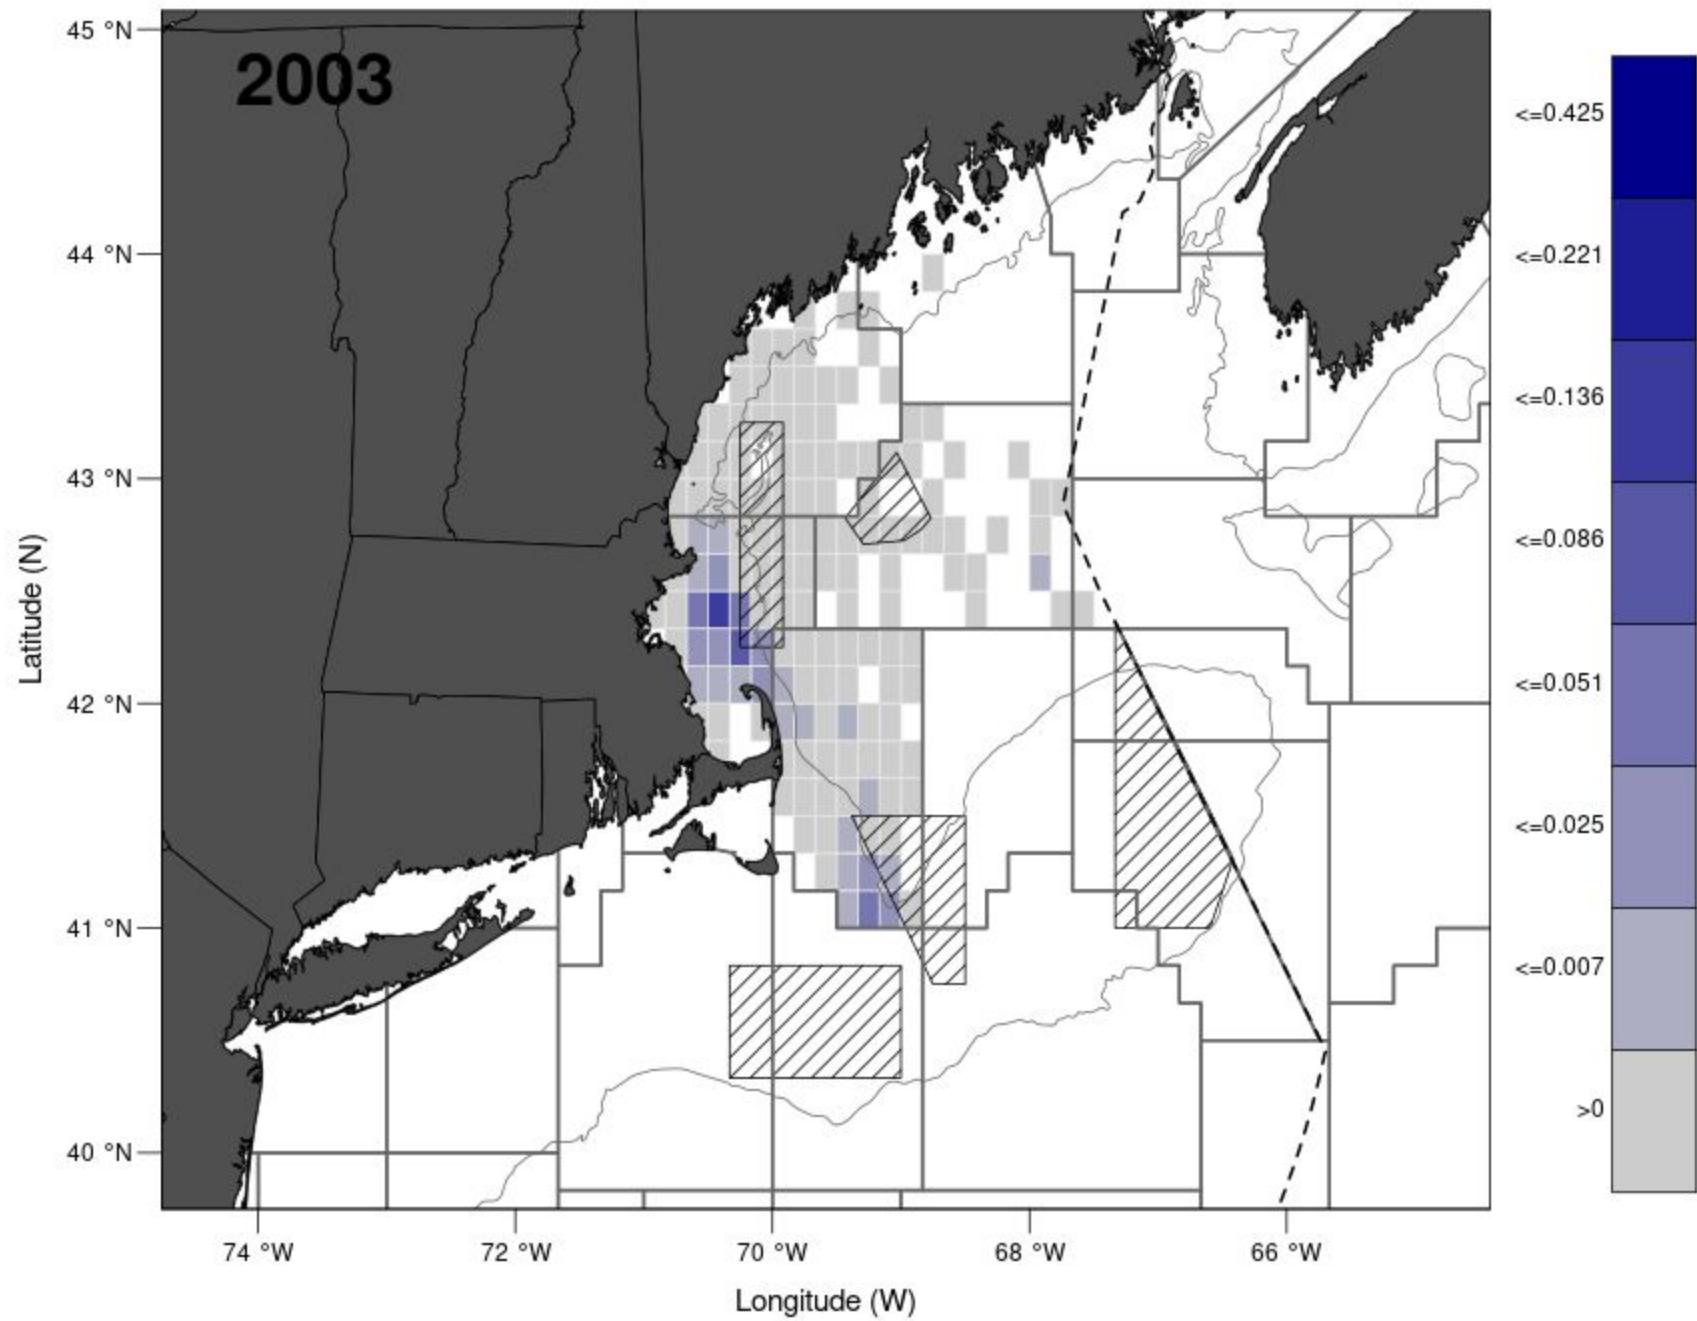

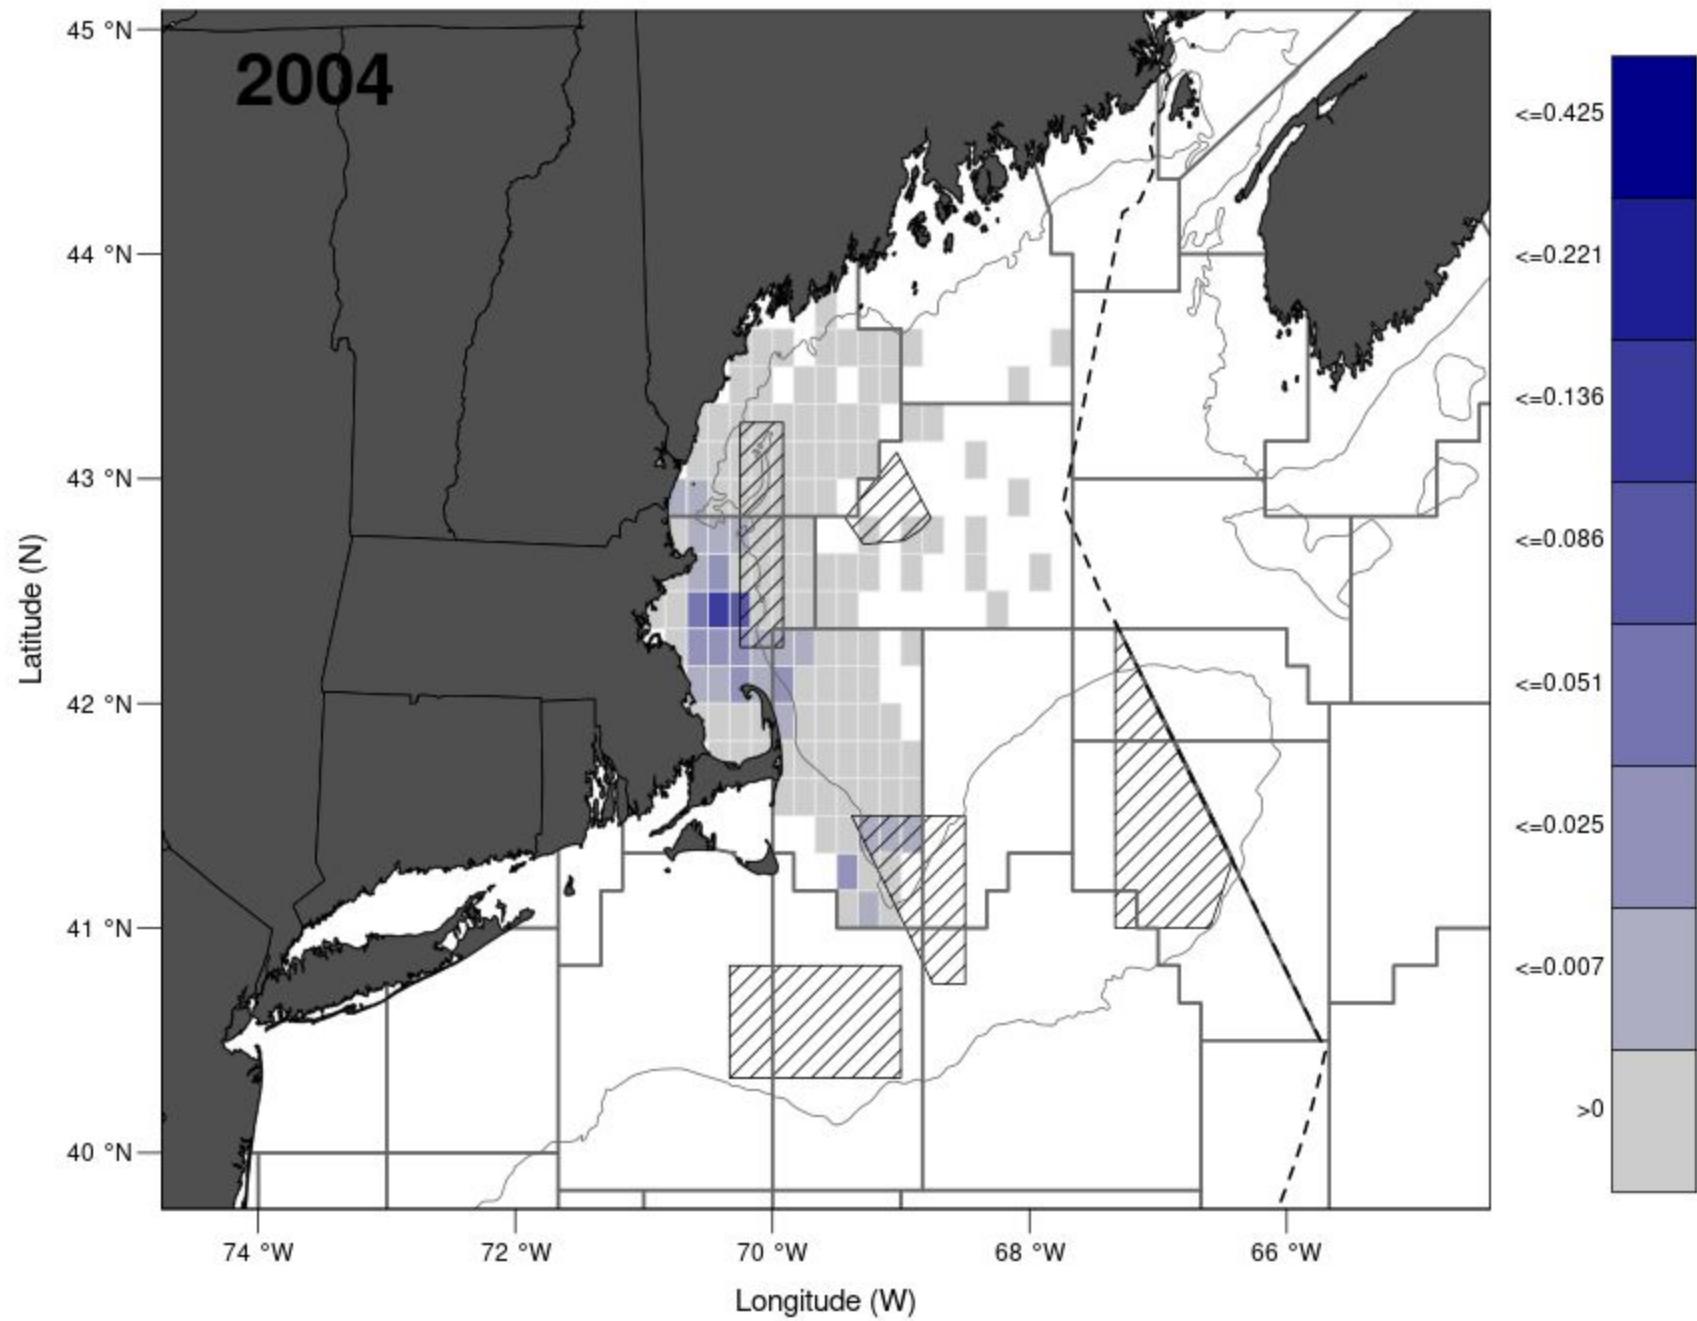

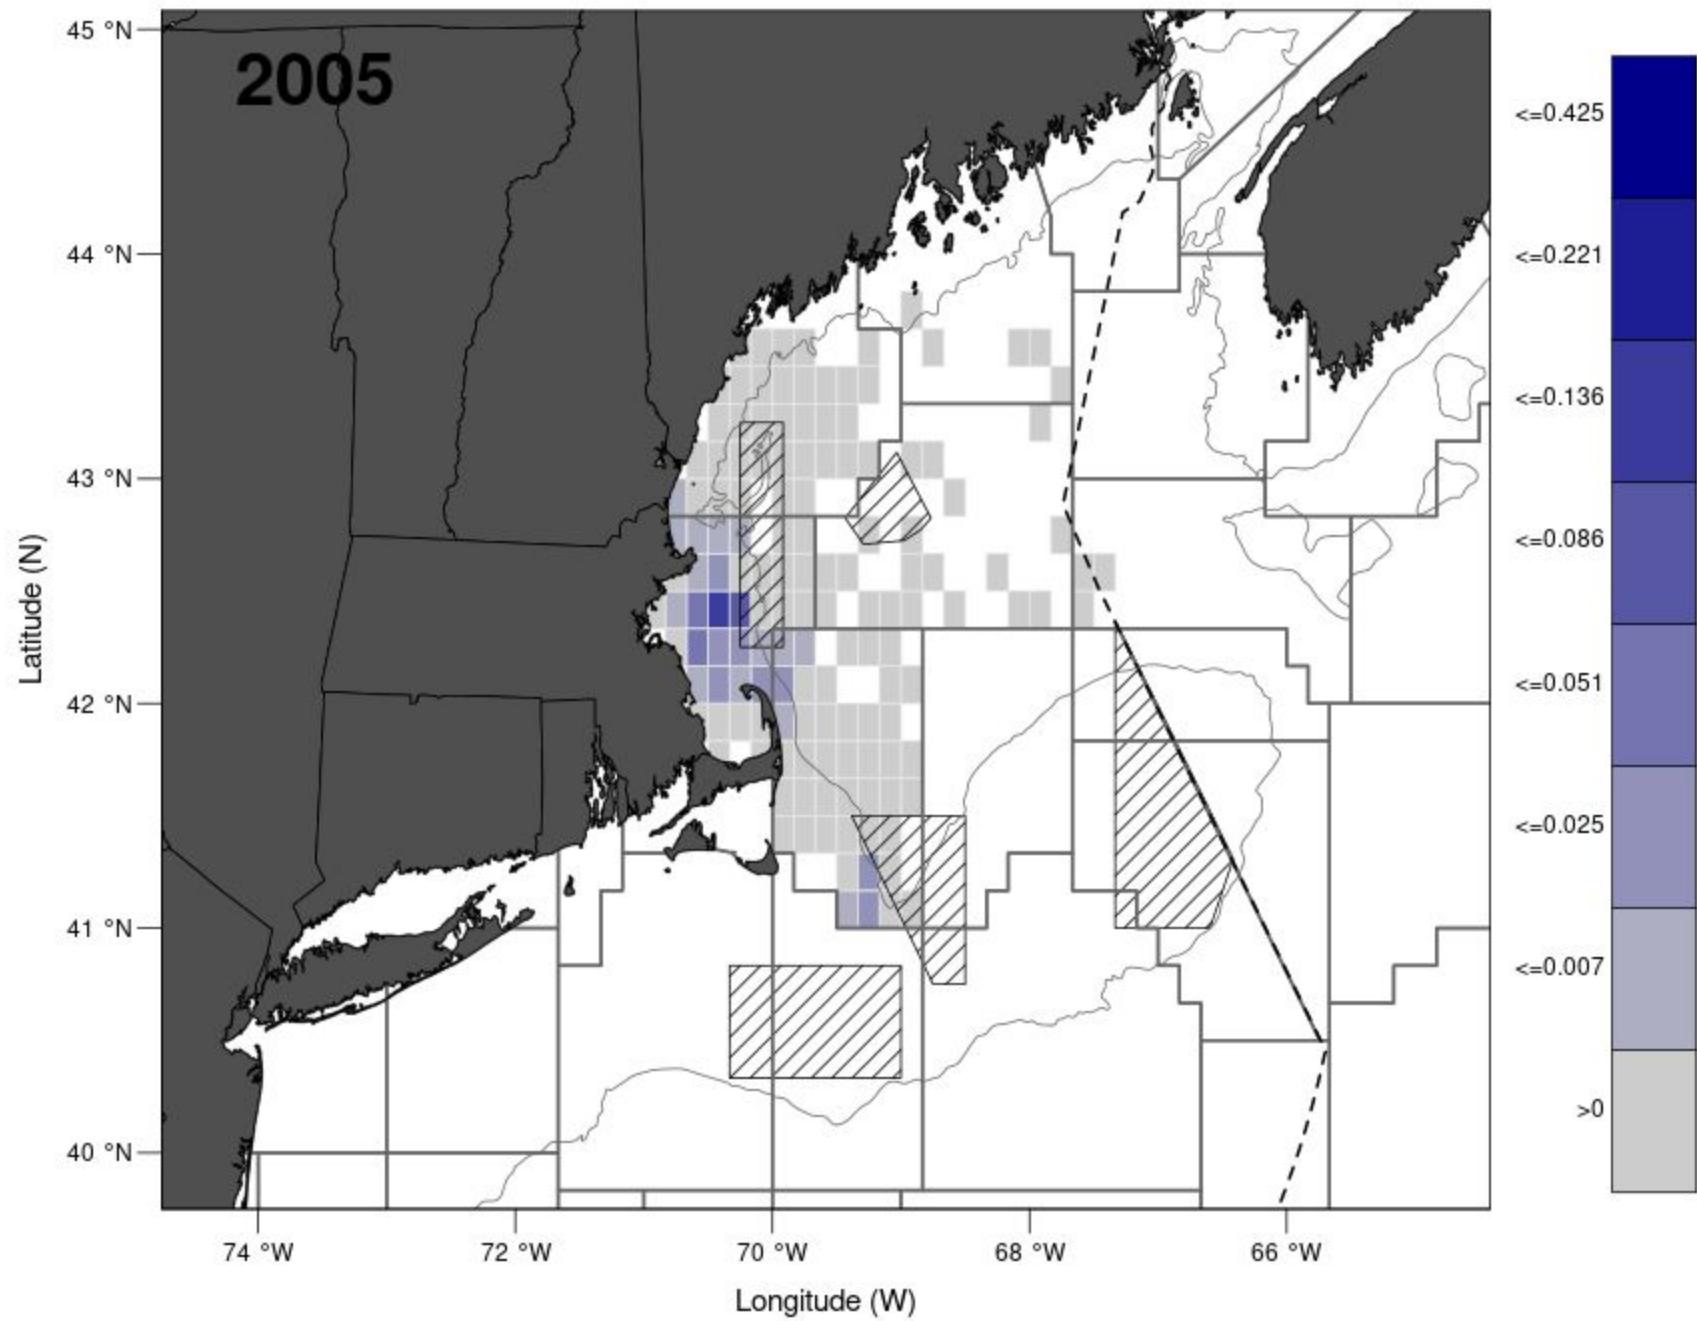

