

Additional material for Peer Review Panel for TOR 2

- 1) Dr. Noel Cadigan: What was the proportion of ‘area unknown’ landings that had to be prorated to region?
- 1964-1993: Port agents assigned area and gear fished to dealer landings (no area unknown to prorate)
 - 1994-2019: Area Allocation (AA) method used to match dealer reports to Vessel Trip Reports to assign area fished to landings
 - 2020-2023: Catch Accounting and Monitoring System (CAMS)

Amount (mt meats) and proportion of landings with area unknown that were prorated to region for 1994-2023:

Year	Total	Area unknown	% of Total
1994	7,598	145.6	1.9
1995	7,994	368.5	4.6
1996	7,887	155.3	2.0
1997	6,233	70.1	1.1
1998	5,565	61.2	1.1
1999	10,119	20.6	0.2
2000	14,623	107.4	0.7
2001	21,020	433.1	2.1
2002	23,879	311.1	1.3
2003	25,400	302.6	1.2
2004	29,062	2,545.5	8.8
2005	25,608	1,310.4	5.1
2006	26,661	532.5	2.0
2007	26,527	933.5	3.5
2008	24,203	357.8	1.5
2009	26,158	257.5	1.0
2010	25,885	181.5	0.7
2011	26,641	273.6	1.0
2012	25,886	211.8	0.8
2013	18,657	132.6	0.7
2014	15,343	160.7	1.0
2015	16,206	161.2	1.0
2016	18,438	230.1	1.2
2017	23,457	212.3	0.9
2018	26,435	340.6	1.3
2019	27,648	242.8	0.9
2020	22,229	41.5	0.2
2021	19,695	34.3	0.2
2022	14,459	62.6	0.4
2023	12,710	64.0	0.5
Average			1.6

2) Dr Yong Chen: How do CAMS landings compare to previous (AA) data set?

	2015	2016	2017	2018	2019
AA tables	16,206.7	18,439.8	23,463.9	26,443.1	27,649.5
CAMS	16,203.7	18,307.4	23,473.5	26,263.1	27,552.5
% difference	-0.019	-0.718	0.041	-0.681	-0.351

Based on CAMS data retrieval on 07/17/2024