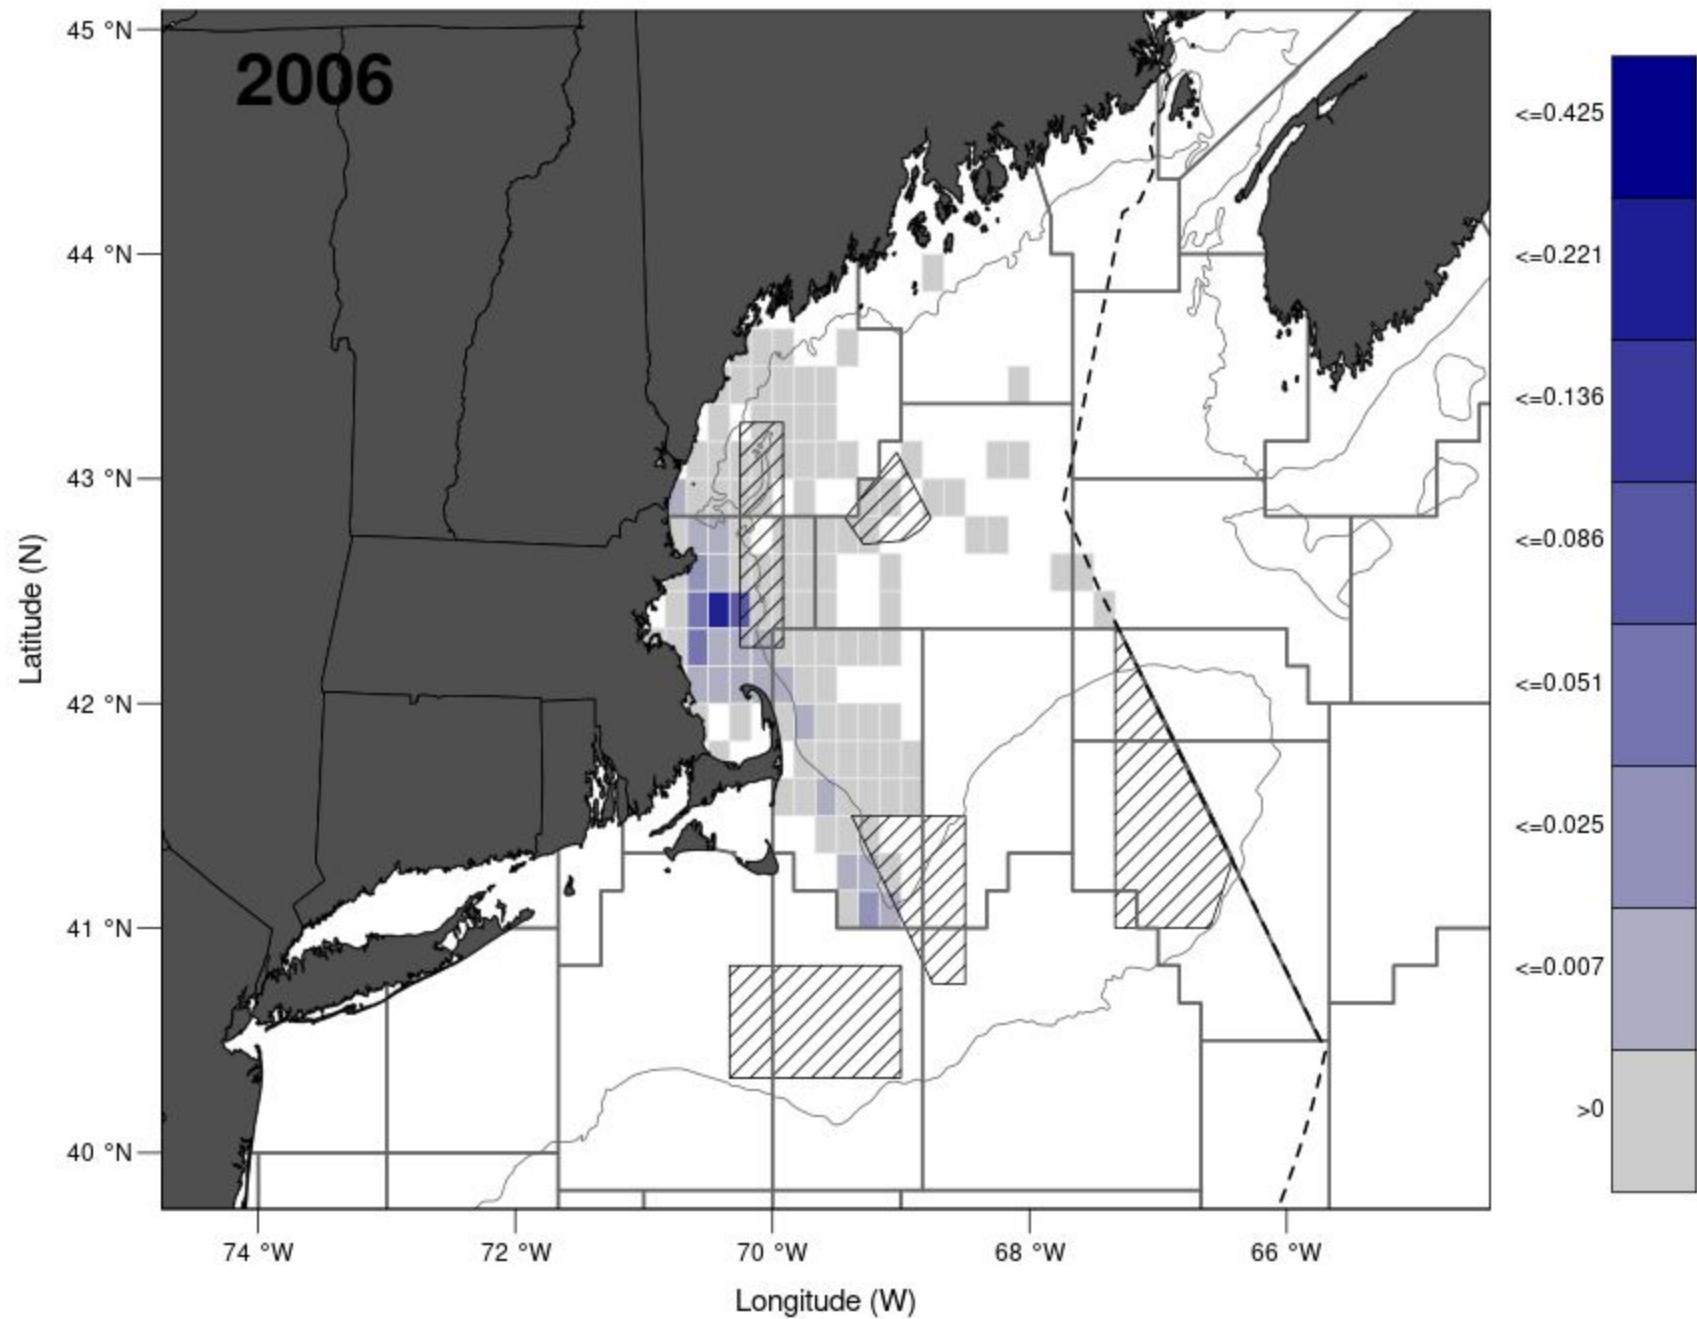

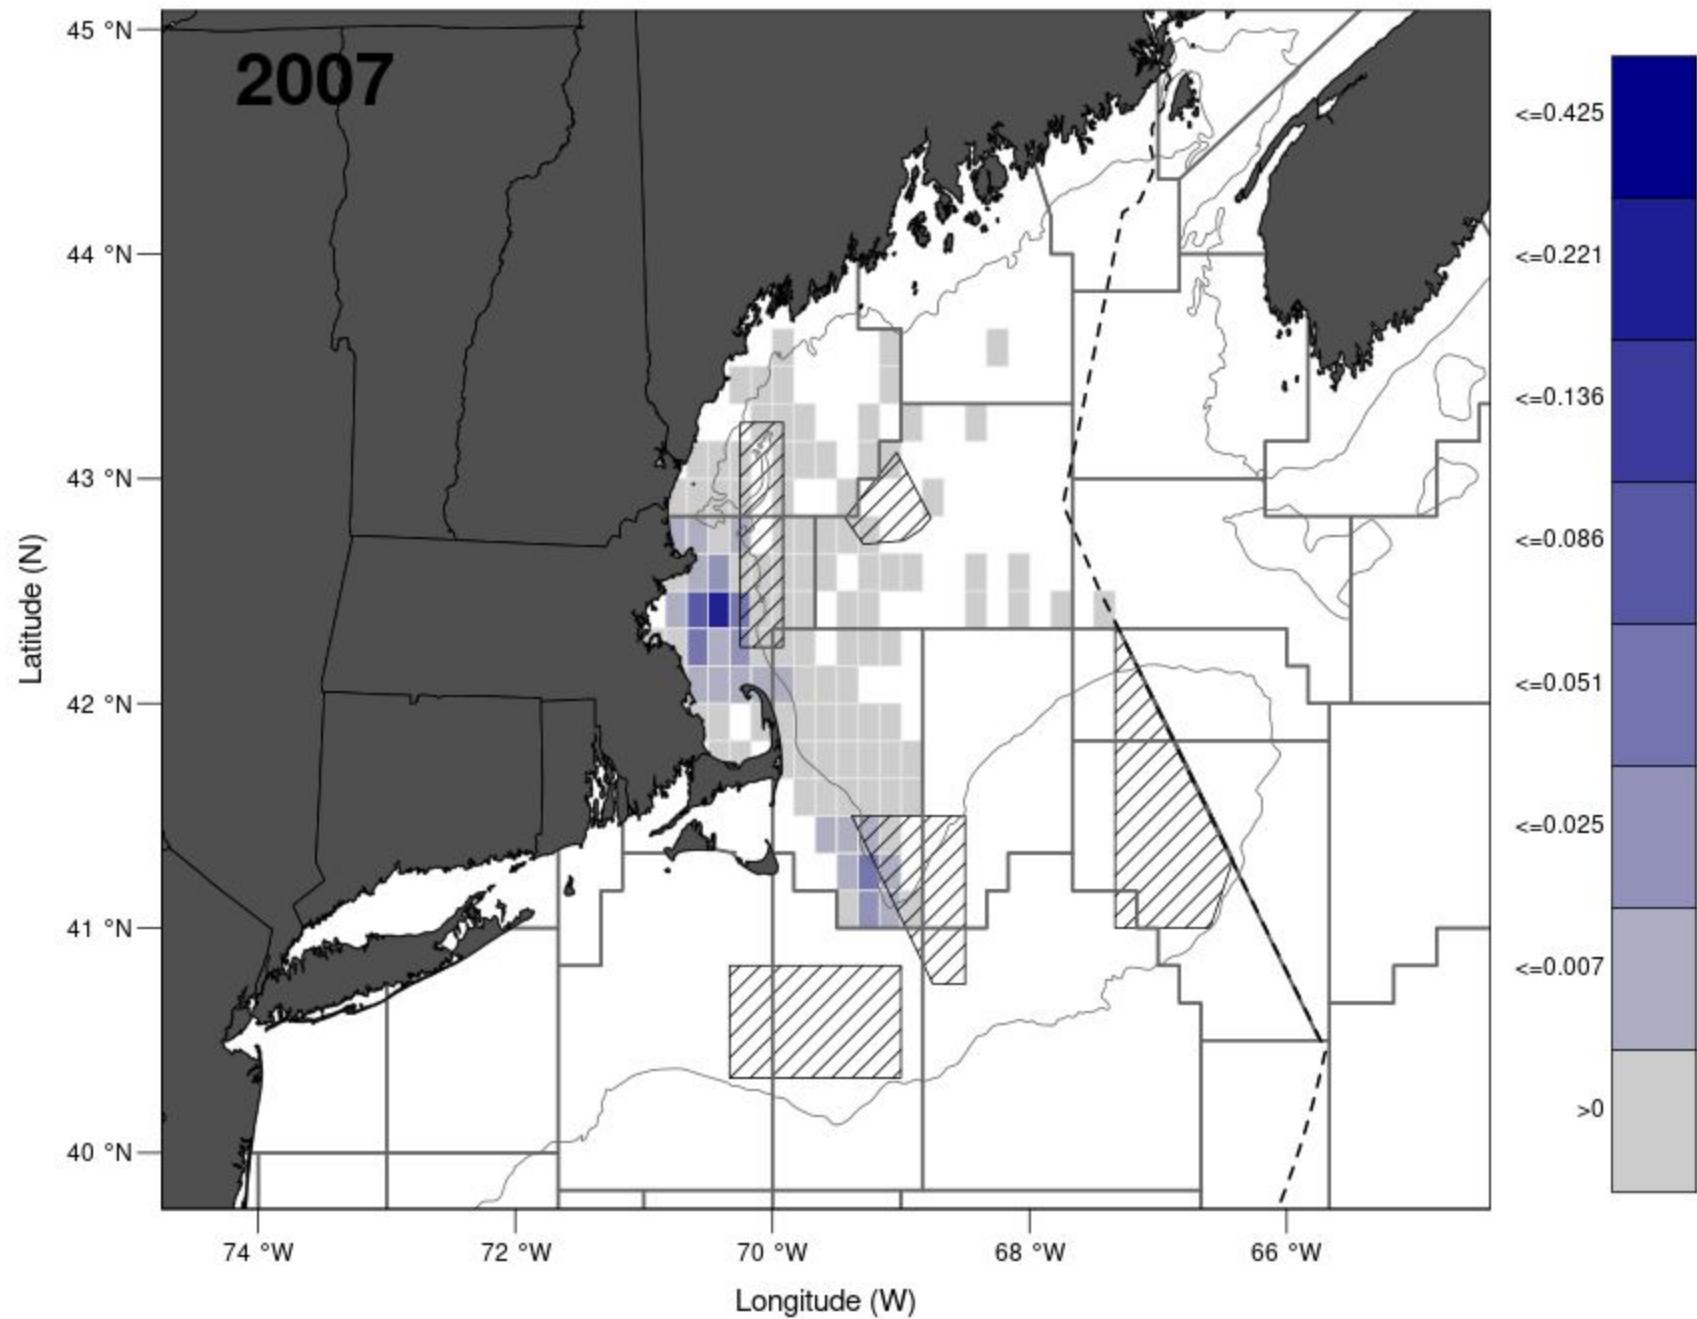

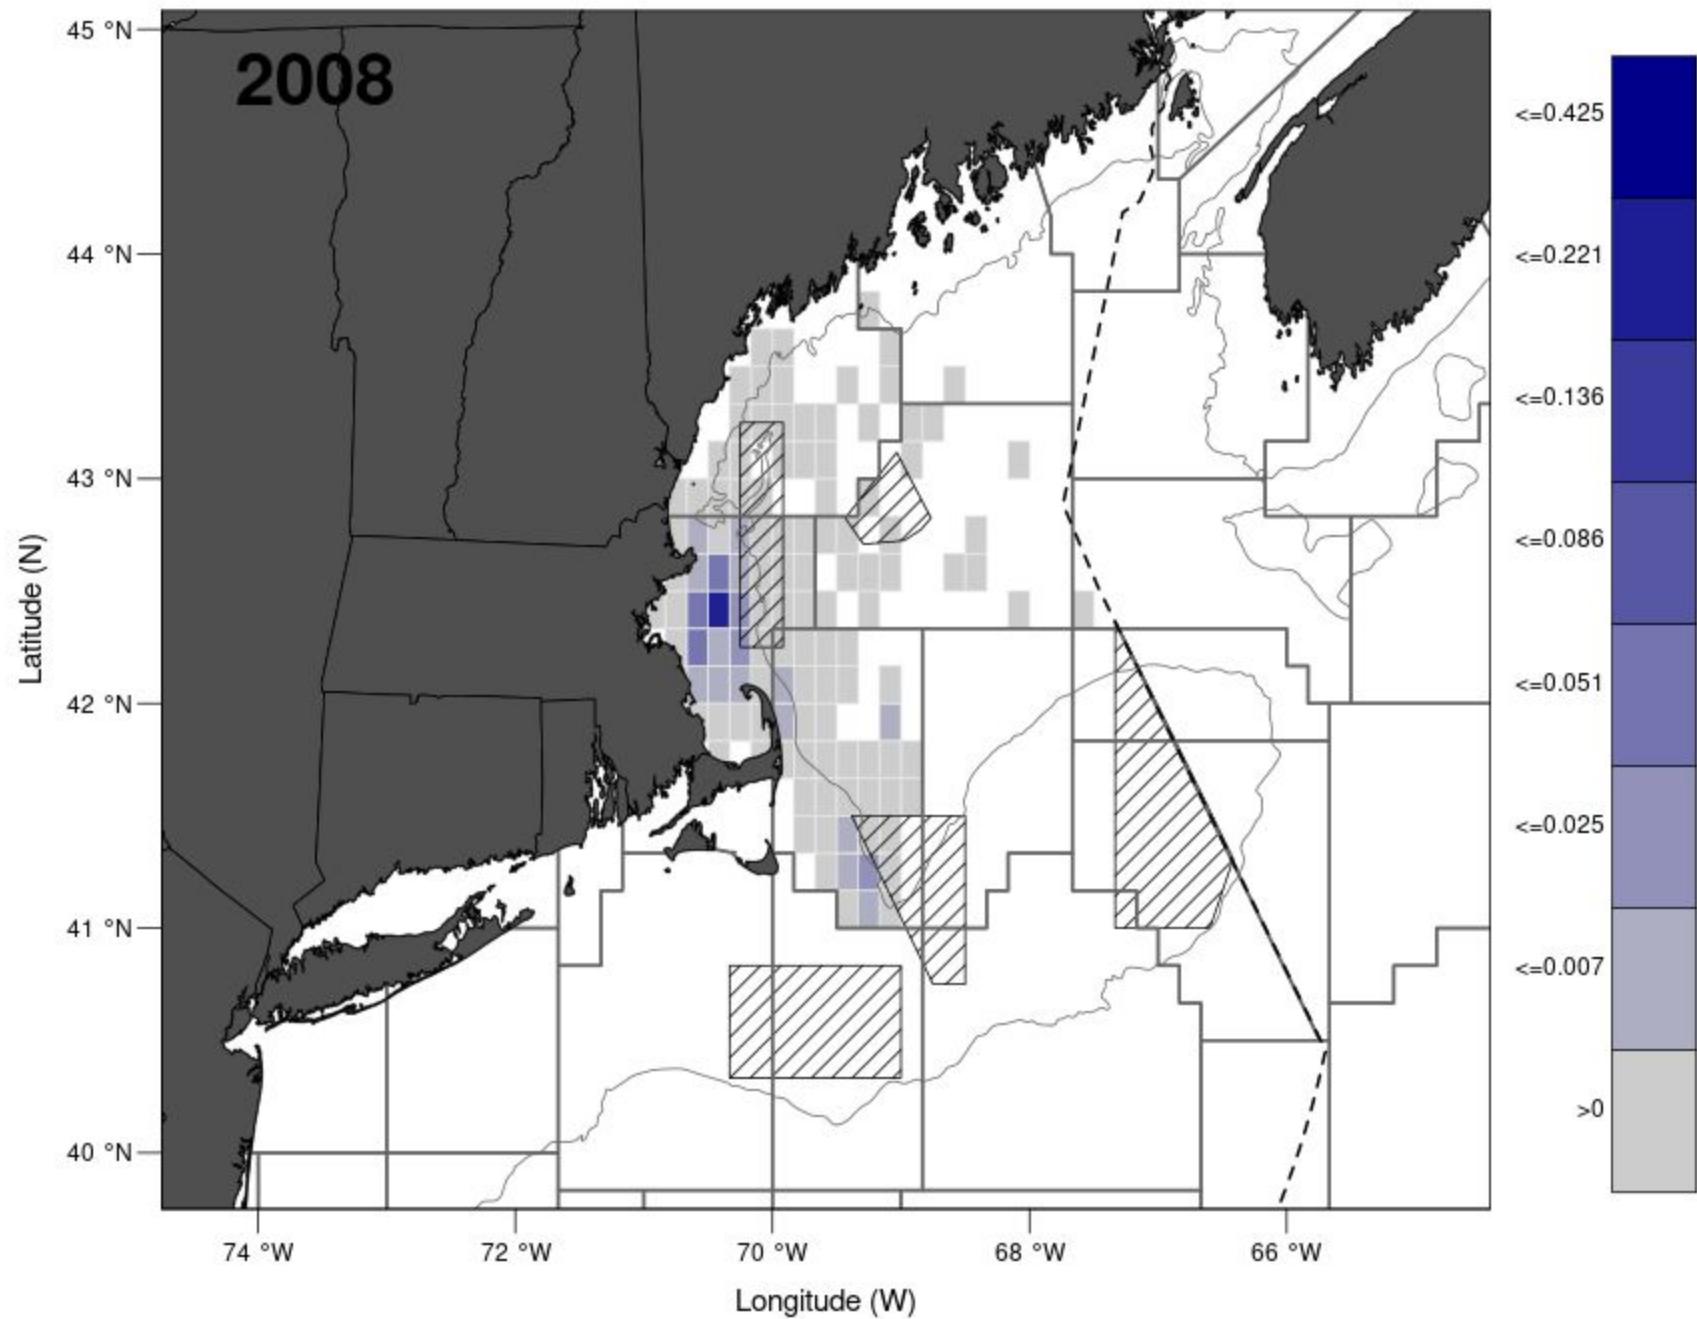

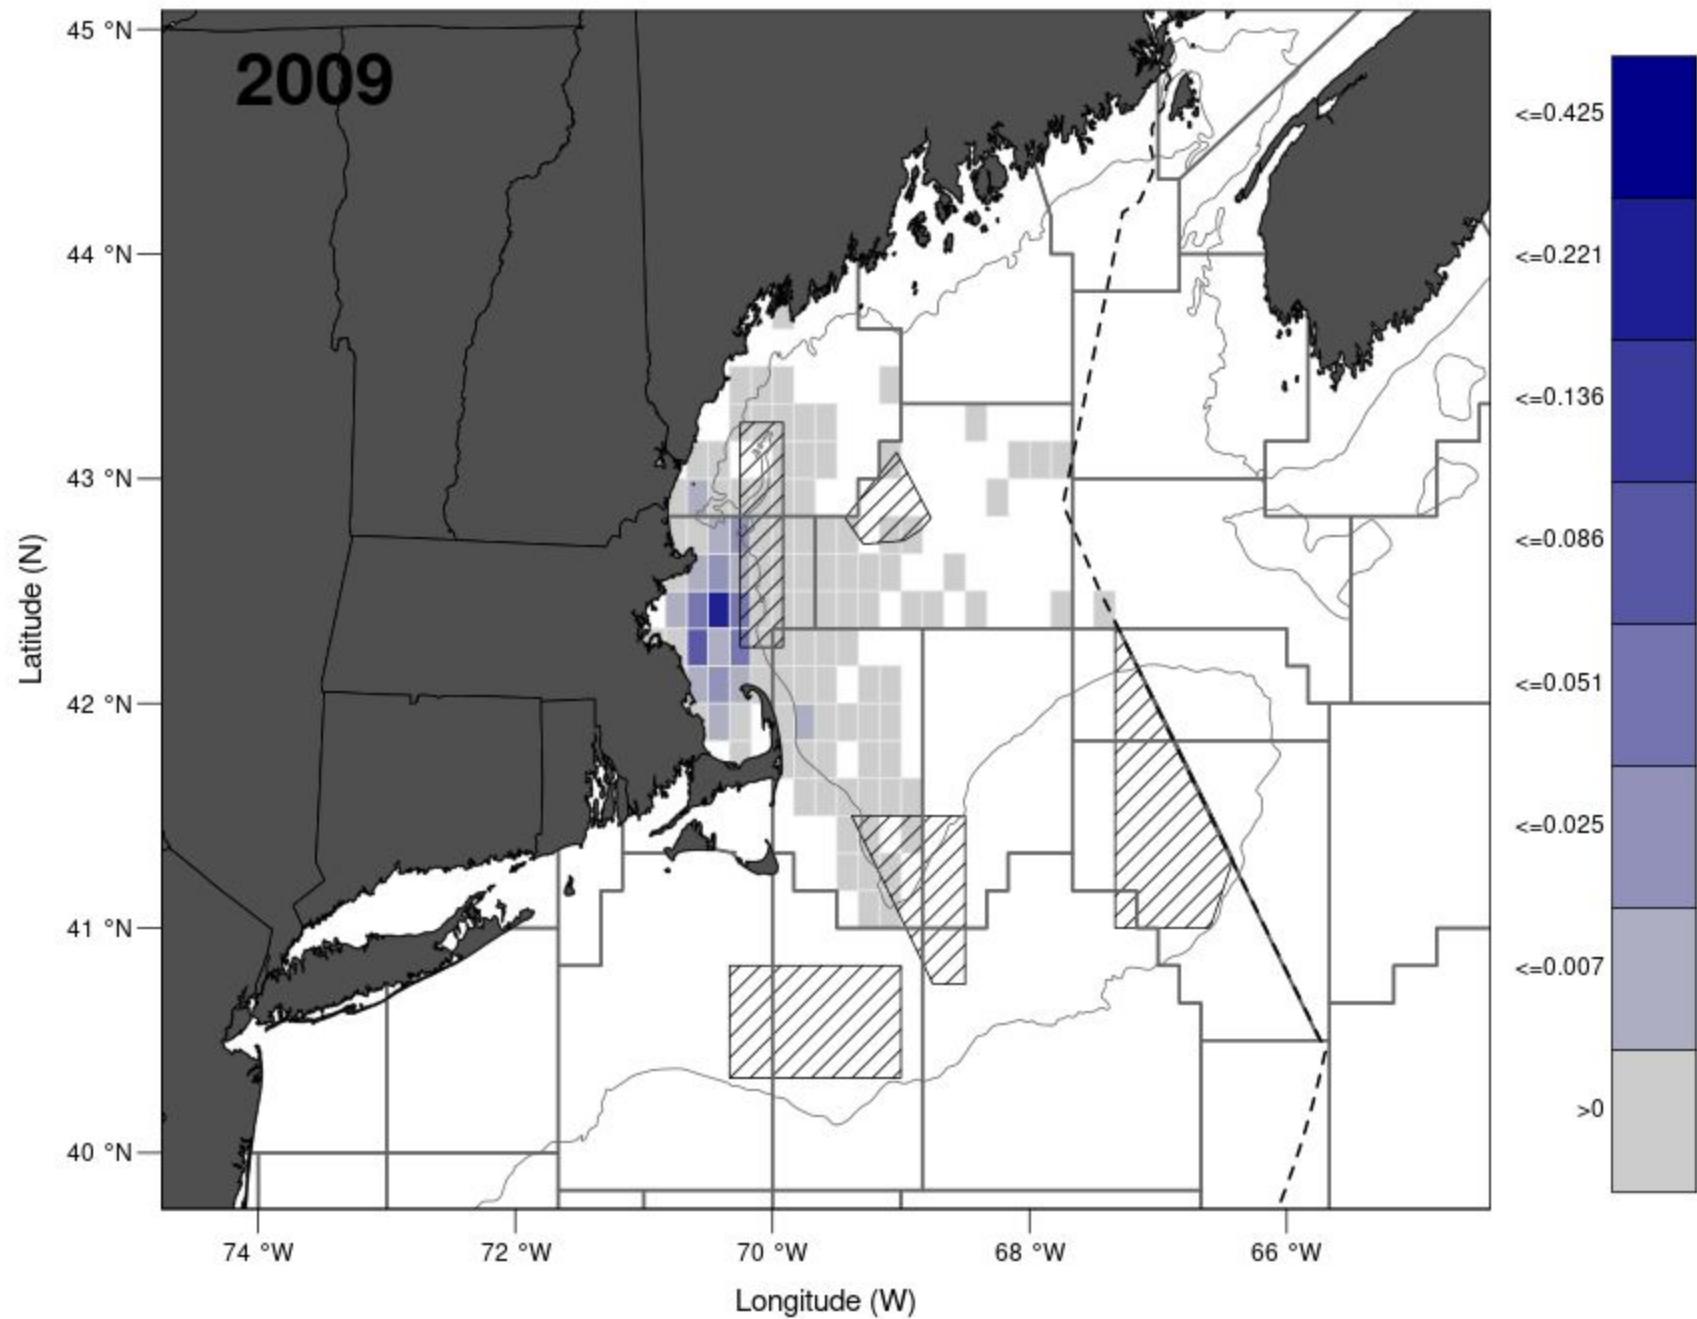

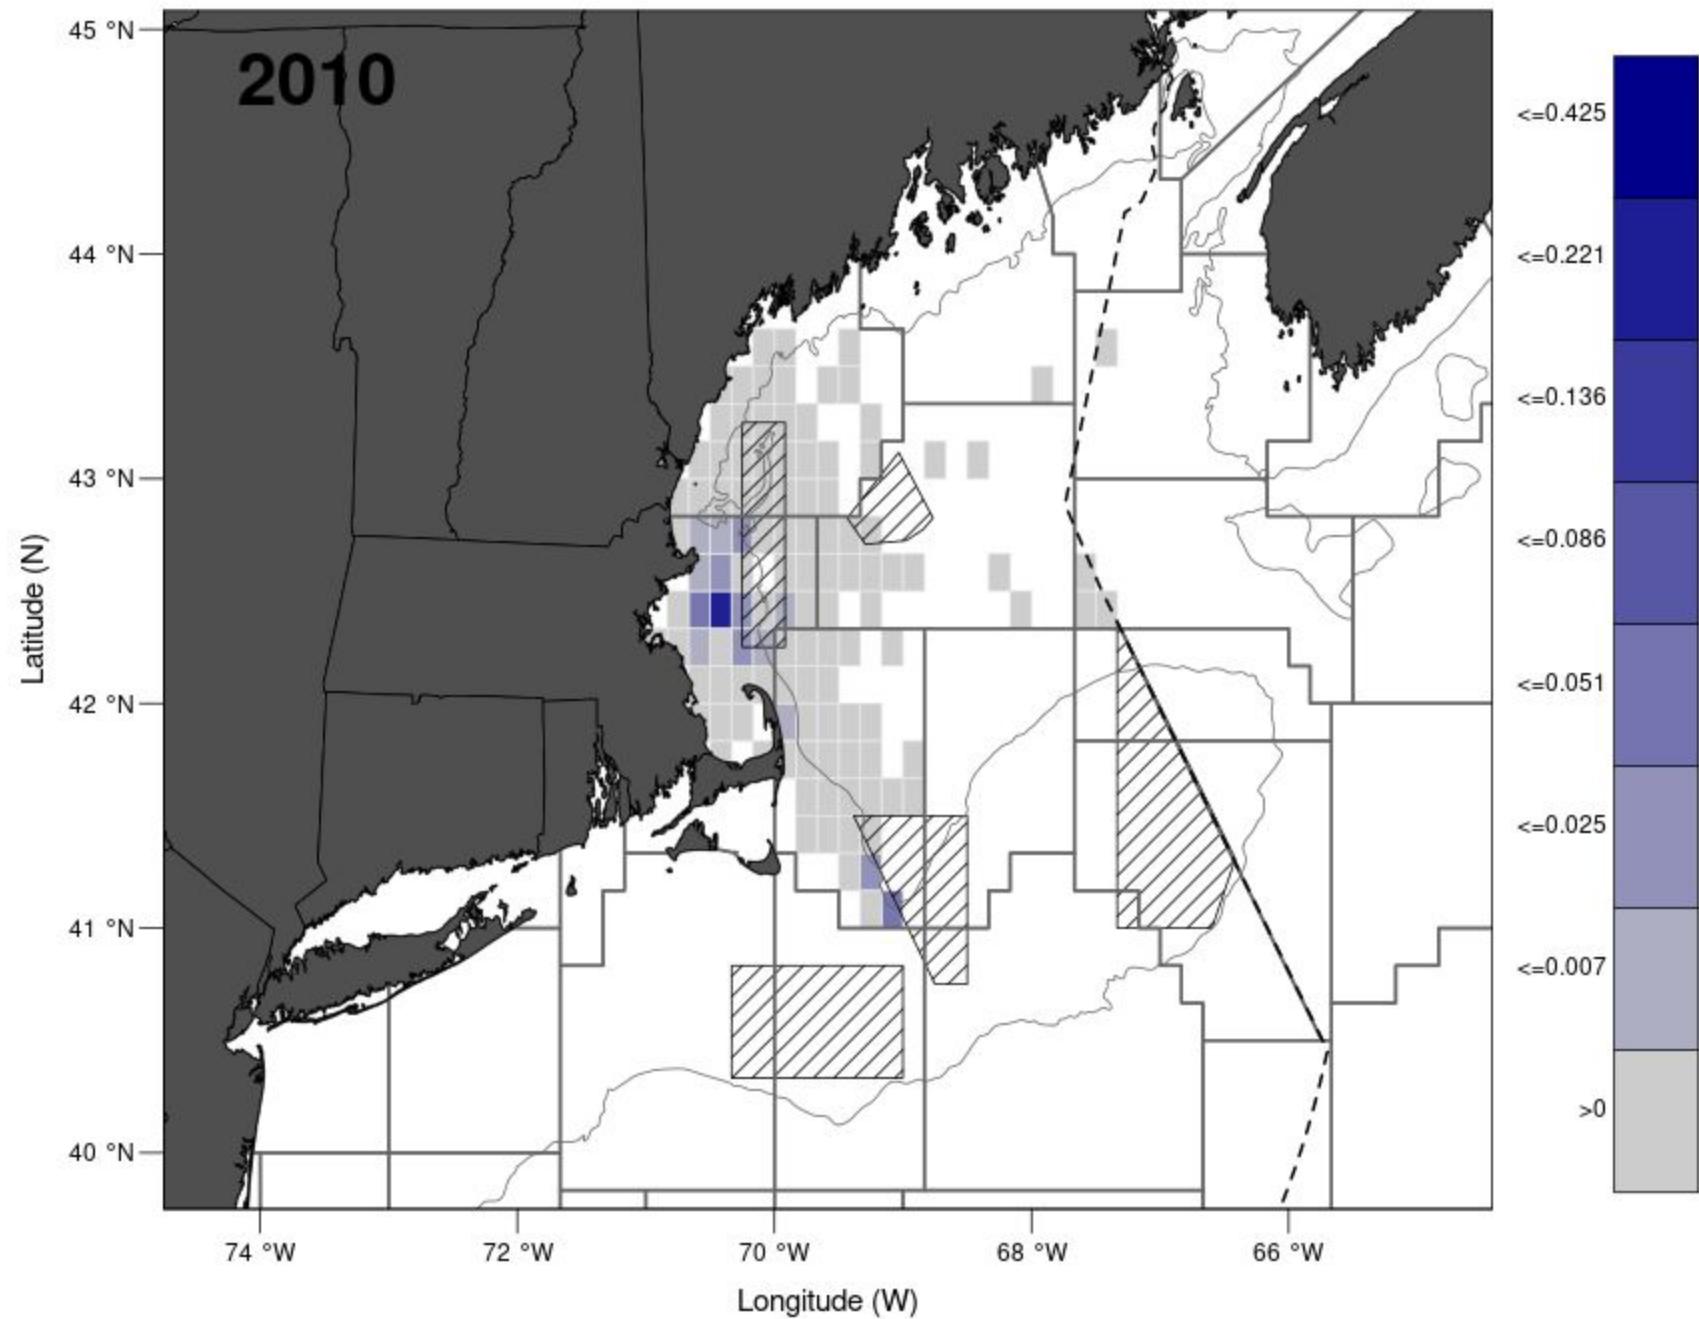

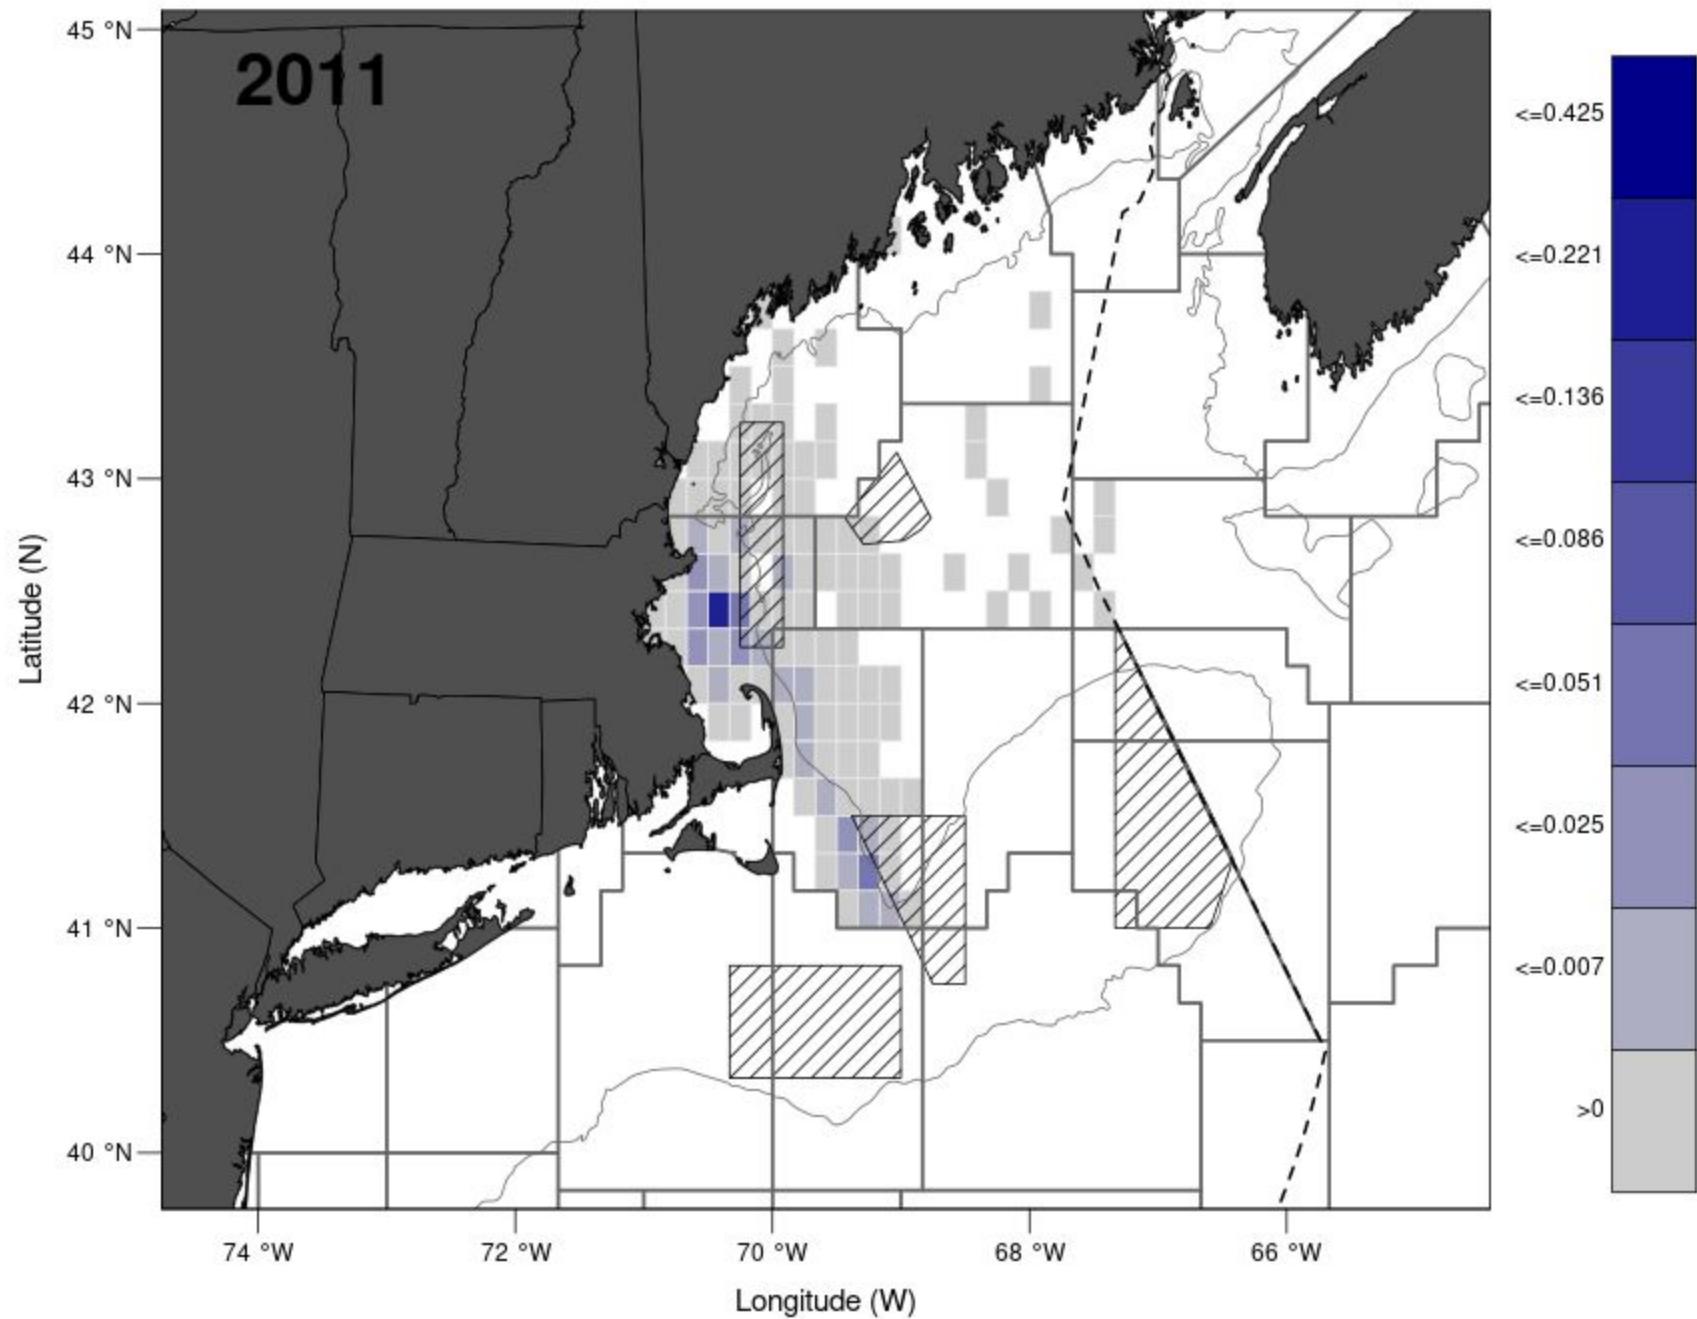

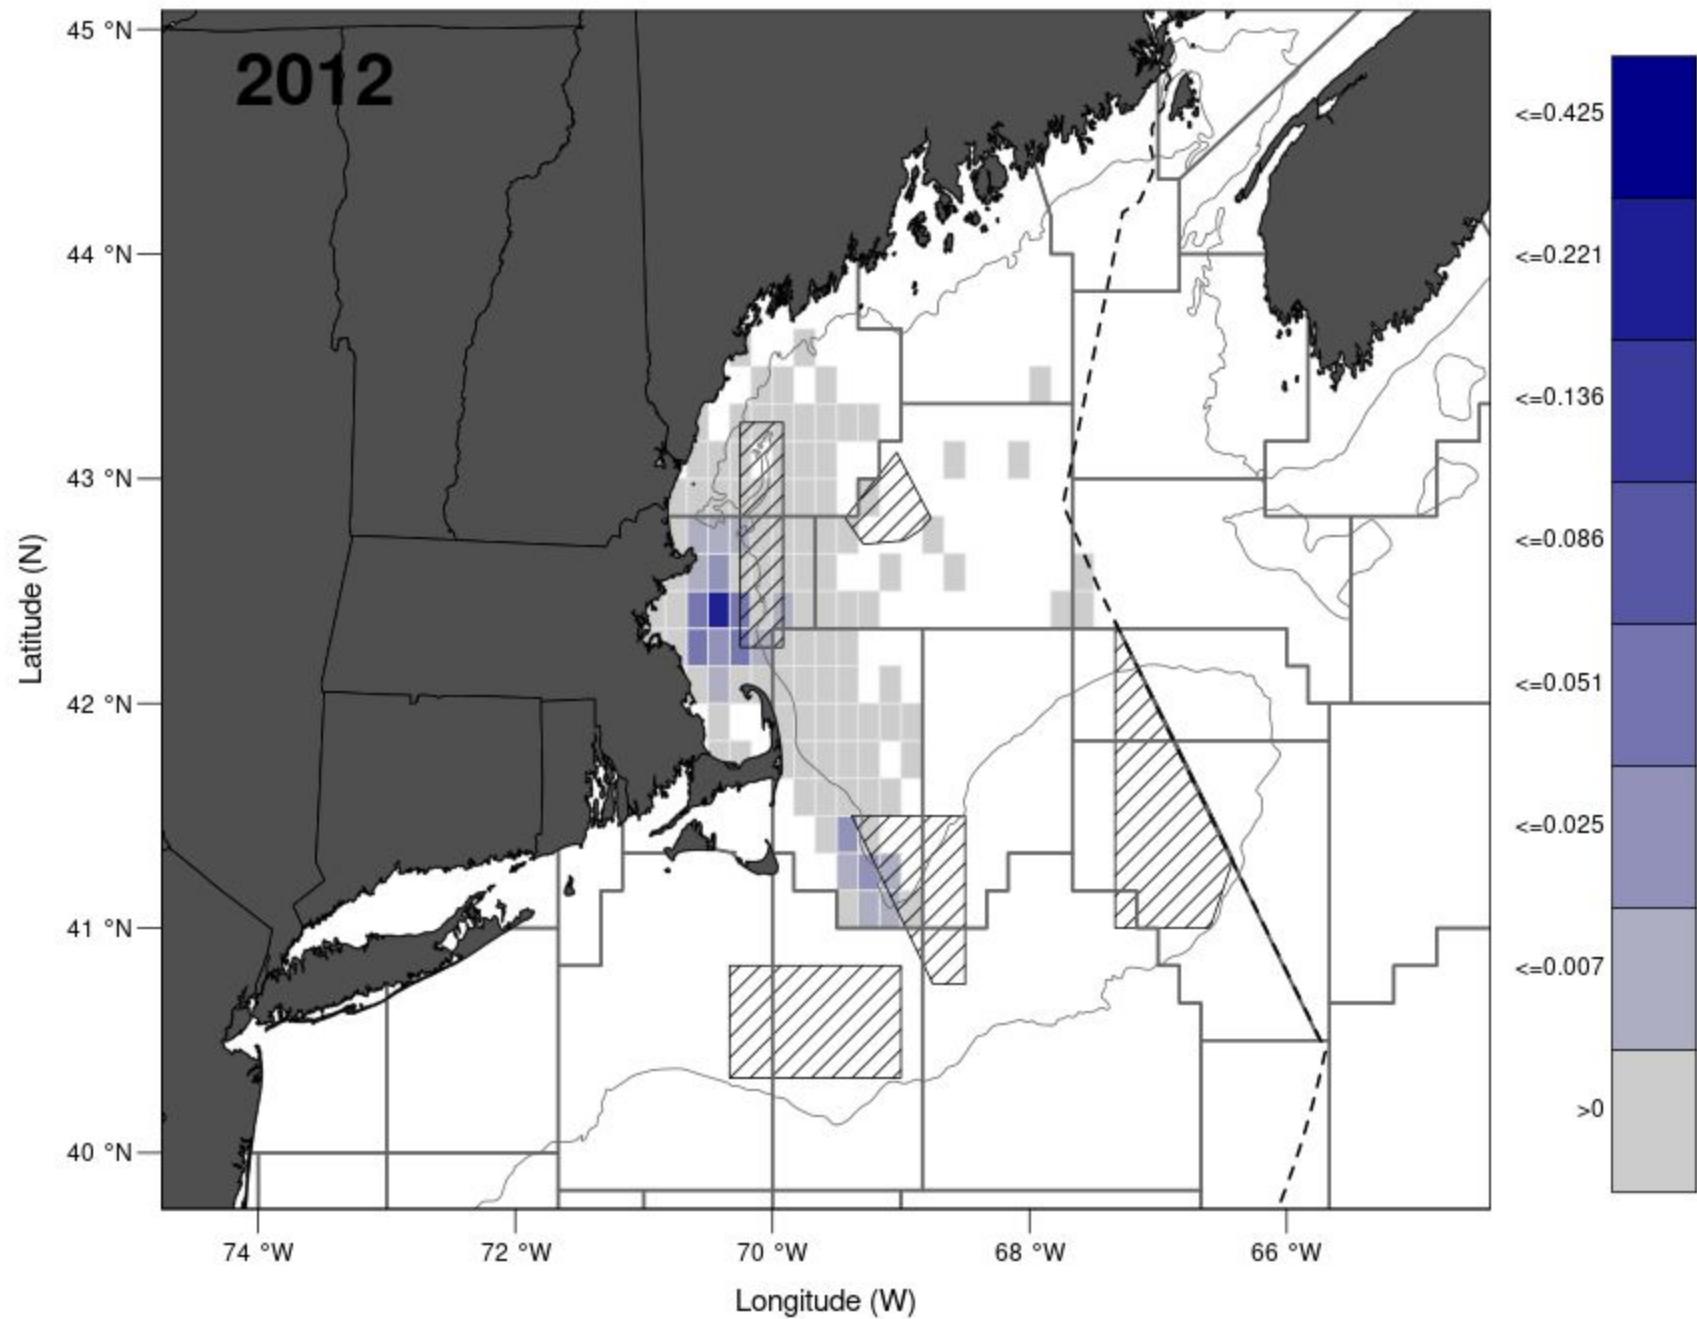

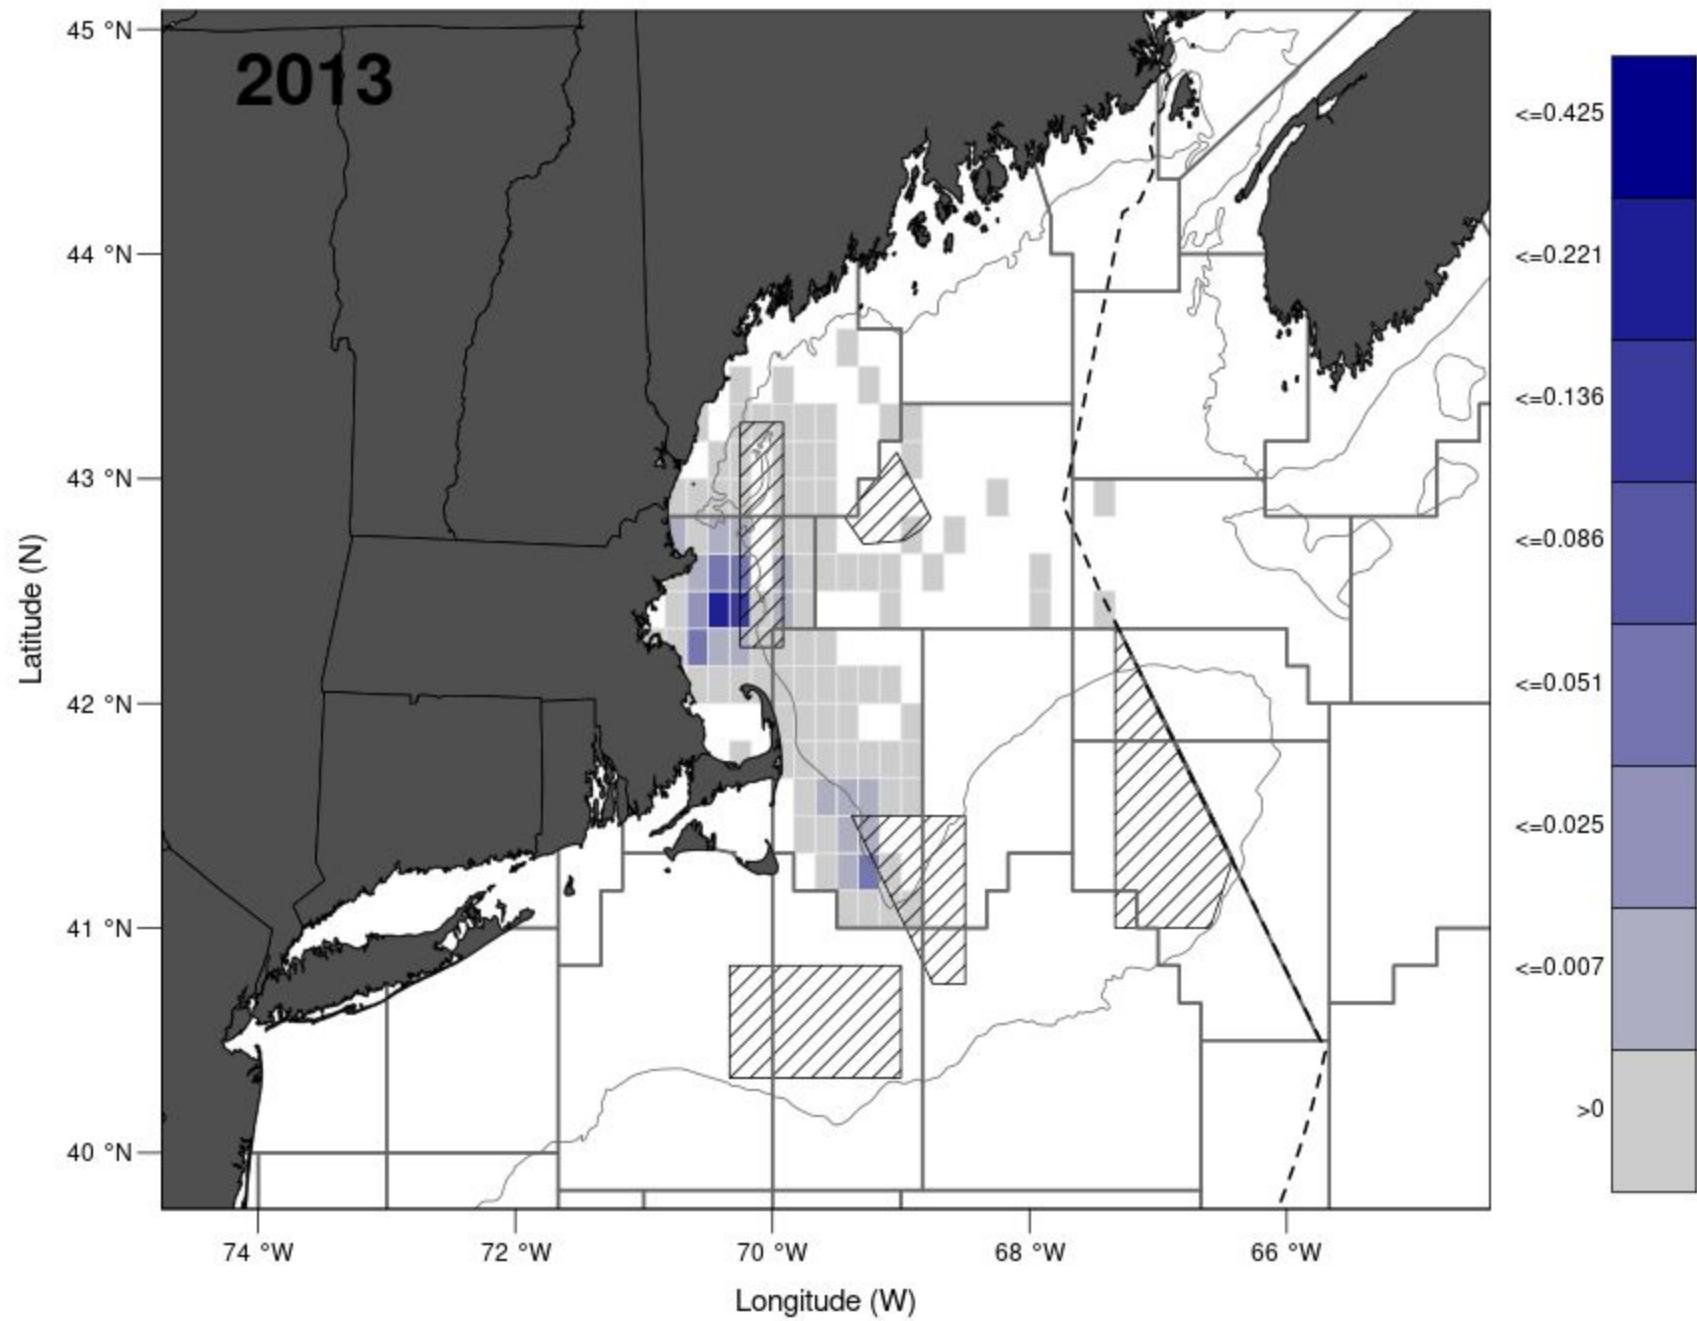

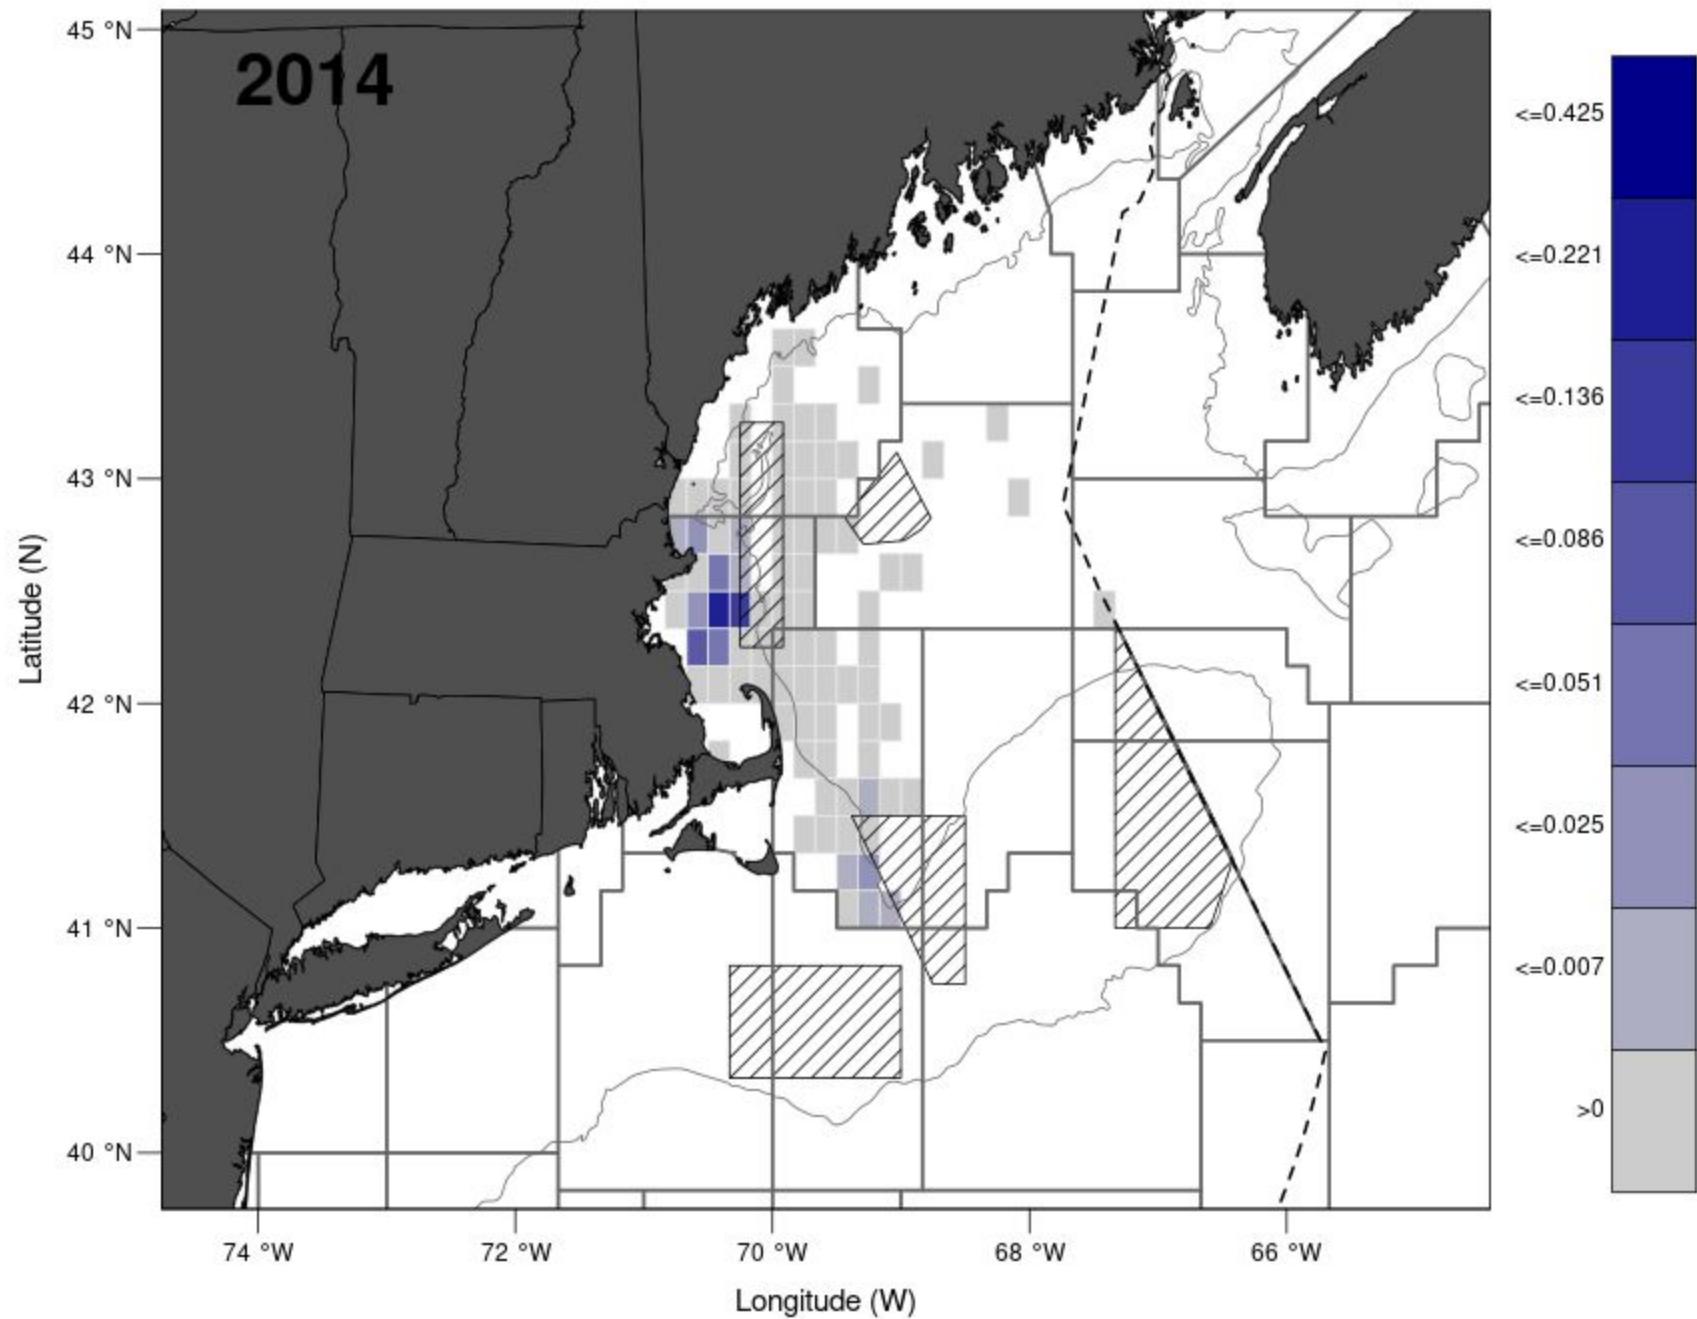

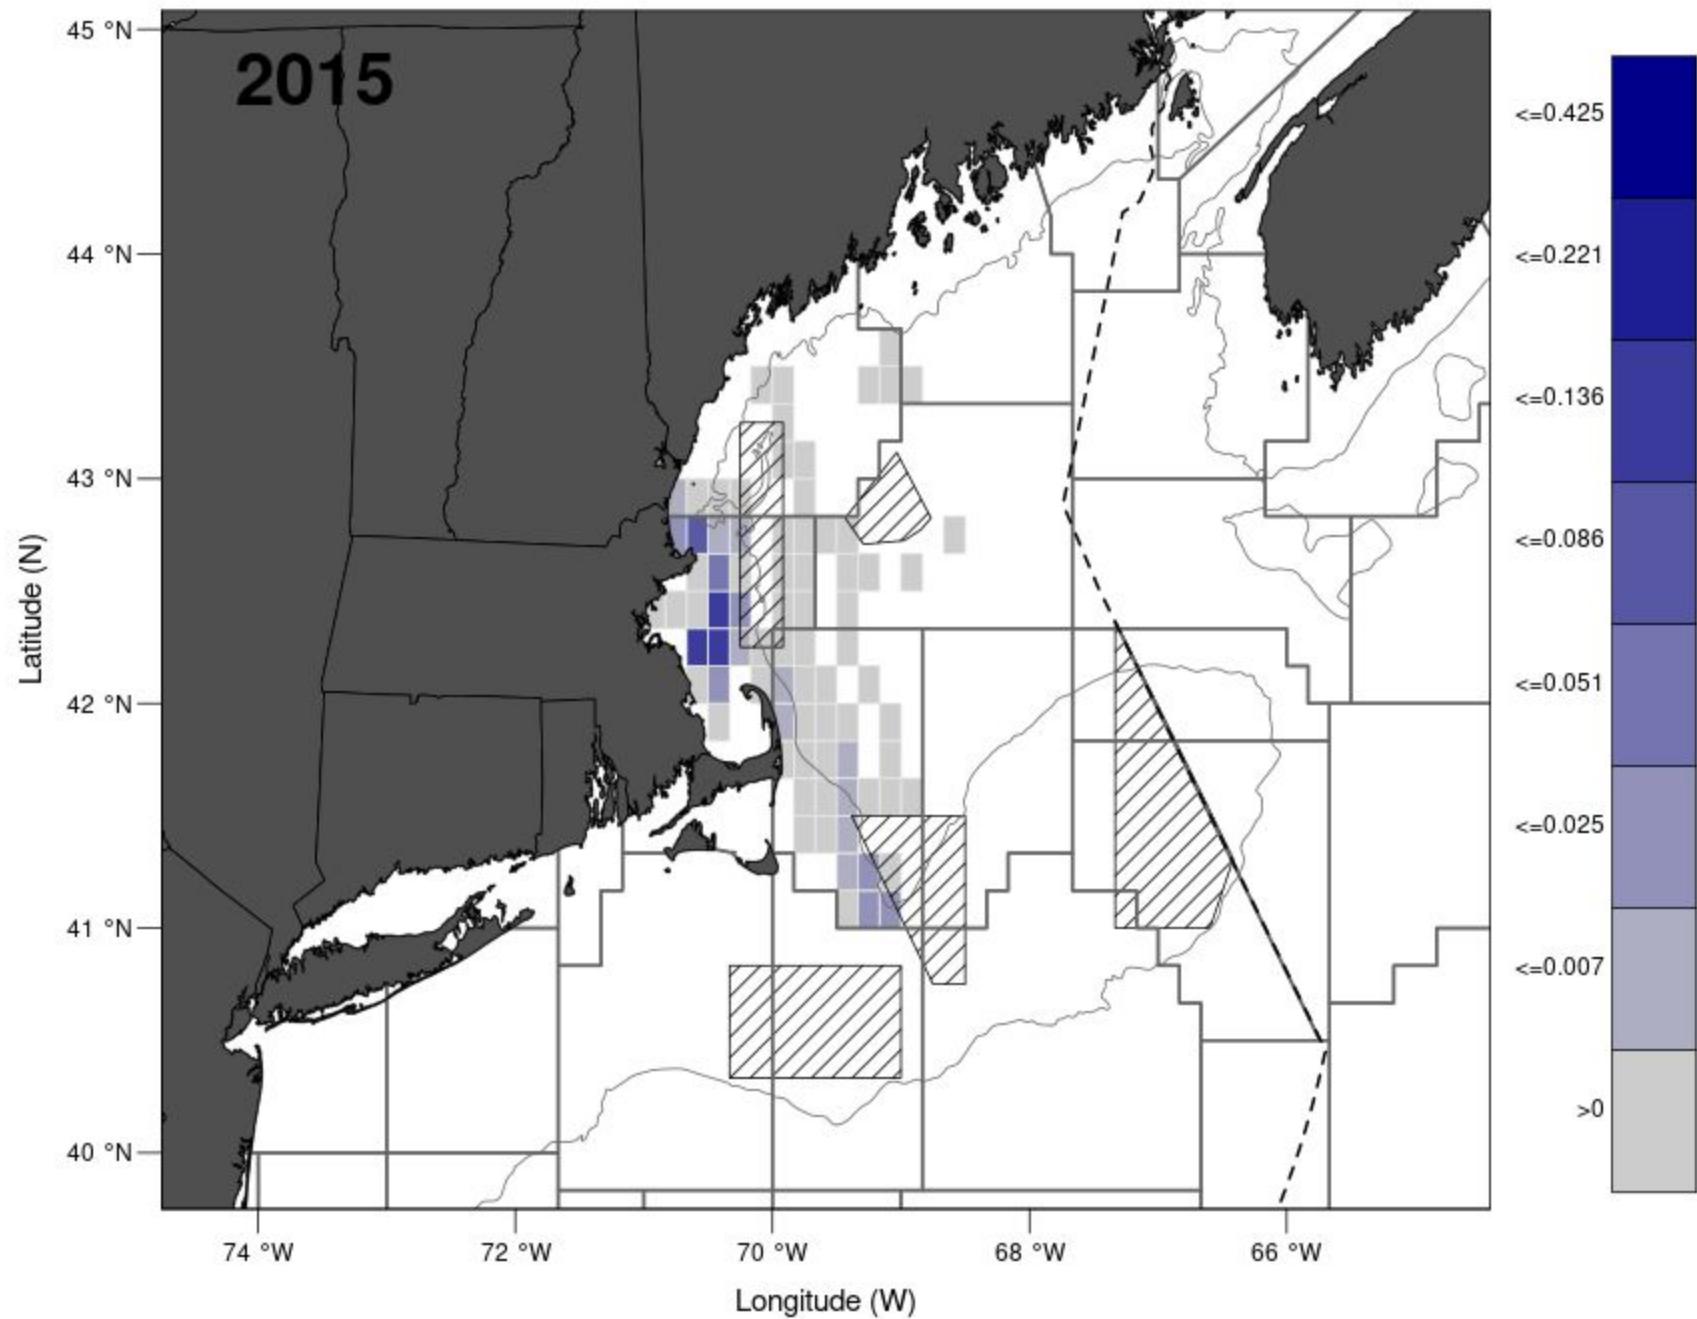

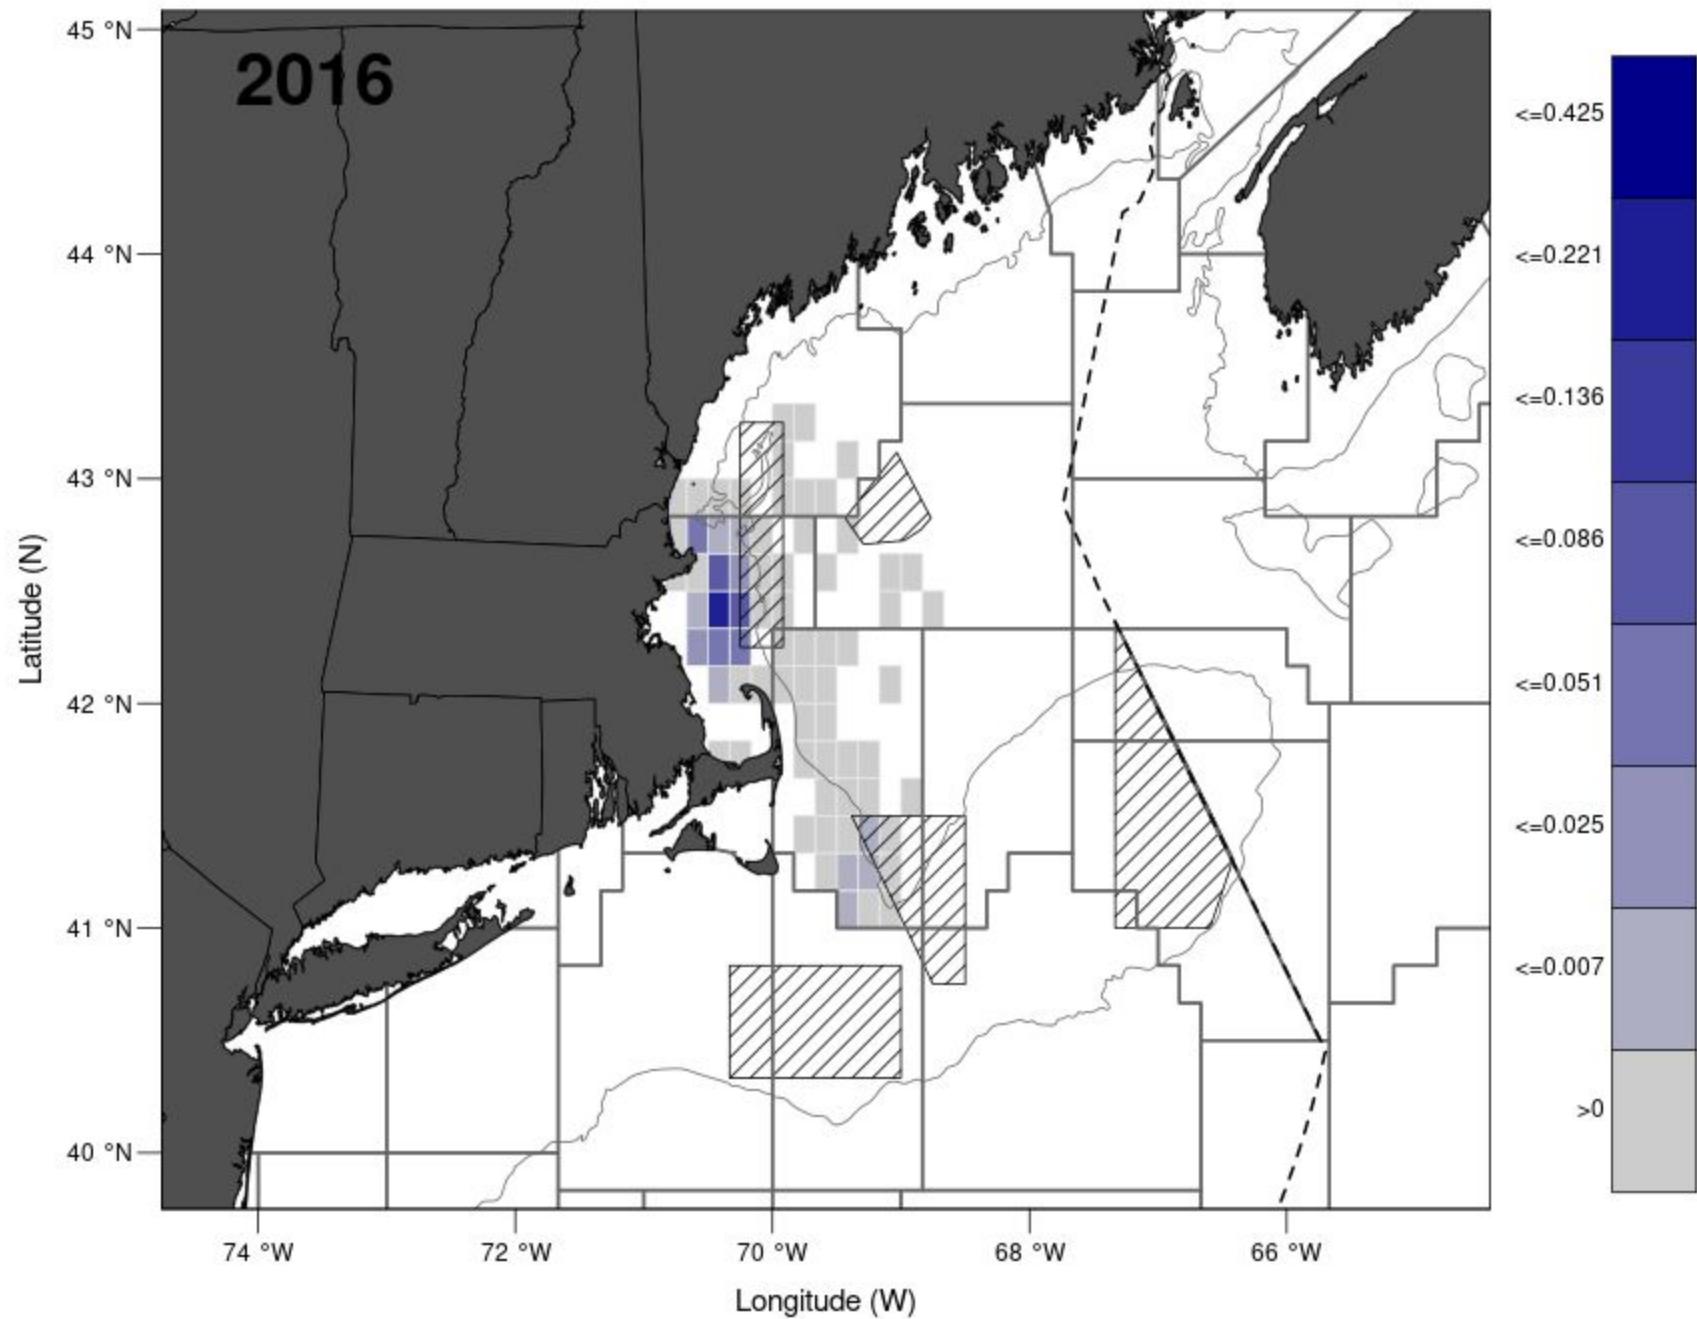

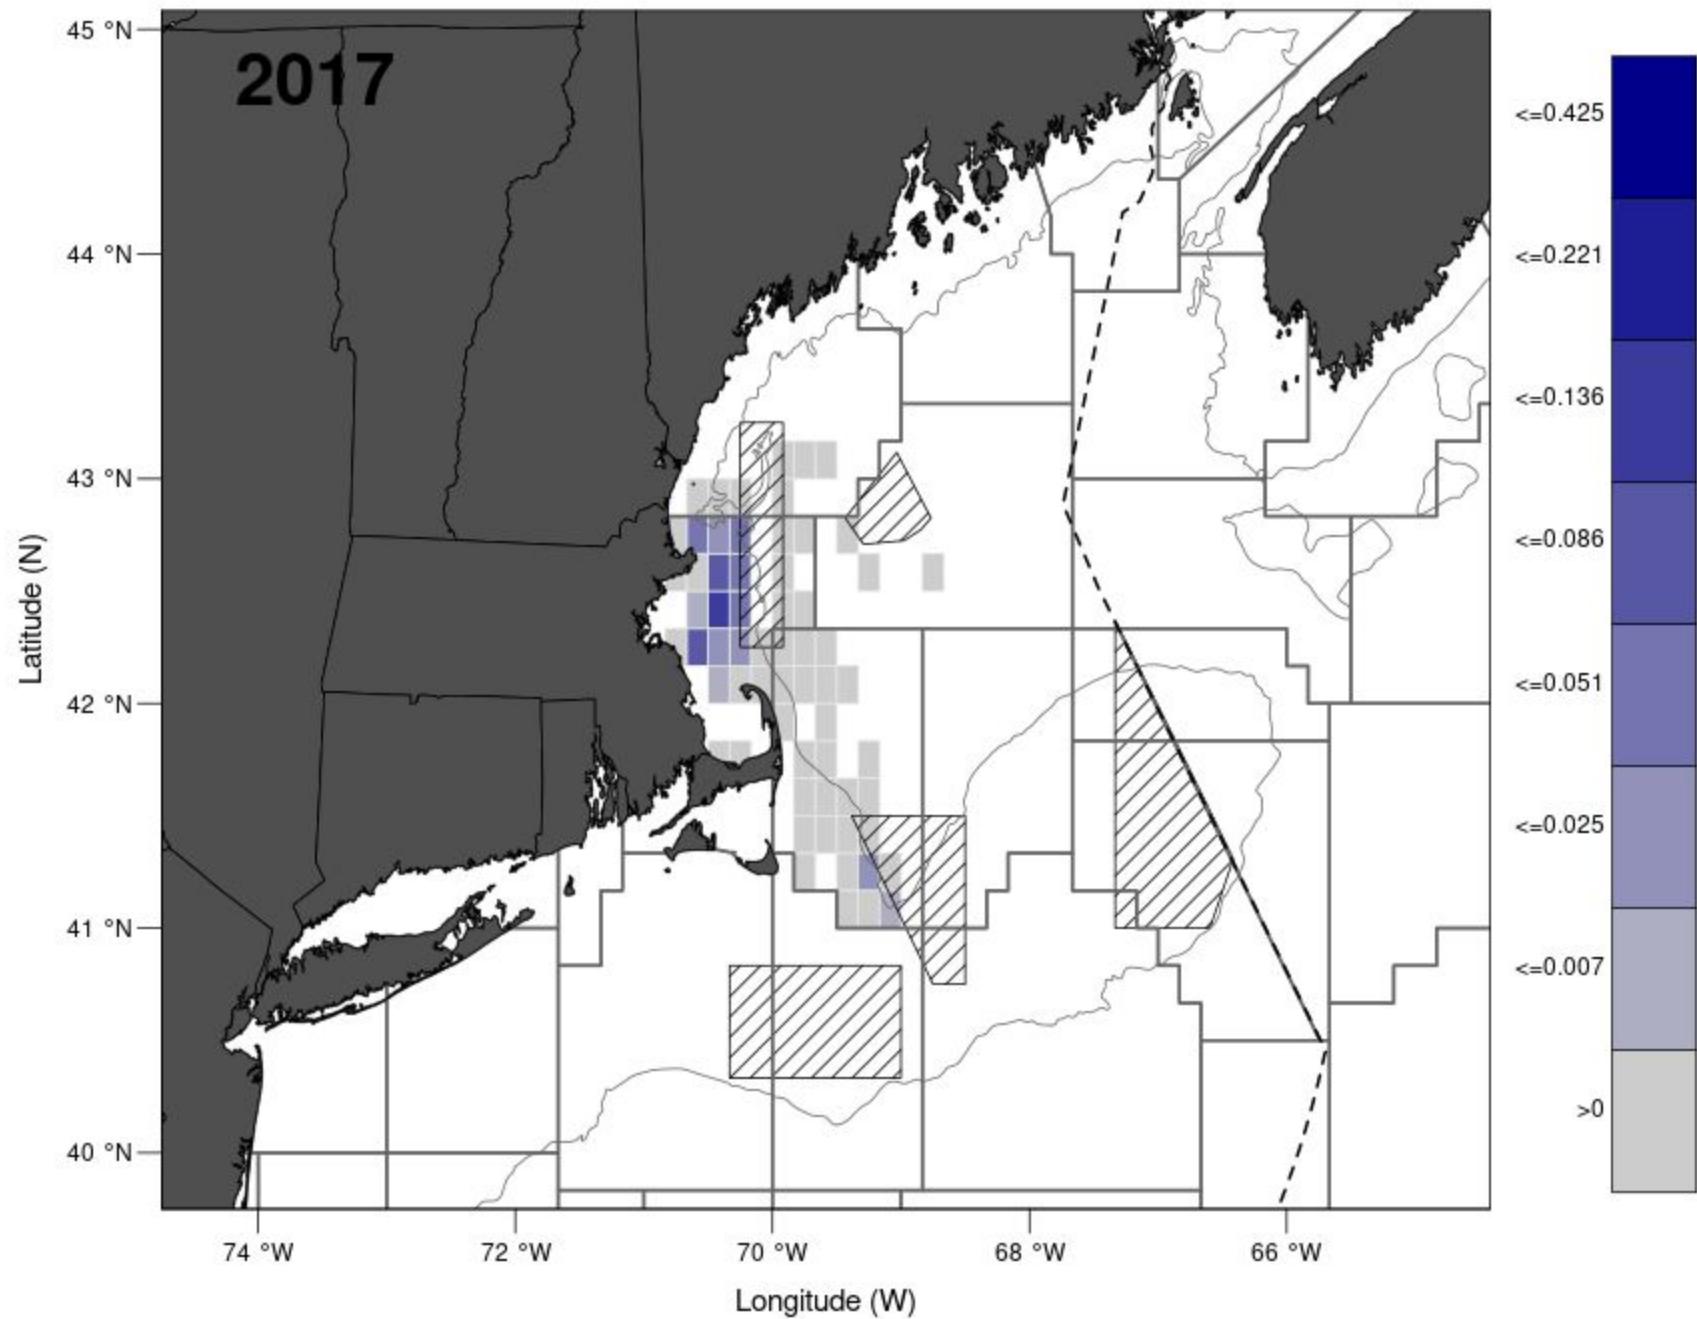

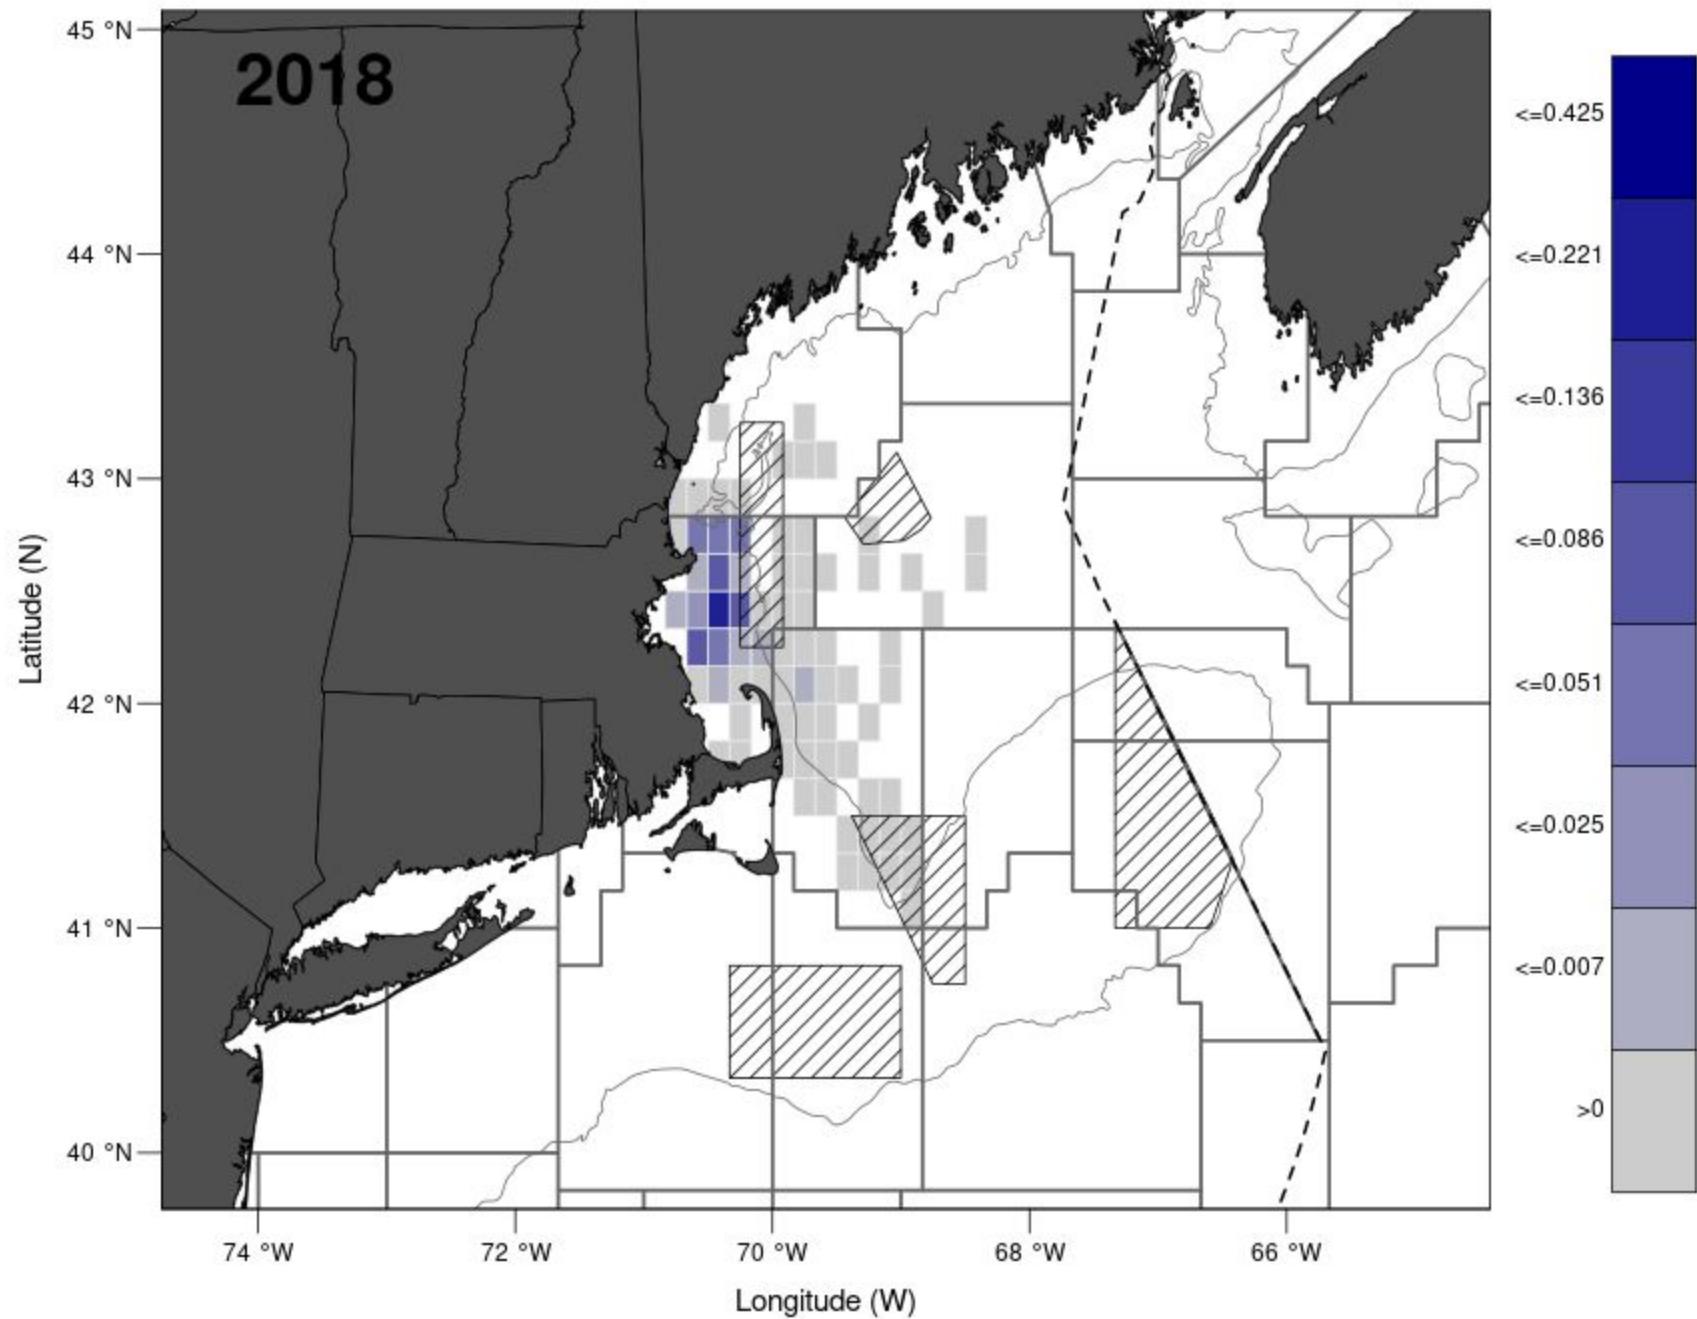

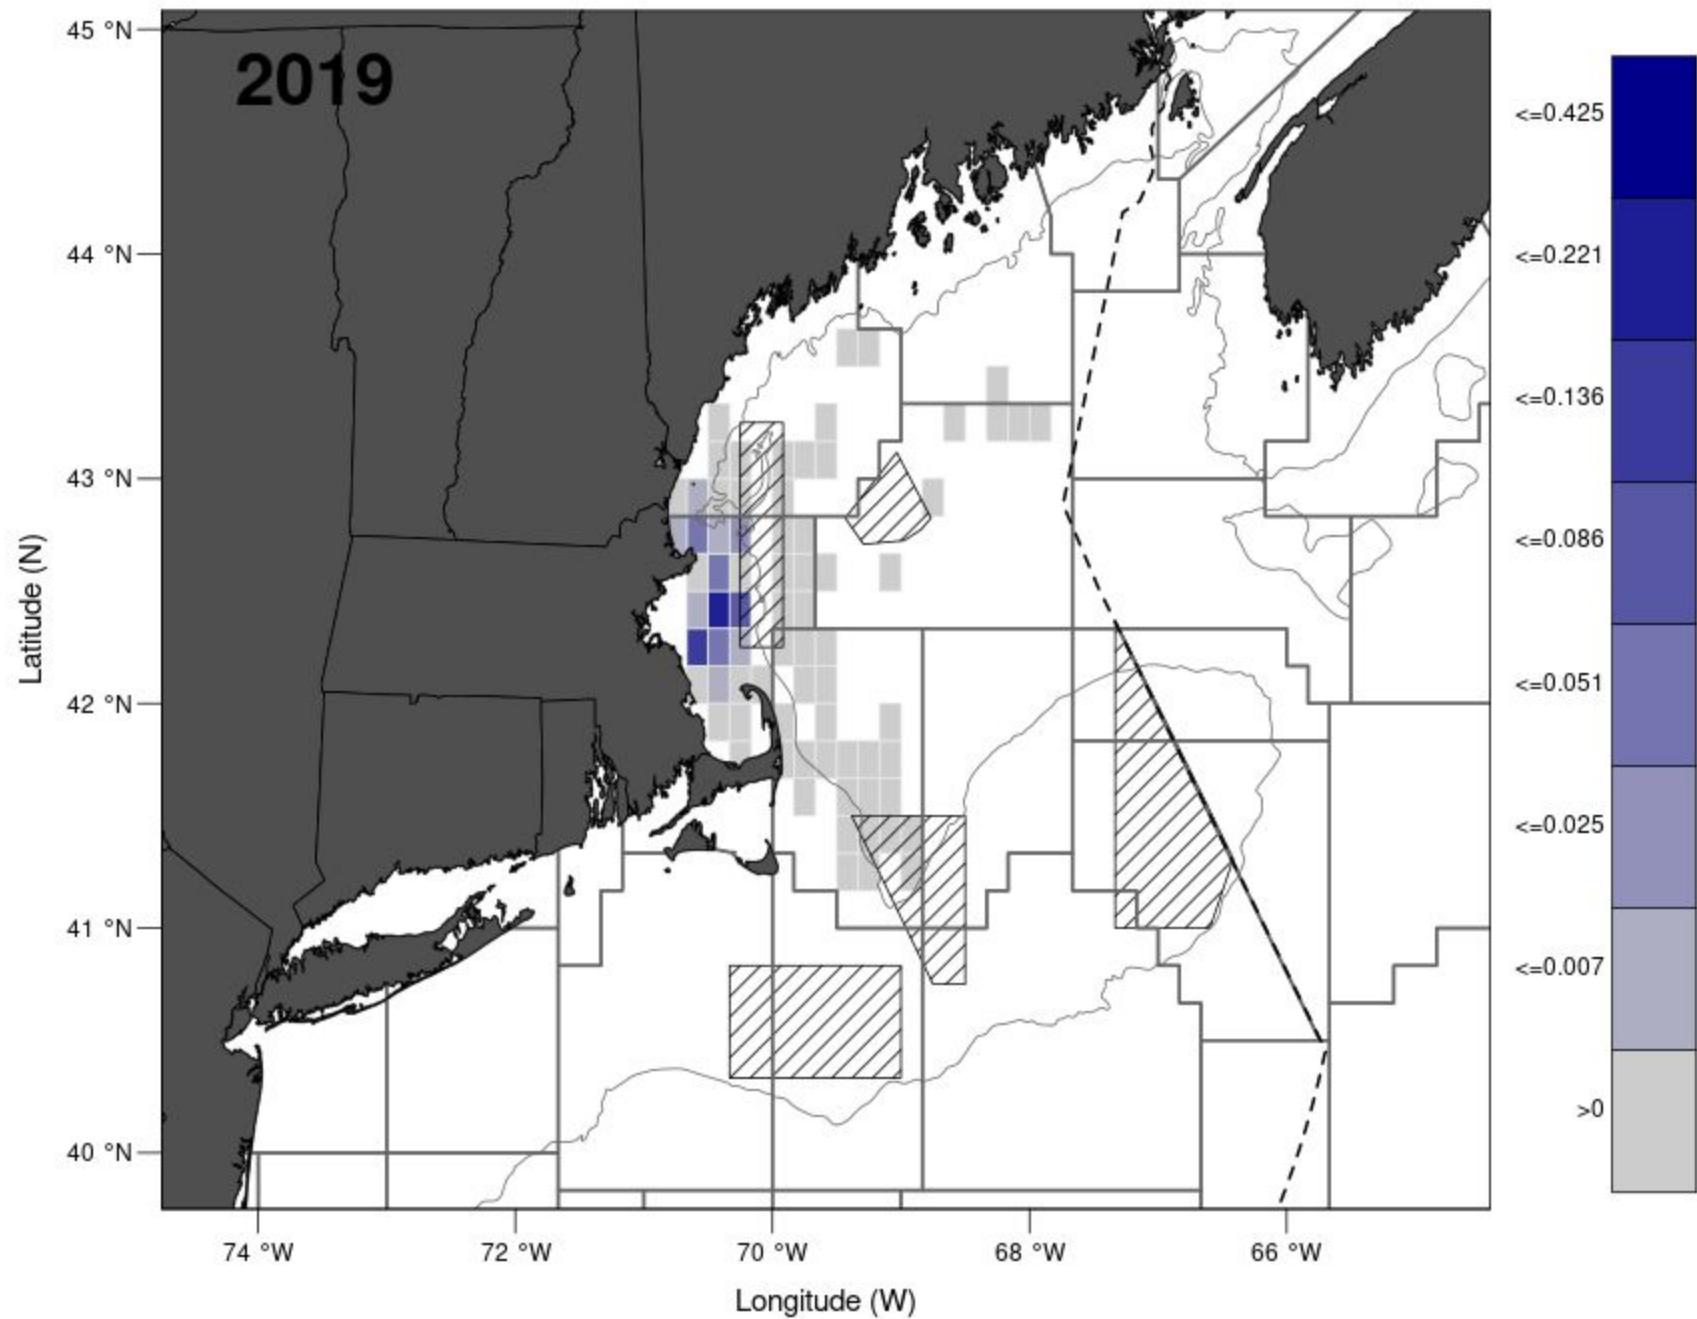

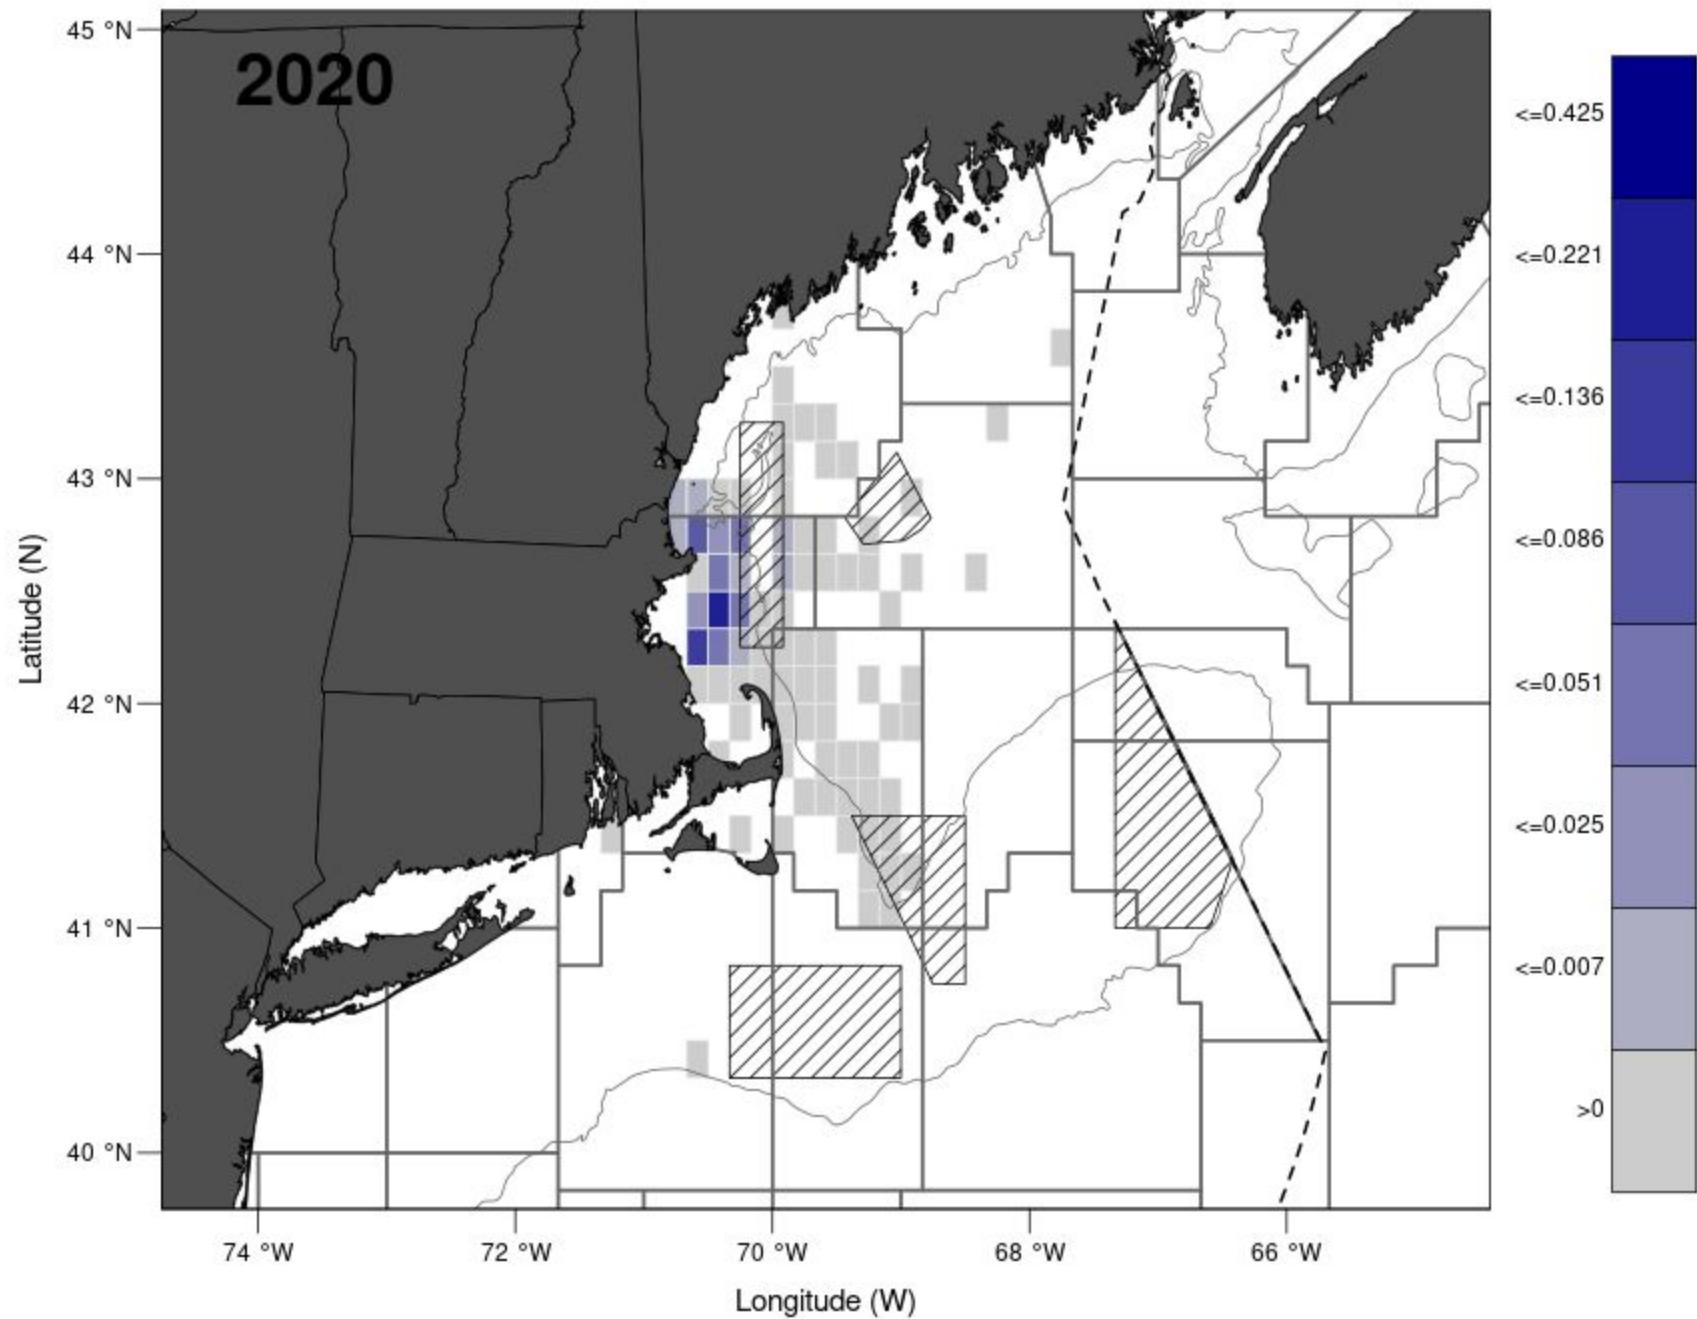

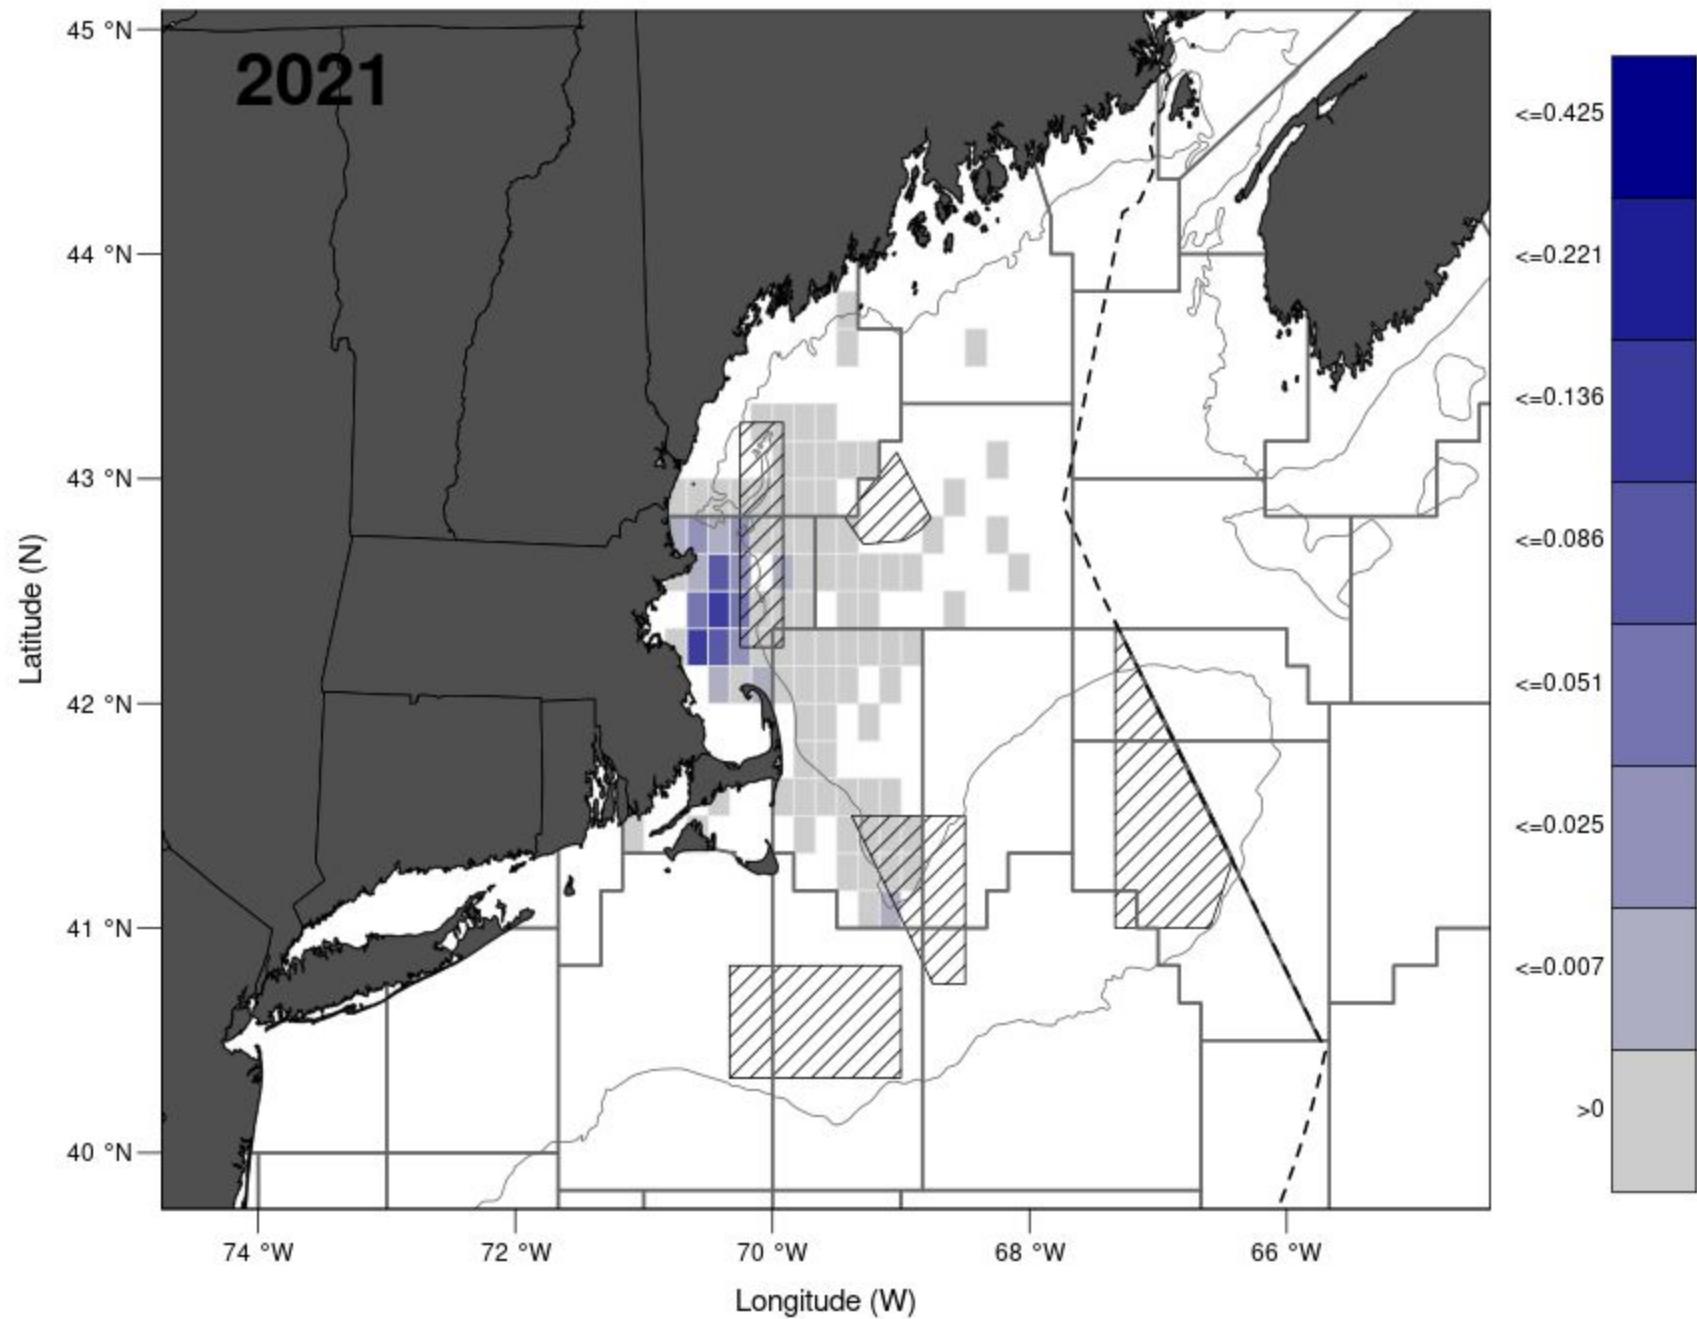

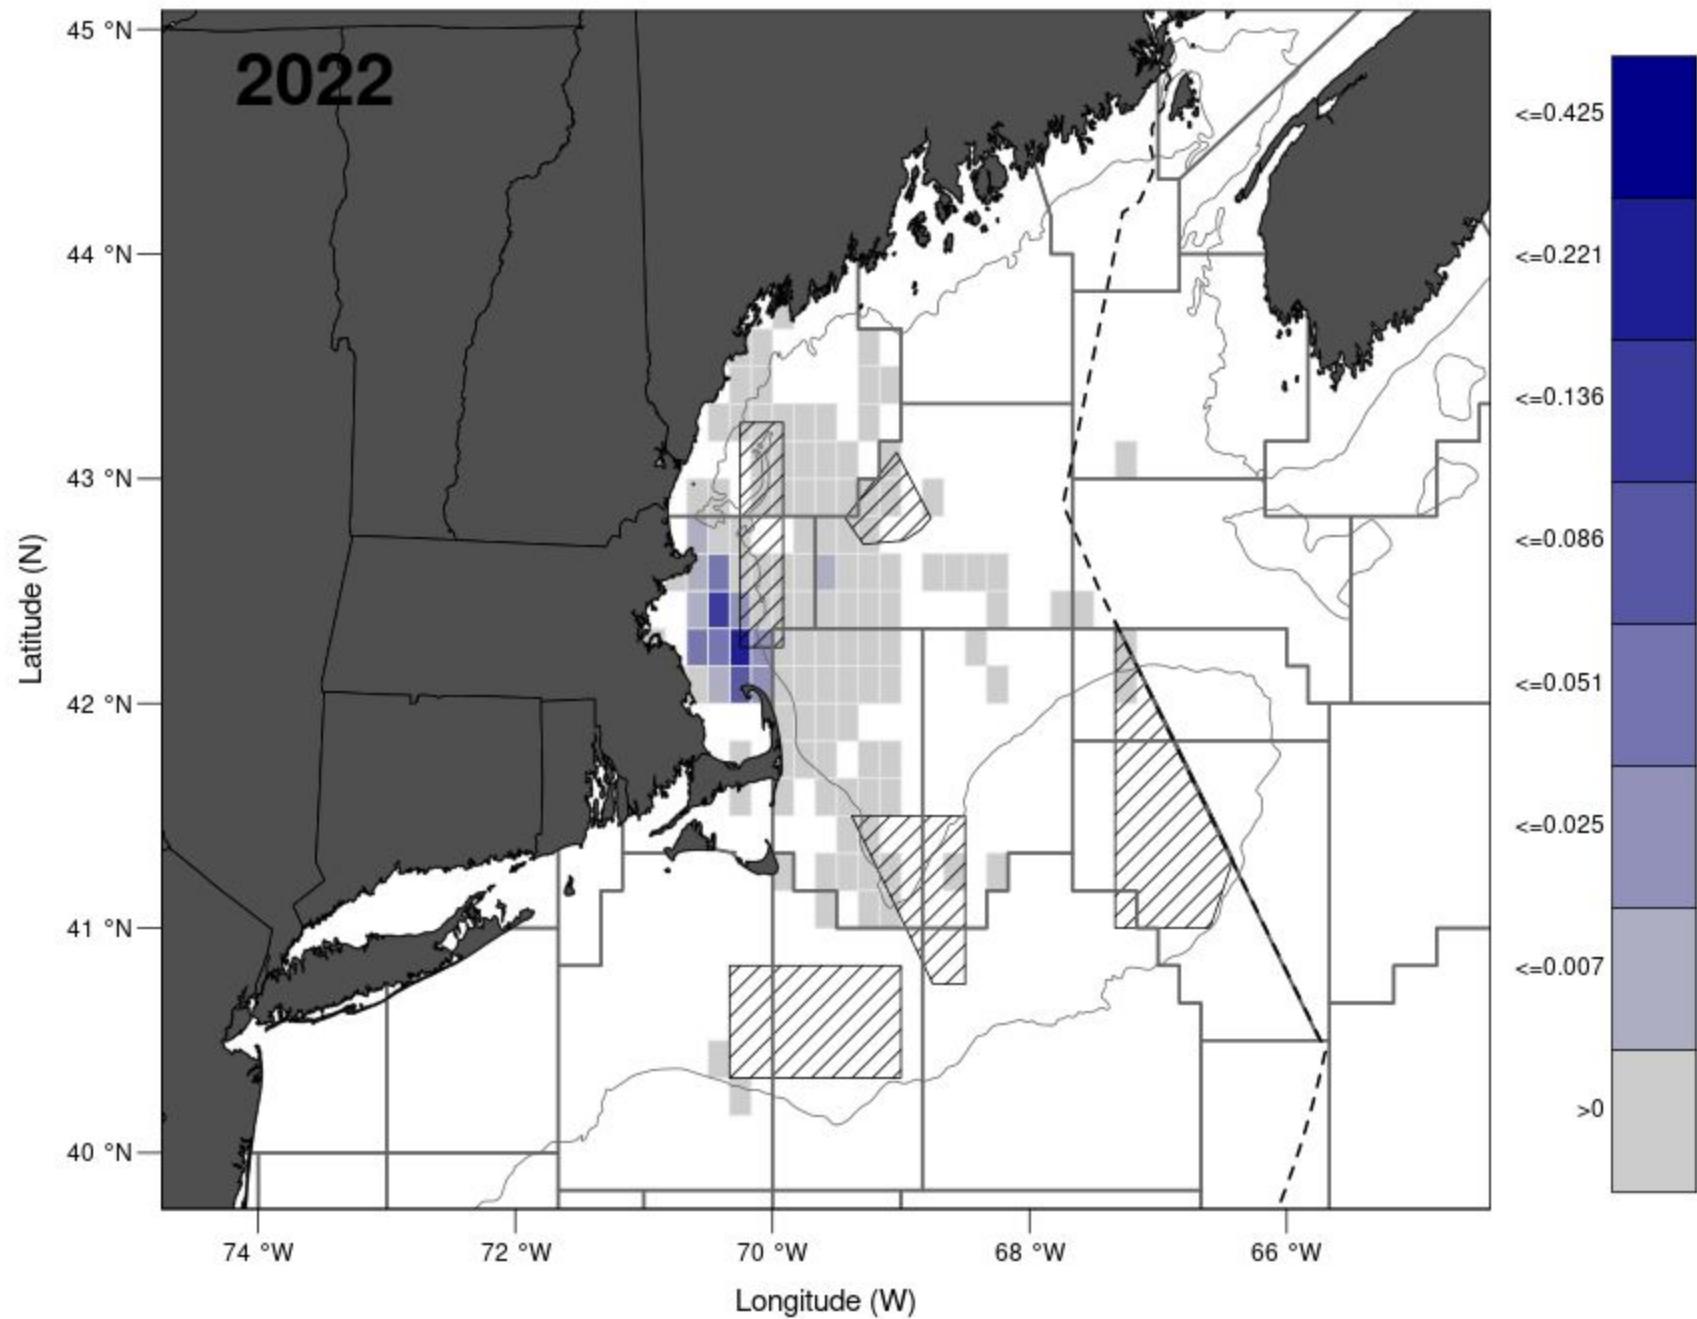

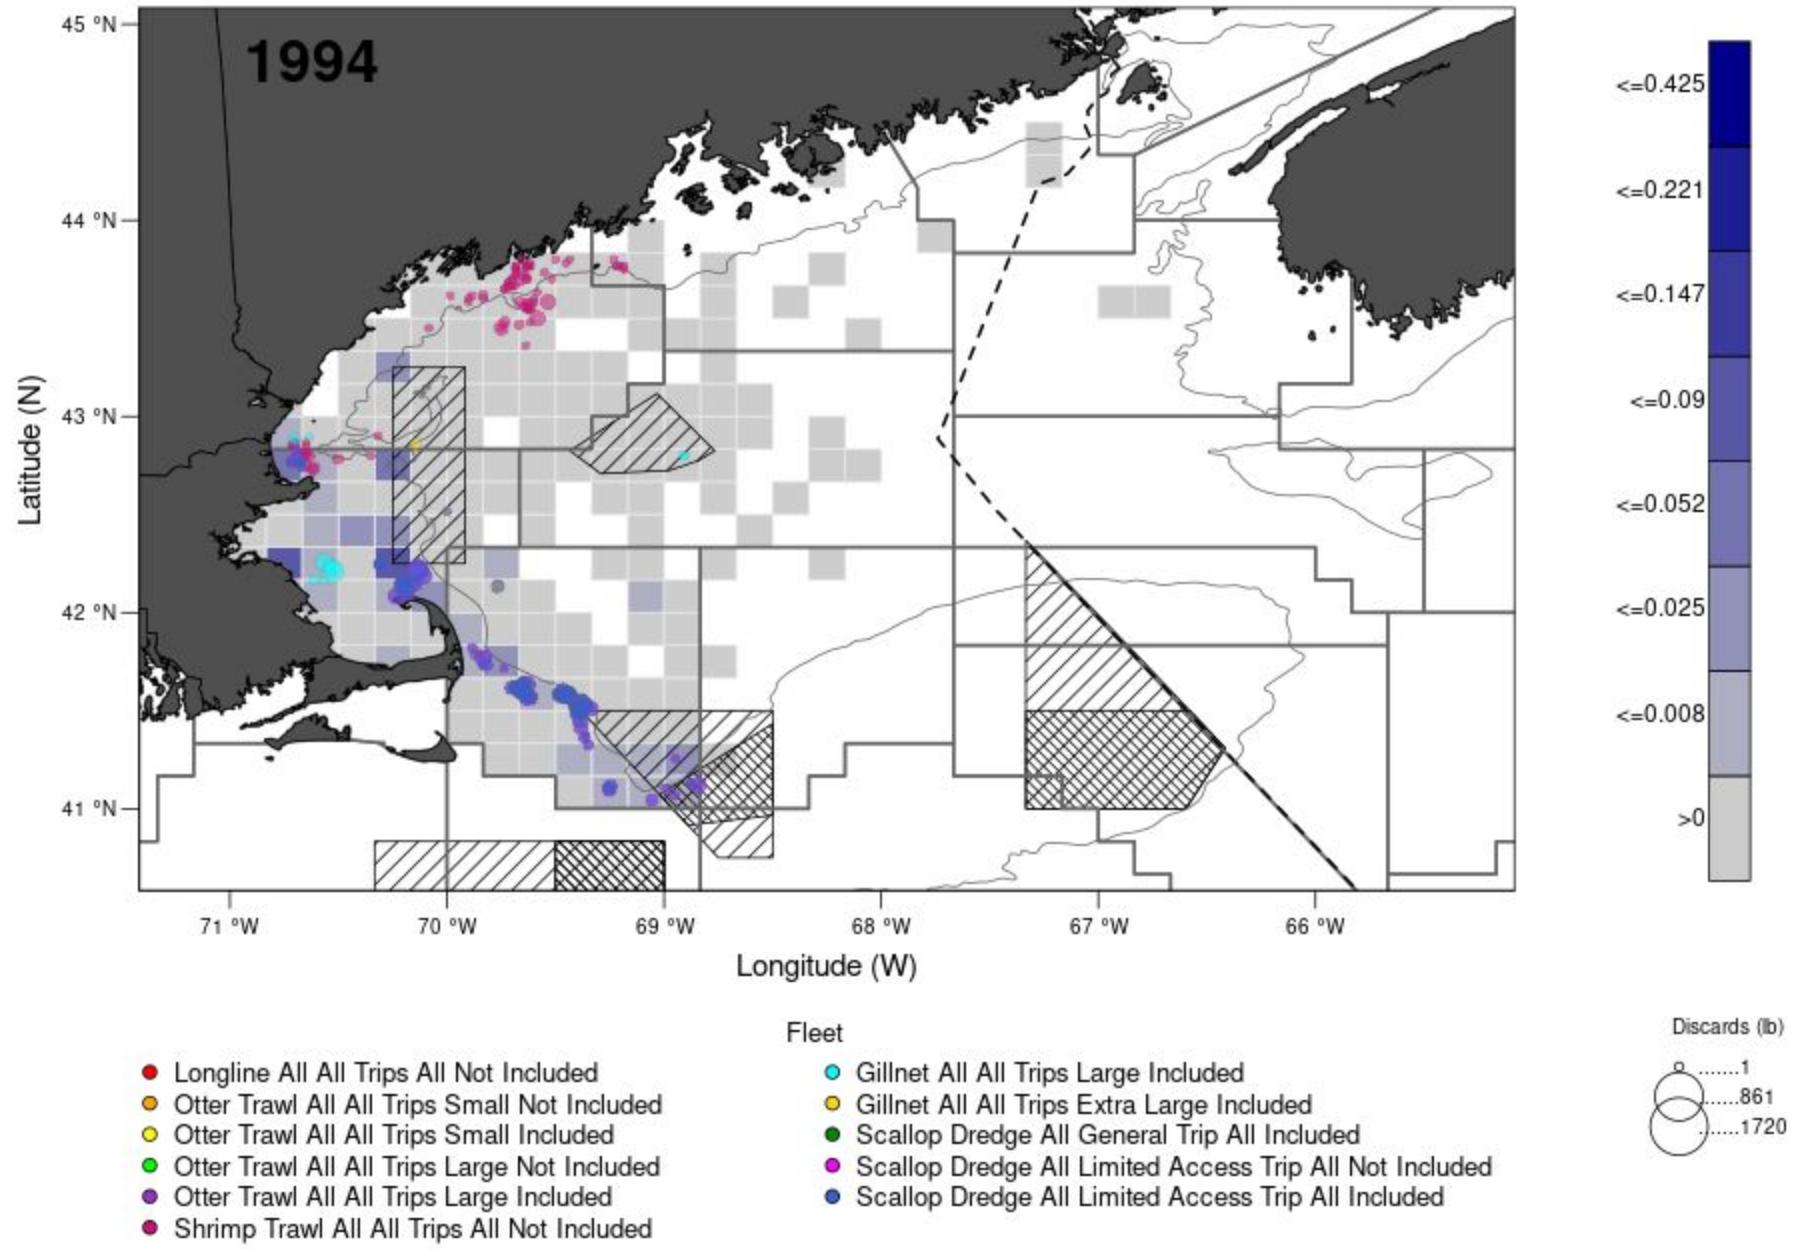

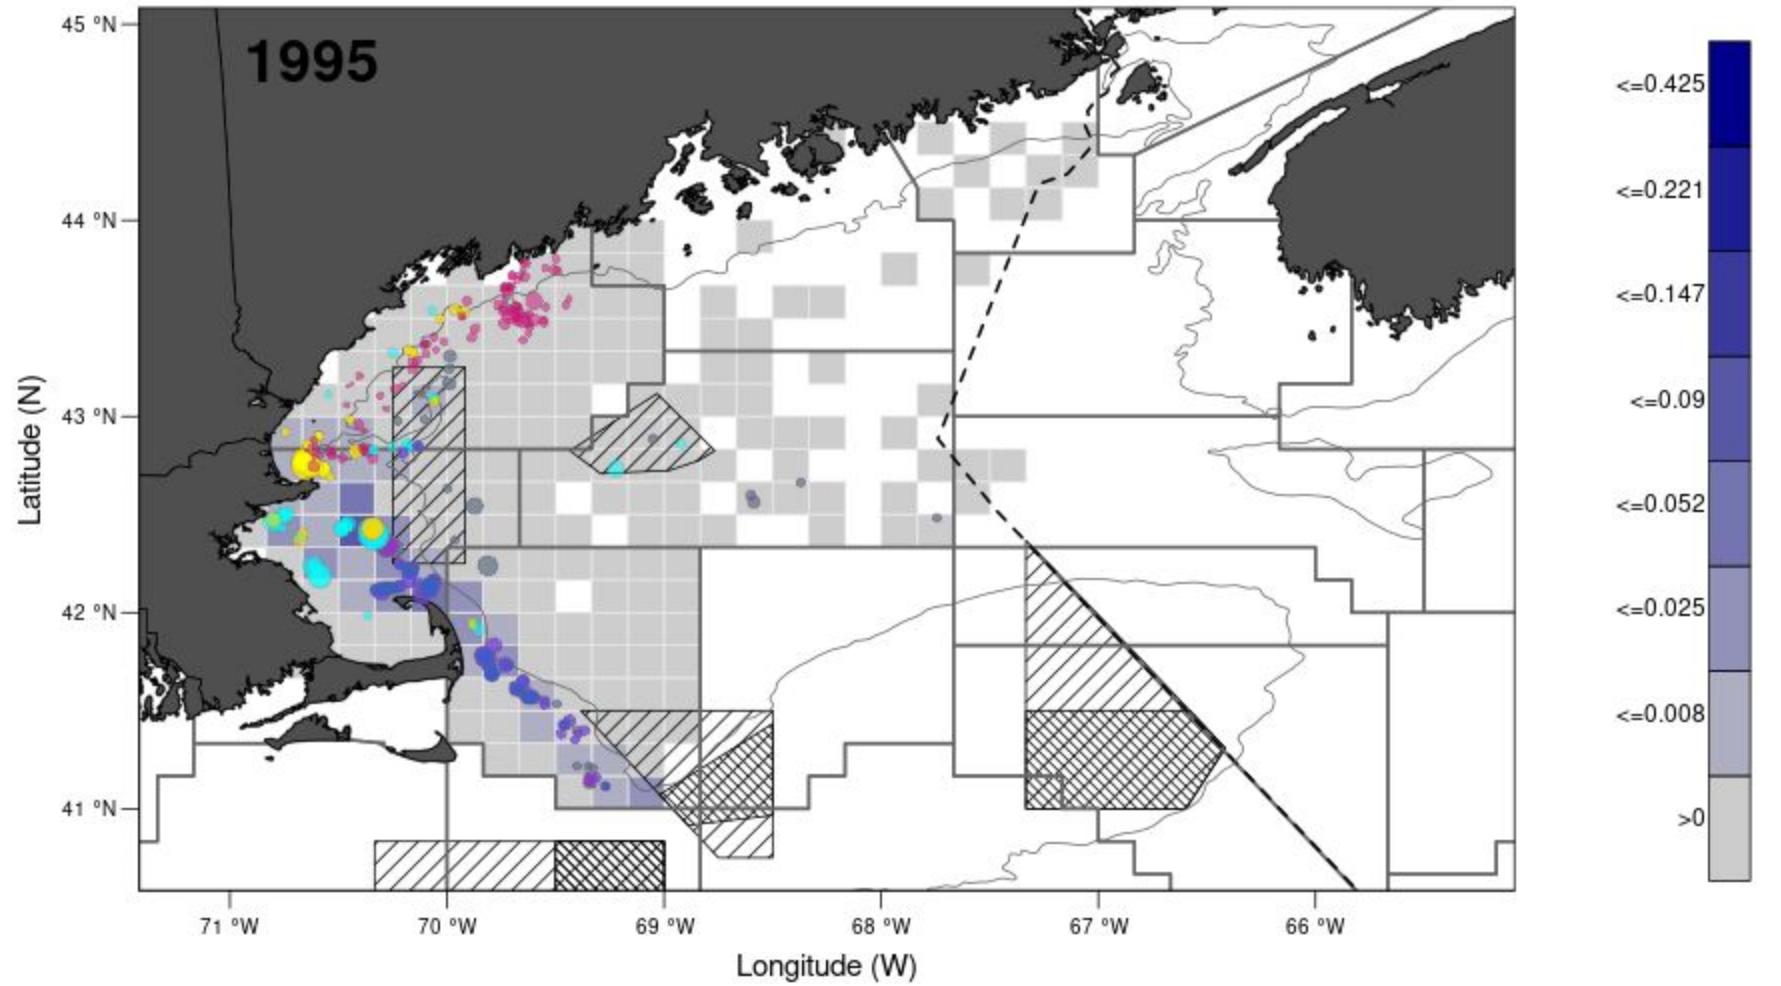

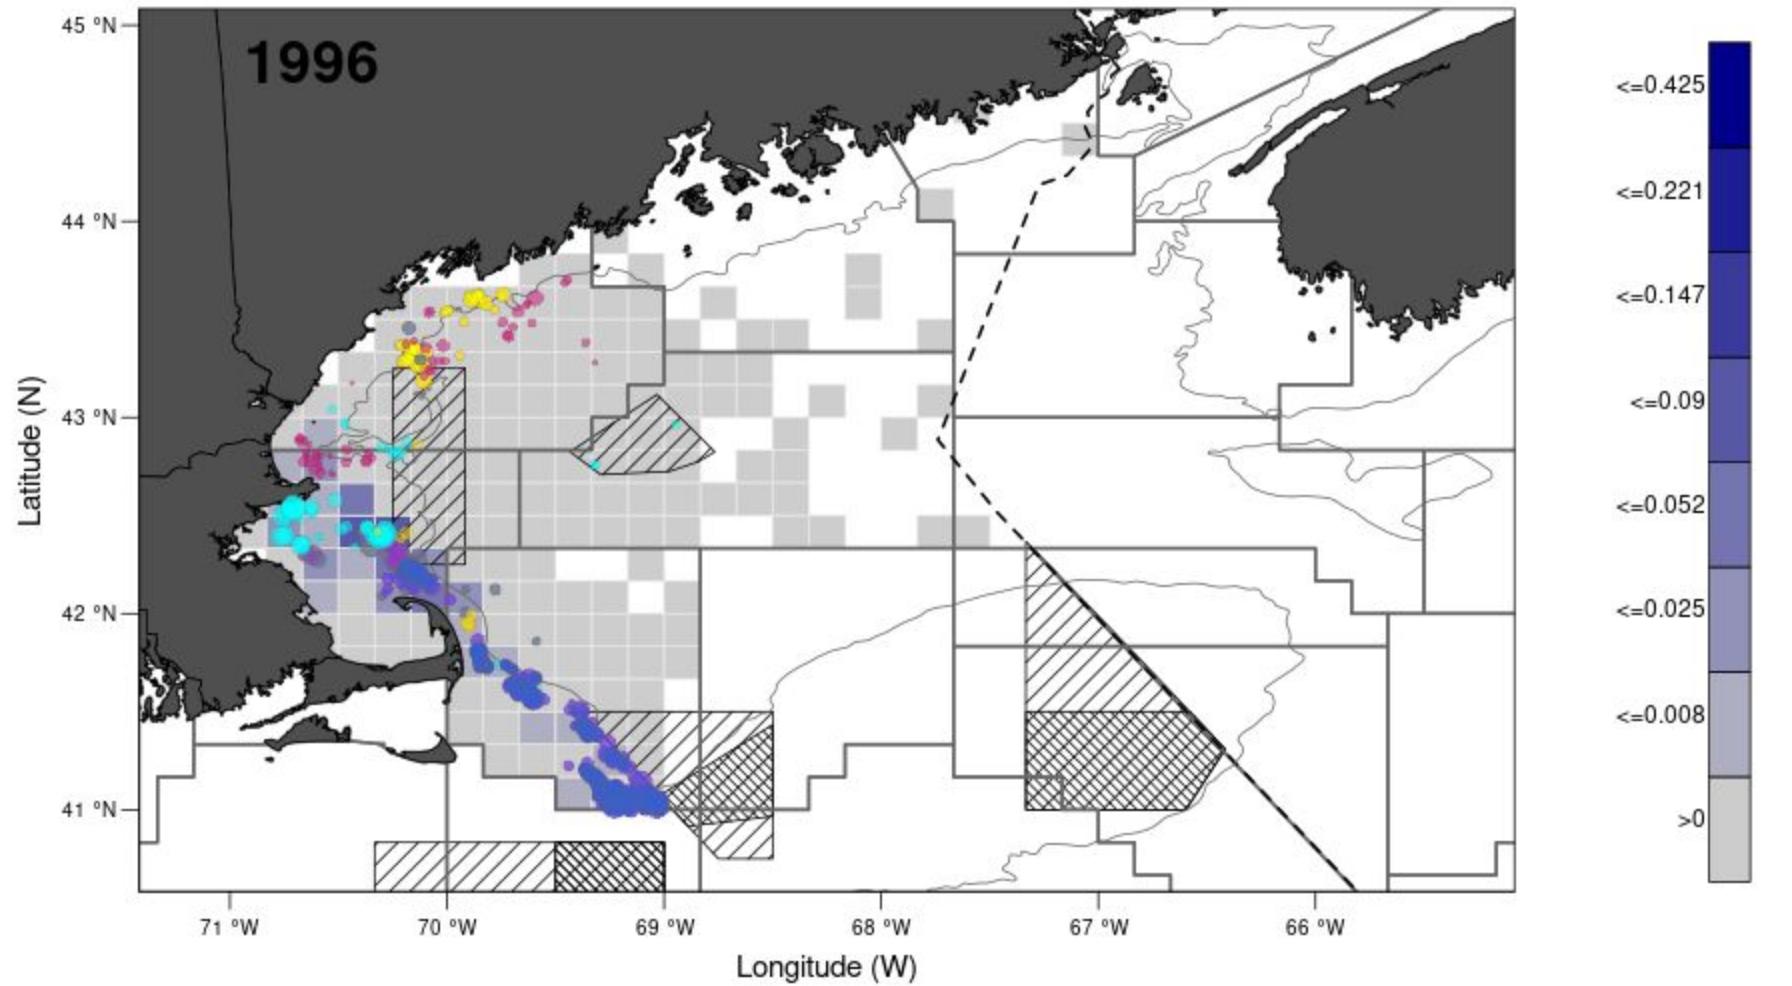

Commercial landings by 10'
square with observed
(non-extrapolated) discards by
fleet
